My name is Monica and I am 33 years old. I was born at Holloman Air force Base in New Mexico. I grew up very shy and always feeling different from everyone else. This became especially true in my 20s when I started seeing incredible UFOs in the sky. During this same decade, I had to undergo a complete hysterectomy because of mysterious cysts and massive amounts of scar tissue; even my ovaries were twisted together. After these life changing events and anomalous occurrences, I came to the conclusion that I was an abductee. Some of the anomalous events in my life include abduction related phenomena such as seeing patterns in my dreams, and unaccounted for on my body, including the type of bruise that has a circle inside of it. I also suffer from nosebleeds and have experienced periods of unaccounted for or missing time.

During my encounters I have been shown and have met several hybrid children that I'm told are mine or I somehow know are mine. I have had visits with them in playroom type areas and have also found myself in teaching situations in school like settings. I have seen Greys as well, but I don't remember their faces very well. I am sometimes left with a weird screen memory or only remember their eyes. I have also seen Beings that appear Asian looking, but are somehow different, and I have seen Reptilian looking Beings at least two times that I can recall.

I participated in the group effort of sharing encounter experiences through art by having some of my artwork and one of my encounters published in Kim Carlsberg's book
<http://www.facebook.com/pages/The-Art-Of-Close-Encounters/254882858789>

The Art of Close Encounters. Even though I have had a hysterectomy, I still struggle with being taken, although most of the time I perform duties such as calming other abductees and helping sick hybrid children. There are overtones of MILAB type encounters mixed in with my alien abduction encounters. I feel this may have

something to do with my family history and having been

born at Holloman Air Force Base in New Mexico.
Recently I received a very unusual phone message on my
cell phone that I uploaded to a YouTube video. I am including
a link in this article because it sounds very strange, as if it
was a message that had been sped up somehow. I would
like to find out if there is anyone who can analyze it for me
in order to determine what the message says. Strangely,
when I tried to call the number back, it came in as my own
number. For anyone interested, that message can be listened
to.

The Way We Treat One Another How abductees treat one
another is important to me. After all we have been through,
it's important for us to be supportive of one another. It was
difficult having to undergo a complete hysterectomy at a
relatively young age. I have also lost connections with
friends and family members because of my unusual life
experiences. After all I've been through, it is a slap in the
face when I come across people making things up for
attention as well as UFO enthusiasts who are completely
out of their gourd with weirdness. These two things make
me really cringe.

I tell my experiences just as they are. I don't add theories,
religious overtones or try to get any sort of attention from
them. I have actually had people, including other abductees,
get mad at me because my experiences did not line up with
their theories. I have had re-religious people tell me the aliens
are demons and to rebuke them in the name of Yahweh. Not
only can we humans not get along with ourselves, we cannot
communicate with or respect the animals we share our
planet with.

I personally wonder why these Beings bother with us at all.

Questions and Concerns

I find difficult to understand is the many ways people find to
separate themselves from each other, when we all truly should
be ONE. It starts out seemingly harmless with countries,
States, and cities. Then it comes down to property and more
personal issues. I don't understand why our planet has to be
divided up with every single inch of it being owned by
somebody. We are even divided up by race and last names.
The worst two things that divide people and are the likely
cause of our worldwide problems are religion and politics. I
refuse to get involved with either one.

There was, however, one encounter when the ETs gave me
a religious message. It got me thinking about how primitive
and violent humans are, especially when it comes to anybody
thinking outside the box. I was shown a hologram behind
glass. In it, one of the Greys was putting a hybrid fetus inside
the Virgin Mary. During a different encounter, one of the
Beings told me things about "alien martyrs." Does this mean
that Jesus was an alien-human hybrid? I don't know.

One thing it did make me think about is how any time someone
is born who tries to break the mold and think outside the box,
they are either murdered or silenced in some way or another. A
few examples that come to mind are Joan of Arc (and countless
other women who were burned at the stake), Martin Luther King,
John Lennon, John F. Kennedy, and many others.

In the 1960s, there was an entire generation of people who were
born thinking outside the box. The word "hippie" itself means
"one who is aware," and expanded awareness was one of the
goals of the entire movement.
Besides influencing health, food, fashion, art, music,
environmentalism (especially nuclear) and lifestyles; they tried
to change the world in politics and civil rights through peaceful
demonstrations. Quoting Carlos Santana:

"The 60's were a leap in human consciousness. Mahatma Gandhi,
Malcolm X, Martin Luther King, Che Guevara, Mother Teresa -
they led a revolution of conscience. The Beatles, The Doors,
Jimi Hendrix - created revolution and evolution themes. The
music was like Dal, with many colors and revolutionary ways.
The youth of today must go there to find themselves."

Something has gone tragically wrong since then.

It seems to me as though everyone walks around like zombies.
Everywhere I go nobody seems happy or creative, and people

act mean and rude to each other. Nobody takes the time to get to know their own neighbors anymore as it was just a generation ago.

There is not a sense of community anymore either. I am in disbelief during breaks in the break room at school or work with nobody talking or even looking at anyone else. Everyone prefers texting or talking on a cell phone rather than looking at the person standing in the same room with them. Again I ask: How and why do these Beings bother with humans at all?

It seems obvious what has happened to the political activist free thinkers of the time if you look at the big picture: They were silenced by government. Nothing says this more loudly and clearly than the day of October 21, 1967 when http://en.wikipedia.org/wiki/The_Pentagon#Protests protesters marched on the Pentagon, and were quickly surrounded by Federal troops. Actor George Harris put flowers in the barrels of the soldiers' guns and this has become a familiar image of the 1960s anti-war movement. Three years later we are still putting flowers in National Guardsmen's guns - except then, the peaceful demonstrators were gunned down by the National Guard.

In 1969 in Berkeley, California, people gathered to participate in the planting of flowers, shrubs, grass and trees during the building of http://en.wikipedia.org/wiki/People's_Park People's Park.

After authorities destroyed People's Park and installed an 8 foot tall chain-link wire fence around its perimeter, planting flowers became a symbol of peaceful resistance.

It seems as if, once again, the government has won. Nobody really cares anymore and most people seem docile and ignorant.

(JW I believe that you will find I, my friends and the good space people care very much.)
