Ashtar: Say "Good-bye" and "Hello" - (Marvelous Insights into - Year 2012)

Ashtar on the Road Teleconference,
December 27, 2011
T-lepath, Susan L-land

Ashtar speaks

"Well, Good evening everyone! It is so wonderful to be here with you, to be here at this particular time, as you measure it. Upon your calendars you're getting ready to open up new calendars because it's the beginning.

"So, we have here a most interesting situation - it is truly the alpha and omega - we have been saying that, those of us who are in mentorship. The beginning and the end, and the end and the beginning, because what is ending is the waiting, and what is beginning is truly the warp speed, shall we say, the anchoring upon Planet Earth of all that we have been talking about all these years, and more. Because you, yourselves, as individuals, have created your visions not only for Planet Earth, but for yourselves individually. And in some cases you are manifesting your visions, living your dreams so to speak - 'dreams come true,' and so on, and in some cases it hasn't quite come about yet, but it's there.

"You see, it's just a matter of being up in a high enough dimensionality that you can claim or, as we advise, to require what it is, and to call it forth in such a way that is so definite that there is absolutely no doubt with it. And of course when you are in that higher dimensional Joy, feeling loved and wanting to just share all of the Love that you are, that is the perfect place to be, in order to bring this about.

"But here's the thing - yes, it's the ending of all that has been, shall we say, gloomy doomy for Planet Earth for eons of time, and it's the beginning of the Golden A-e, but it is also a time for you, Beloved Ones, to end whatever programs you've been running which are not so higher-dimensional. It's not easy, we know that, but were here in greater numbers than ever before to assist you, not just as a Planet, but individually.

"So, some things that are ending Planet-wide are w-rs - say 'goodbye' to wa-, financial lack - you can say 'goodbye' to poverty and all of the situations that poverty breeds, such as hunger, illness, enslavement to jobs that are not happy, and being dependent upon others rather than feeling as though you are the master of your own creations. Those are some of the things that you can say 'goodbye' to.

"It is also that you can say 'goodbye' to such things as weather that is manipulated by those who would seek to control the world, disasters of that kind which have been triggered by some technology which, although it is from off-Planet, it is the kind of technology which has been destructive and harmful for all of Planet Earth -not just to the humans, but to all of the kingdoms of Planet Earth. That's over. Say 'goodbye to it.'
They are still trying, but you see we have your permission to intervene, and that is what makes a difference!!!

"You can say 'goodbye' to all of the toxicities and the pollutions which have been Planet-wide, below, on and above the Earth. There's nothing that is really clean about, shall we say, fracking and mining. It involves the

use of some very toxic chemicals. There is nothing that is really beneficial to human kind about chlorine in the water, it is very destructive and harmful, and you all know there is nothing whatsoever that is beneficial about GMO foods. A little hybrid here and there has been acceptable but what has happened is, GMO has weakened all who have partaken of it's lowly.

"You know, these ones who have been running these programs have always thought within their own beings that they would never have to let go, that they would never have to stand in front of the people and admit to what they have done. They thought that they could just go on endlessly. Well, the masters that control them had told them so. You can say 'goodbye' to them because a lot of them are already gone and what you have in their place are placeholders, in some cases doubles, but mostly clones and what you call the 'solid holograms.'

"If you are not familiar with solid holograms this would be a good time to look them up. In the greater sense we are all holographic anyway, but there is a specific technology which enables you to view someone, and enables them to be presented, as though they are still in a body, but they really are'nt. They're just a product of technology which has largely been used in the hands of those who want to deceive. There is another use for it of course, which is not devious, and certainly not with any ill intent - it is to entertain, but that is different.

"We are talking about 'goodbyes' here so we also want to have you say 'goodbye' to the kinds of energies that you refer to in two categories, one being fossil fuels, and the other being the n-kes the n-clear power plants. Because the truth of it is they have deliberately, not on the part of those who really believed that this was what you call cutting edge, leading edge, technology, designed to help power the world, but the ones who were giving them the assignments, perhaps, yes, who were going to build some nuk-s.

"G-neral Electric has been big on that and so they hired people who would design the nuclear plants, but the people behind the scenes at Ge-eral Electric haven't always had the greatest welfare of the people in mind, because they know that there are deficiencies, weaknesses, which at some point or other might just spill out, you know? And you are all familiar with Chernobyl and the disasters in Japan. Let us take a moment to say 'goodbye' to nuc-ear power, and let us take a moment to send Love to all the ones in Japan.

"It's finally coming out in the news, big time, that the people of Japan and the World - because this isn't just Japan's disaster - this is Worldwide, that radioactivity has been leaking into the very oceans and the oceans go everywhere in the world. There isn't a part of the world where the ocean waters don't find themselves. But you can say 'goodbye' to long-term nu-lear disaster, fall-out and toxicity because you've given us permission to come in. So you can say, Hello clean-up crew! And we've got ships absolutely blanketing the Earth and the truth of it is, it's heavy, heavy commitment to clean-up.

"We could speed it up even more, and we will, but at the moment, because we are still in what you call pre-Disclosure phase, we must leave remnants, evidence, because it is necessary for the people of the World to start getting the truth, as it is pouring out right now, not just in this, but in all areas that could be discussed. It is absolutely imperative that the people understand, that they get the truth, they understand why it is, first of all, that the ones who have created these disasters are literally being put on trial and, secondly, how serious the situation really is because then their permission to us to come in and just do clean-sweep will follow. Well, we already have it but we, ourselves, are still in a phase where evidence is needed to help everyone understand.

"Another thing to say 'goodbye' to is d-ugs. Alright, there are two categories of dr-gs legal and illegal. The legal dru-s are every bit as toxic - in fact in some cases more toxic - than the illegal -rugs. But it is, again, these ones who would run the world who have determined which classification each drug falls into. The p-isons are full of people who got caught with an illegal d-ug and the hospitals are full of people who were taking the legal dr-gs and are now more sick than ever. That's an awful lot of people who are not able to live full, happy and joyful lives. That's all going to stop. So you can say 'goodbye' to that and you can say 'hello' to true

healing - higher-dimensional healing - again.

"Frequency! Yes, there are herbs and other kinds of healing ingredients or components, and yes, you can call them dr-gs if you want to, that have value, that can accompany or, shall we say, be energized by certain frequencies of light, color or sound. It's all frequency, you know. There are certain sounds, for instance, that you can play if you are wanting to do some kind of a h-aling -certain sounds, certain music. We shall hear two of them today, they are very high vibration, and you can play those and receive inspiration.*

"Let us say that you want to write a letter to someone with whom you have had some kind of a falling out, a disagreement or a disharmony, and you simply want to move the relationship into a resolution phase, no matter what form it takes, and so you understand Forgiveness - lack of judgment, you understand Compassion and Love. Sometimes just simply playing high dimensional, high vibrational music in the background can create that high vibe state of being within yourself, such that you can accomplish what it is that you want to express in a way that reaches the other one in high-dimensional vibration, and so both of you are happy and at peace over something that may have been not so peaceful between you.

Part 1.
