(JW Here are some of the different group that make up the Andromeda Council.)

.....

The Zenetae star system itself is physically located in the Andromeda Galaxy. These two people, as many on the Andromeda Council, live and vibrate in a 4th dimension/density reality. There is one council member per seat.

Many of the member races of the Council are acknowledged throughout the Universe to be some of the same races that originally seeded Earth hundreds of thousands of years ago, as evidenced by the variety of humans on the planet today. It is said these races have already been through the process of transformation, of upliftment & the elevated vibration, density, and spiritual consciousness of the 4th dimension.

Members of the Andromeda Council are from the star systems & planets listed below:

Star System: Arcturus
