THE ANTEDILUVIAN CITIES AND THEIR PURPOSE

"When the Kingship had come down from H-aven, Anu founded the five cities, gave them their names, apportioned their uses. The first of these cities Eridu, he gave to the leader Nudimmud [an epithet for Enki]."

From the Sumerian Story of Creation

According to the Sumerian King List, there were only five cities which held the kingship before the Deluge or, in other words, which served as capital cities to the antediluvian Anunnaki. The order in which they are given is the succession in which they ruled, although they were probably all built at about the same time.

The reason for moving the capital from one city to the other may have been political; on the other hand, the shifting of the water courses due to periodic flooding and the drying up of the southern part of the Mesopotamian Valley, as the climate changed, may have been the compelling reason for moving the capital to more northern and readily accessible cities.

Strangely enough, the King List does not mention the cities of Uruk and Nippur which were also built before the Deluge. These were designed as ceremonial and sacred cities, which probably accounts for their being left out of the King List. The five cities of the King List were strictly operational cities.

They were operational cities built by Enki and his engineer astronauts for the express purpose to obtain rare metals, processing them, and ferrying the ingots to the orbiting mother ship. The five cities were a cohesive group, each providing an essential function to the main purpose of the expedition. Their function is alluded to in their names, and are as follows:

ERIDU, OPERATIONAL HEADQUARTERS OF ENKI

Literally "Home Built Far Away," E-RI-DU was the first city to assume the directed all operations on Earth, as he supervised the draining of the marshlands, the raising of the cities, the establishment of agriculture and animal husbandry, and generally making the land more hospitable and productive.

From Eridu, Enki also directed the development of the mines, presumably in Africa, the transportation of the ores, and the processing of the metals at Badtibira. Eridu was the first city built on this planet, which probably gave our world its name - Earth, the third planet in our solar system. The origin of the word "Earth" is unknown and its origin lost in antiquity, but logically and linguistically it can be traced back to Eridu.

As a trained linguist, I can also see this connection. Remember what I have previously discussed about consonant strings and aspiration. Well, the consonant string in Eridu RD, and the consonant string in Earth RT (H rarely counts). T and D are paired consonants in linguistics; they are formed in exactly the same way by the muscles of the mouth, but D requires use of the vocal cords. Try it! On the other hand, Enki's alternative name was Ea, which just coincidentally happens to occur in the word Earth. However, as we know from Sitchin, our planet's original name before the Nibiruan arrival was Tiamat.] The name assigned to their planet by its occupants can be

traced back to the root Eridu. In Old High German, Earth is Erda; it is Erthe in Middle English, Era in Greek, Ereds in Aramaic, and Eretz in Hebrew, to name just a few. It seems that all philological roads lead back to the first city built on this planet by our alien forefathers - Eridu.

BADTIBIRA, THE METALS PROCESSING CENTER

The name BAD-TIBIRA means "city where the ores are processed." In the King List it retained kingship for the longest time of all the cities, almost half of the period of time recorded before the Deluge, which is indicative of its primary importance among the cities. Sumerian "tibira" is derived from the same proto-Sumerian substrata word as Hebrew "tubal," which means "metal worker." This relationship is seen in Ge-esis wherein Tubal-Cain, the son of the Patriarch Lamech, is credited with the invention of metals: "Tubal-Cain, who forged the various implements of copper and iron."

Badtibira was the first strictly operational city built by Enki and reflects the reason the Anunnaki came here - to obtain and process certain metals, presumably gold and silver, and perhaps other rare metals.

[Comment:

They needed this gold, as we know, to reinforce the heat-shield around their Planet Nibiru.]

The King List assigns the city of Badtibira to Nugig or NU-GIG which means "he of the bright sky" and was an epithet for Nannar, the favorite son of Enlil.

Arriving by ship from the African mines, the ores would be processed at Badtibira into transportable form and then would be shuttled up to the mother ship to be eventually shipped to the home planet. For this reason, a beacon city was needed to guide the incoming and outgoing shuttles.

LARAK, THE SPACE CONTROL CENTER

The name LA-RA-KA means "see the bright light" and the third city assigned the kingship. Its name indicates its function, that of guiding the metal freighters arriving and leaving Mesopotamia.

