Here she explains some more of her experiences of being abducted.

I wonder sometimes if any of this correlates with the timeframe of the [http://en.wikipedia.org/wiki/Water fluoridation in the United Statesfluoridation](http://en.wikipedia.org/wiki/Water_fluoridation_in_the_United_Statesfluoridation) of our water.

Fluoride destroys the pineal gland among other negative side effects. And, last but not least is the go-ernment's ongoing attempts to keep us in the dark about extraterrestrials and space in general. Just in the past year they have pulled the switch on SETI and the Space Shuttle Program. Now, what little the public used to be informed about has ended. None of this makes any sense to me.

I remember back in the 1980s when everybody was excited about "ET" and we thought for sure by 2011 we would be caught up or at least approaching Star Trek technology; but what we got was nothing. We went nowhere. Nothing, despite the fact that thousands of people have seen or photographed UFOs or have gone public with their experiences. Instead of getting the Disclosure we badly need and deserve, our govern-ent is closing up the shop entirely. Either that, or they are taking it to one of their underground or "space based" facilities.

It is my feeling that unless some kind of major rev-lution happens, contact and Disclosure is up to us as individuals: Meditate, put down your phone and other electronic toys, and stay in tune with your brothers, sisters, friends, neighbors, and especially, nature.

(JW In the past I posted some information said to be from St. Germain. He stated that he appeared in the room with the people signing the Declaration of Independence and his picture can be seen on the two dollar bill and he was the only person in the picture wearing a hat. I looked up the two dollar bill on goggle.com and he can be seen in the last row, the only person wearing a hat.)
