FLYING SERPENTS AND DRAGONS

By R.A. B-ulay

This electronic transcription of FLYING SERPENTS AND DRAGONS by R.A. Bo-lay was first published privately by Galaxy Books of Clearwater, Florida, in 1990. The first edition is now out of print, and this electronic version is by no means an attempt to infringe upon the author's original copyright privileges; it is merely an effort to preserve this important earlier version, with my personal commentary, for posterity's archives. A newer, revised and expanded hard-copy edition of FLYING SERPENTS AND DRAGONS was republished in late 1997 by The Book Tree, P.O. Box 724, Escondido, California 92033 (Tel.+800-700-8733).

Polo Delsalles of Montral, Qubec, prepared the superb French translation of this exciting work, and his translation is available only at this website.

FLYING SERPENTS AND DRAGONS
By R. A. Bou-ay

Editorial Comments By Roberto Sol-ion
Chapter 1
ARRIVAL OF THE PROTO-SUMERIANS : THE ANCIENT ASTRONAUTS

"The reptiles verily descend. The earth is resplendent as
a well-watered garden. At that time Enki and Eridu had not appeared.
Daylight did not shine, moonlight had not emerged." Fragment from the
oldest known Sumerian Tablet

THE SUMERIAN KING LIST

One of the most remarkable and valuable historic documents is the
so-called King List, which records the names of the Kings of Sumer
and the lengths of their reigns from what was to them, the beginning of
history - a time in the distant past when "kingship descended from
he-ven" and founded five cities in the Mesopotamian plain.
It records an interruption when "the Flood swept over the land," an
event which we know as the Deluge or Great Flood. The King List then
resumes the narrative as "kingship descended" once more. It describes
the kings and their reigns down to part of the Isin Dynasty which began
to rule about 1950 BC.

The King List attributes reigns of legendary and incredible lengths to
many of the rulers of the earlier antediluvian kings. In this sense, it
affirms the enormous lifespans of the Patriarchs of the Old Testament.
While these extremely long reigns and lifespans cannot be explained,
there is a consistency among the secular and r-ligious sources that
indicate they had a logic of their own which has yet to be perceived by
current scholarship.

The King List has received mixed reviews among scholars, but since its records of the Fourth and Third Millennia BC have been corroborated separately by archeological evidence, it has been accepted by many as a valuable historical document.

In his work "The Sumerians" Professor Samuel Noah Kramer, the dean of Sumerian studies, endorses its value as a research tool. He has suggested that the King List "if used with discrimination and understanding, provides us with a historical framework of inestimable value."

MESOPOTAMIA, THE CRADLE OF CIVILIZATION

Our story does not begin with the creation of the world. It starts with the arrival of intelligent life on Earth - the people we know historically as the Proto-Sumerians. It is not known exactly when these ancestors of ours came here or why. It is surmised that they arrived here quite some time before the world-wide catastrophe called the Deluge. It was also long before the advent of modern man or Homo sapiens. It is generally agreed that these Proto-Sumerians were the origin of our Western Civilization, and that their beginnings were in the area called Mesopotamia, literally "the land between the two rivers." The arrival of these "g-ds" is reported in the records that their descendants left behind - the Sumerian, Akkadian, and Babylonian cuneiform tablets.

The land known as Mesopotamia and the cradle of civilization, lies mostly between the Tigris and Euphrates Rivers. Originating in the mountains of Armenia in the north, the two rivers move in a gradually converging course down a wide and grassy plain to the Persian Gulf. In early times, the area was made up of marsh and lagoon, much as it is today.

The introduction of an intensive river-canal system to irrigate and drain the plain gave rise to a dense population and to the establishment of a great culture. The lower part of Mesopotamia became a very fertile garden area which the Sumerians referred to as E-DIN, or "the abode of the righteous ones." It was the location of, and gave its name to, the Biblical Garden of Eden.

While the southern part of Mesopotamia came to be called Sumer, the area farther up the plain at the near convergence of the two rivers was later called Akkad. The Akkadian city BAB-ILU became prominent and gave its name to the entire region - Babylonia.

After the Deluge, the Sumerian cities were rebuilt and resettled on the alluvial plain of Mesopotamia. Since the oldest of these date to about 3500 BC, and was built on virgin soil, it is clear that they were not built upon the ruins of the former city. This is due to the fact that the waters of the Persian Gulf have risen some 150 feet since the Deluge, inundating the former cities. This will be discussed later.
