Andrew D. B-siago claims to be one of America's early time-space explorers.

Appearing in the latter half of the show, he discussed his involvement with the C-A's Mars visitation program in 1980. The program, he said, was started in the 1970s, and transported people from a "jump room" (an elevator in El Segundo, CA that served as a kind of portal) to the surface of Mars. According to Ba-iago, Maj. Ed D-mes taught a training course to several of the participants about what to expect in terms of humanoids and "predator species" on the Martian surface (Da-es briefly appeared in the 4th hour and denied his involvement with the program).

Also joining the show was William Brett S-illings, who said he was in the Mars visitation program in the early 1980s along with Bas-ago, and such future luminaries as Barry Soetoro (P-es. Barack O-ama), and Regina D-gan (the current head of DARPA).

Laura Magdalene E-senhower, the great granddaughter of Pr-s. Eis-nhower, made an appearance as well, revealing that she was the target of a sophisticated recruitment effort to join the Mars colony in 2006-07, though she turned down the opportunity. Basi-go announced that he plans to run for Pres-dent in 2016.
