Subject: The LuLu Method.

Oct. 3, 2011.

Here is what Ralph Squire told us about the LuLu.

.....
.....

Ralph Squire: As you may know we as humans are more than a physical body. We also have an etherial body which is around the physical body. And the mind is in the arura not the brain. The brain takes information from the aura and directs the phycial body. There are several layer to the etherial body. If you can get the aura to come in balance then you will h-al the physical body. So if I want to dowse for a water well, I don't have to come to you property to dowse it, I can just use a map.

Remembering that I don't have to work on your body physically I can just use a picture or diagram of your body and work on that.

A lady in Flagstall, Arizona developed a way to show the human body that she calls a LuLu, which a diagram of the phsical body which is bi-s-xual.

On the otherside of the plasic diagram it shows the the back side of the phycial body with the skin taken off just showing the bones. So you can point your finger at the diagram and hold the pendelum in the other hand. Then you move your finger around the diagram till the pendalum starts to move in the negative direction. You keep doing this until it starts moving in the positive direction.

I bought one of these LuLus some years ago and put it in my house, but as I recently move from my old house to this house my granddaughter move them and now I can find anything. I've looked high and low and can't find my LuLu. Maybe you can google it.

You don't really need a LuLu. You can just draw and stick figure with two legs, two arms, two eyes, two ears and that will just work as well.

Just select the name of the person you want to work on and start in.

I can't the name of the person who sold the LuLus.

Someday I might look for my LuLu in all my stuff.

(JW I then told Ralph I had to go and told him I was going down to the candle factory in Columbia, Calif. to see if they sold beeswax candles. Then Ralph said that if I was going down would I drop of some information sheets that he had borrowed from his cousin what forrmerly been a Sqire in his family. He just reached up off the shelp that was by the door and gave them to me. He said maybe it would help me if I they knew that I knew him.

So I made it down to the Candle Factory and the cousin was gone somewhere at the time but the lady operating the shop said she would pass the information on to her.

I asked the lady if they had some candles made of beewax and she pointed to a large display of them. They were all about 9 ot 15 dollars and I told where that he only had enough money to pay 2 to 3 dollars. She then went into the back room and came out with two candles. I told he that I unsented ones and said that said that they were unscented except you know beeswax contains honey, so they smell like honey. She asked it I had the change. I then asked had much change did she need. She then told me that the two candles were 3 dollars and there was a 23 tax, so she needed 23 cents. I gave her 3 dollars plus a quarter and told her to keep the change. She laughed and gave me the candles plus 2 cents change.

With that I went on my way.
