Subject: Wanna Take A Ride?

Jan. 31, 2012.

It may seem like a joke but this space person is offering to take 20 or more people aboard his mothership and explore the skies and then bring them back.

.....
.....

Very important message...please read. More than 20 can go on this fabulous trip per Steve's follow-up letter.

Ja-is

Transcript of an Hour with an A-gel, Jan. 30, 2012, with Grener

Ellen has outdone herself in getting this transcript to us within mere hours of the recording.

In the transcript Grener discusses his willingness to take a group of around 20 terrestrials on board his mothership, the Neptune, this Saturday for a ten-day voyage to the stars - and back!

If it doesn't happen, you can send my mail to the Himalayas. If it does, then we shall disclose. The g-vernments of the world have had their chance and now it's our turn to push the matter forward.

An Hour with an An-el, January 30, 2012, with Grener of Ashira, P-esident of the Intergalactic Council.

Graham D-wyea: Hello, and welcome to An Hour with an An-el, a weekly radio program with Linda D-llon, the c-annel for the Council of Love, and Steve B-ckow, editor of the 2012 Scenario, who will be asking questions. Tonight we have special guest Grener of Ashira, from Neptune, the Pr-sident of the Intergalactic Council. So with that, I'll pass it on to you,
Steve.

SB: Thank you very much, Graham, and good evening, Grener.

Grener: Good evening, and thank you for this surprising and delightful invitation to speak to the people of the world.

SB: Thank you for coming. And, sir, how do I address you? Because you are the President of the Intergalactic Council, and it seems a little strange for me to be addressing you as Grener. How do I address you, please?

G: I would like it if you would call me Grener.

SB: All right.

G: Yes, I am Pr-sident of the Intergalactic Council, and that is my honor and title for the time being. But we know that these things come and go. But I will always be Grener. Prior to being Pre-ident of this Intergalactic Council, I was Commander in Chief of the U-ified Forces of the Outer Galaxies, what you think of as star fleets. And still people called me Grener. So I would be honored if you would do so, too.

SB: All right, sir. And you're from Neptune, but Neptune in our dimension does not seem to be able to support life, as far as I'm aware. What dimension are you speaking to us from?

G: I am speaking to you - let me say, I am meeting you in the fifth dimension and the seventh dimension. I am from the eleventh and twelfth dimensions. Now, long ago, long, long ago, there was a form of life on Neptune, and it has been one of my favorite places forever. But it is also a reference to the name of my ship, the ship on which I reside and have resided for a very long time, and

that is called the Neptune.

Often you will have us, many of us, as you come to know your star brothers and sisters and different members of the Council of the Intergalactic way, you will know that we are called by the title of our ship, because it has been home. So, yes, we can travel inter-dimensionally. That is not a problem. And that's exactly what we have done, actually, to travel to Earth. So here we are.

SB: Well, thank you, sir. Am I correct in assuming that you've asked to address our listeners this evening, that you have something that you wish to discuss with them?

G: I want them to begin to more consciously understand what is transpiring in the bigger picture. And, yes, I have a message for your listeners. Would it be agreeable to you if we were to begin with a little explanation of the Intergalactic Council? Because I do not think that this is something that all of your listeners and readers are familiar with.

SB: Please do, sir.

G: I do so because there are many parallels to this situation that is now occurring on Earth. Tens of thousands of years ago, many of you remember the intergalactic wars. And if you do not remember, then that is a gift, for it is nothing to really be fondly remembered.

It was a time of great devastation, of destruction, a time when many of the situations and paradigms that became so prevalent upon your planet of Earth, of Gaia, were rife throughout many universes. The war took its toll. And many planets, and of course everything upon them, were destroyed. And there was much mayhem and hatred, intolerance. And what probably you would think of as genocide took place.

And so the first Intergalactic Council was formed. And I would add that that is the form upon which your United Nations, and even your earlier League of Nations, was modeled after. For this is not a new concept, you know. For a long time, I would say thousands of years, the wounds of war took a long time to heal. But the fighting stopped, and the murdering stopped. The bloodshed stopped. And so what took place was the building of tolerance and understanding among people of different galaxies - of different universes in some cases.

And then, what started out as mere tolerance became appreciation, inter-cultural appreciation. We developed ways in which to resolve differences and to appreciate diversities without having to resort to violence. That was the primary purpose, in what we call the early years, it was that war and violence against one another would cease.

But it grew and it flourished. And yes, for this we have a great deal to thank our beloved Archangel Michael, for he was pivotal in assisting us with much of this undertaking.

[Pause to close door to exclude noises.]

I do not think that dog is from Sirius. [Sirius means the "dog star."]

What happened with our Intergalactic Council is that it became a form of mutuality, of understanding, of cooperation, of trade, of commerce, of science, of medicine, of healing. And we came to honor and respect our differences. We grew, just the same way that everybody upon the Earth is growing and changing.

Now, thirteen of your years ago, Earth was invited to take their place at the table, to take their place in full membership with the Intergalactic Council. And it marked the coming of age for Earth. And at that time what transpired is we sought amongst what you would think of as political leaders.

Announcements were given, invitations were issued. But those who accepted the invitation, and the primary being who sits at this table with us, as the representative of Earth

and as head of your delegation, is Wakanataka [Wakan Tanka? Note: Wakan Tanka is Lakhota for the Great Spirit or Great Mystery].

And he is a very ancient being - and notice that I do not say ?spirit for he is the being that has tended those who have tended the council fire of Gaia.

And during that time of the initiation and the welcoming of your planet to this Intergalactic Council, there was also a shift of who tends this council fire of Gaia, for always it had been ancient Earth beings. Now that is not so, for some of them have joined with us, and some of our star beings - your star brothers and sisters - now tend and watch over that life flame, that council fire, the heart of Gaia. So there was a great deal of transition that took place.

Now, we do not want to give the impression that this was all done on a spiritual level. Membership in this Council has come to be seen and accepted as an honor, but also as a very real responsibility.

There were not political - what you could think of as political - leaders of that day that were prepared to step forward, to announce the membership, what you would think of as Disclosure, and to truly join in the fullness of membership in the Council, which would have meant - and will mean, by the way - the fullness of sharing, of trade, of commerce.

Now, the fleets that hover above your planet - and there are many - they are related to us, because all of these beings, all of these cultures, all of these planets, all of these galaxies have representatives upon the Council.

But we do not control them or seek to control the various fleets. But the rule of cooperation throughout all of the Intergalactic Council territory, as it were, is one of peace, one of cooperation, of non-aggression, of non-violence - and of love. These are our guiding principles, and these are principles that we have learned over thousands of years to put into very practical application.

Now, you are present at the table. My brothers and sisters of Earth, you are present at this table. And there has never been truly an official welcome.

So that is the first thing I would like to do tonight, is to welcome each and every one of you. Yes, you are citizens of Earth, you are children of Gaia, but you are also our brothers and sisters of love. And we have positioned ourselves close to you to participate, to help, to assist - no, not as foreign aid, but as equals. As equals.

Part 1.