The King List has the city assigned to Pabilsag, meaning "the great protector" and it was one of the titles of Ninurta, the military aide of Enlil who recovered the MEs from the rebel son Zu. Little is known of this city, and like that of Badtibira has not been located archaeologically.

[Comment:

Ninurta in Egypt was Ptah; Zu or Marduk in Egypt was Amon-Ra, the Baal of the Bi-le.]

SIPPAR, THE SPACE LAUNCH PLATFORM

The fourth city built was SIP-PAR or "Bird City." It was the landing platform for the space shuttles, especially those hauling metal cargo.

One of the Sumerian myths states that this city was built for the god Utu, one of the circle of seven great g-ds who decreed the fates.

Better known as Shamash, his Akkadian and Semitic name, Utu was chief of the astronauts. When the space platform and related activities were moved to the Western Lands [Comment: ie, Sinai] after the Deluge, Shamash was placed in charge of the space city of Baalbeck as well as the land of Lebanon.

[Comment:

This is slightly incorrect. Prince Utu was the Nibiruan Space commander at the Sinai Spaceport; Princess-Royal Inanna was Nibiruan Airfleet Commander at the Baalbeck Airport, although she was under the direct command of her brother and s-cret lover, Prince Utu. See:

<http://www.apollonius.net/hellespontiacus.html>

.]

Since it was "the stairway to the stars," Sippar was of major import among the antediluvian cities. Its sole king Enmeduranna literally means "the L-rd whose MEs bond He-ven and Earth," an allusion to his ability to control the flights between Sippar and the orbiting ship. Enmeduranna was himself the hero of a Sumerian tradition which has him transported to hea-en, much the same as the Bib-ical Enoch who was also translated to hea-en.

The evidence that identifies Enoch as Enmeduranna is found in the writings of the Pseudepigrapha discussed below.

SHURUPPAK, THE CHIEF MEDICAL CENTER

The fifth city to be built was SHU-RUP-PAK, or "the place of the utmost well being." This city was dedicated to the Chief Nurse and Medical Officer of the Expedition, the Goddess Ninkhursag. She tended to the medical and health needs of the Anunnaki, and to a certain extent to the needs of humans, from her temple atop the ziggurat at Shuruppak.

URUK, THE SA-RED CITY OF THE GREAT GOD ANU

Uruk or "Great City" was dedicated to the chief God Anu. Its temple atop the ziggurat was the ceremonial center for Sumer. It was his residence when away from his space city and on visits to Earth, which became less frequent as the world became more populated. Anu's influence seems to have declined in the days just before the Deluge and his authority was taken over by Enlil. Since he rarely used his ceremonial city, Anu turned it over to Inanna at her request.

[Comment: Anu and Inanna were lovers for a long time.] She institutionalized her control over the city of Uruk by obtaining the necessary controls and authorities in the MES which she extracted from Enki, as we have seen.

NIPPUR, ADMINISTRATIVE CENTER OF ENLIL

This was the city dedicated to Enlil and where he ruled from his Ekur or "house on the mountain." At Nippur, Enlil exercised supreme command over all the Anunnaki on Earth before the Deluge.

One of the hymns dedicated to him provides a graphic description of a control center bristling with communications and other electronic equipment scanning the horizons. From the Ekur, it was said that Enlil's "eye scans the land" and "his lifted beam searches the heart of all the lands."

Nippur was rebuilt after the Deluge as his sacred city. It is also the city where, according to the "Third Book of Enoch" that the Lord kept his "Shekinah" or space craft, at the entrance of the Garden of Eden until the days of Enosh when he abruptly left for his heavenly abode, never to return except on special occasions. It was also at Nippur, at the River Chebar, that Ezekiel first saw the "fiery chariot" which is described so vividly in the "Book of Ezekiel."

[Comment:

If you ever pass through Pittsburg, Texas, have lunch or dinner at Warrick's Restaurant - excellent Cajun type food. They have a life-sized replica of the Ezekiel Airship sitting right there in the middle of the restaurant, next to where the Samoan band plays on the weekends. Yes, this is true!]
