This week Conspi-acy Journal brings you such Auld Lang Syne tales as:

- Looking for Aliens? Try the Moon -
- Super-Highway to the Stars: Alien Traffic? -
- Evolution of Angels -
- What are the Great Pyramids Really Made of? -
- AND: There's a Folk D-vil in Every Crowd

All these exciting stories and MORE in this week's issue of CONSPI-ACY JOURNAL!

~ And Now, On With The Show! ~
HOLIDAY SPECIAL FROM CONSPIRA-Y JOURNAL

ViVenus Starchild and Flying Saucer R-velations

ARE THERE ALIENS AMONGST US?

THE GOLDEN A-E OF FLYING SAUCERS PROVIDED US WITH MANY
PROPHETIC REV-LATIONS OF FUTURE LIFE ON EARTH

Here is a real flying saucer classic - two volumes in one from the all important Golden Age of Flying Saucers in when many of the UFO contactees of the 1950s and 60s were claiming to have actually meet space beings (commonly called the Space Brothers) and in some cases to have actually gone for trips inside cigar and disc-shaped craft to other planets.

It's a part of UFO research the public seldom ever hears about -
- that human-looking, "Nordic-like" aliens are living among us, having become part of our society with or without the knowledge of their neighbors.

It was in this atmosphere of cosmic awakening that a woman named Vivenus (JW My friend Zelrum Karsleigh, the leader of group, a few years back, in Portland, Oregon, had a visit from Viv one time and she spoke to their organization called "The Universium Foundation. She drove around in a Voltswagon bug from place to place. She was cute and looked like a hippy.) emerged with a message of hope and universal love. Vivenus claimed to be a resident of the planet (believe it or not!). She arrived, she said, on earth at 10 PM on September 24, 1960. A flying saucer (or "swoop" as they call them on her home planet) let her out in Central Park and she took control of her earthly double who was about to take her own life.

NOT ALL CREATURES FROM OTHER PLANETS ARE INTERESTED IN
ABDUCTING US AND PROBING OUR BODIES!

In this book you will learn how people on Venus live for thousands of years; How everyone on Earth has a twin on Venus; How the Venusians have developed their mental powers to create a

paradise on their planet; How Earth and its inhabitants have strayed from G-d's path, and how we can also make Earth a paradise.

PLUS SPECIAL BONUS MYSTIC MONOGRAPH BY MICHAEL X

His real name was Michael Barton, though he wrote over 25 confidential monographs under the moniker of Michael X. All we really know is that Michael was a simple businessman who had a friend whose life was saved from cancer after having a close encounter. A former skeptic, Barton began to question his sensibilities as he spoke with many of the UFO contactees he met at places like Giant Rock in the Mojave Desert, to exchange stories of meeting beautiful, benevolent, angelic-like beings from outer space. (JW I met and talked with Michael X at a meeting of people who were interested in Flying Saucers at San Antonia College of Metaphysics Inquiry, in Oakland, Calif. It was run by a millionaire called John Hopkins. I once asked Michael X. what the X. stood for in his name and he said it is to show honor to Christ.)

In this rare reprinted section Michael X reveals the S-CRET ORIGIN OF HUMANKIND. The author asks: "Did you ever wonder about how you came to be on this planet? Where did you...and the other billions of human inhabitants of this Earth come from in the first place? What are the real facts?"

"You're going to be astounded and amazed when you find out the whole story of man's secret origin! You'll probably say to yourself 'Why wasn't this information brought to my attention before?' and, 'Why wasn't I taught this kind of knowledge in school, so I could have been making good use of it all these years?' Why? Why? Why?"

This book will take you on an adventure like you have never been on before.

PLUS! If you order right now, you will receive a free CD of the 1966 album "From Worlds Afar" by British contactee Mollie Thompson. This amazing album from the early "UFO contactee" era is something you must have in your collection.

Vivemus Starchild is available now at the special price of \$-- plus \$-.00 shipping. So don't miss out on this fantastic deal, order now before it is too late!

You can also phone in your credit card orders to Global Communications 24-hour hotline: 732-602-3407
And as always you can send a check or money order to:

Looking for Aliens? Try the Moon

American scientists want to enlist online volunteers to identify signs of alien life in moon images collected by NASA's Lunar Reconnaissance Orbiter (LRO).

Physicists Paul Davies and Robert Wagner of Arizona State University believe there may be signs of extra terrestrial life in the form of messages, scientific instruments, waste or evidence of mining that could be spotted by human telescopes and orbiting spacecraft.

In their paper published online in the journal Acta Astronautica, the pair wrote: "Although there is only a tiny probability that alien technology would have left traces on the moon in the form of an artifact or surface modification of lunar features, this location has the virtue of being close, and of preserving traces for an immense duration.

"If it costs little to scan data for signs of intelligent manipulation, little is lost in doing so, even though the probability of detecting alien technology at work may be exceedingly low."

The paper adds: "Alien civilizations may have sent probes to

our region of the galaxy. Any mission to the solar system would probably have occurred a very long time ago.

"The lunar environment could preserve artifacts for millions of years."

The LRO has been taking pictures of the moon's surface since 2009, with more than 340,000 images collected so far.

According to Da-ies and Wa-ner, it would be impossible for one team to examine the ever-growing number of images, hence their suggestion to involve amateur enthusiasts in what they claim would make "an excellent educational project".

They also suggest building computer software that could recognize irregularities on the moon's surface.

The proposals would complement other hunts for alien life, including the Search For Extraterrestrial Intelligence (SETI), which uses data from radiotelescopes.

Super-Highway to the Stars: Alien Traffic?
By Diane T-ssman

One of the major questions of the UFO enigma: Can extraterrestrials get to Earth from "out there" when space/time is so vast? If we feel that no living being can ever traverse the distances involved, regardless of advanced technology about which humans have yet to learn, and regardless of the true nature of space/time, gravity, light, and the electromagnetic force about which humans also do not yet know, then we begin to assume that aliens are from some other dimension of Earth.

The fact is, it is difficult to separate the concept of extraterrestrials from the concept of other-dimensional beings. An example: If future humans are traveling through space/time, then they are from the dimension of time when they visit us in 2012, but they are also likely to be space-travelers. Even ETs from far distant planets might travel through dimensions to shorten the trip from here to there.

However, what I mean by "other dimensional beings from Earth," is that if we feel they just can't get "here" from "there" due to the distances involved, we then begin to wonder if our visitors are some sort of lower Earth life form, parasitical and d-monic in nature, which nonetheless possesses advanced propulsion and/or advanced quantum abilities, and that they "attack us."

I cannot understand how parasitical de-ons have managed such advanced propulsion methods and/or how they e-olved such a powerful level of consciousness as to be able to manipulate the quantum world. I do not understand this theory at all; it has many problems in my view, including the concept of "attacks," however, to each his own.

My point: If we tentatively set this demonic concept aside, we are back to wondering if any of the visitors in our skies are true aliens from far distant planets circling far distant stars. Are they all from other Earth dimensions, perhaps mostly higher realms rather than lower realms?

I remember hearing nuclear physicist Stanton F-iedman talk at a M-FON Propulsion Symposium in the early 1980s; there were many people at this symposium from NA-A, which had a branch in Houston. Dr. Fri-dman steadfastly maintained that if space/time travelers go .9999 the speed of light, they can get to Earth from their planet within their probable lifetimes, or they might have generations involved in space travel so that their 2nd or 3rd generation, born in space, would reach Earth.
