Subject: Why Do We Have Chemtrails. Part 3 of 3. Jan. 19, 2012.

This says we should follow the money to find out about chemtrails.

.....
.....

Is this why chemtrails are being sprayed? I don't know. No smoking gun that I know of has been produced yet. I would love to catch David K-ith or Ken C-ldeira playing weather derivatives!

I know some things, though. One is that if you follow the money, you will find the root of all e-il; therefore nothing ev-l happens without money.

What other way could financial gain be achieved by spraying chemtrails? I can't think of another. There doesn't seem to be one. And, yes, I am aware of Intrade.com and The Climate Exchange.

Maybe all chemtrail spraying operations are financed exclusively by central ba-ks and/or black-ops m-litary budgets as I previously speculated. Then, to their S-tanic Wall Street friends, intel-igence agencies hand out information about upcoming spray activities like candy. What would an int-lligence agency get in return for handing out information worth tens and hundreds of thousands and millions and billions of dollars? I don't know. It would probably be very dark.

Is a draught being manufactured right now in California? We haven't had any significant rainfall this season yet.

Whatever the case, we must get to the bottom of chemtrails in order to put a stop to them. The only way to do that is to fully understand them. Out of the what, where, when, why and how, the only hereto largely unknown is why. If the reason chemtrails are sprayed is to manipulate weather related financial markets, then I hope I have done what is necessary to expose it.

Unless you know something I don't, don't contact the Commodity Futures T-ading Commission (CFTC). Gary Ge-sler and the CFTC are too busy covering for Jon 'the Don' Corzine after he s-ole billions of dollars from his customers' segregated accounts. The CFTC is obviously corrupt and it's probably not their area of expertise anyway. I recommend contacting the General Acc-unting Office (GAO). I will be. Maybe you might want to contact the Secur-ties and Exchange Commission. I may.

The GAO does some good work. Last year (2011) they released the first ever audit of the U-ited States F-deral Reserve Ba-k. The former head of the GAO David W-lker was the subject of the wonderful 2008 documentary 'I.O.U.S.A.'. David Wa-ker has been preaching economic gospel for a long time. The GAO also made a 2003 congressional report about the evol-tion of the catastrophe reinsurance market. Working with people who want to work with you is much more productive than fighting with people who will never work with you. Thank you.
