SaLuSa 24-February-2012

You hunger for the truth as you come to realize that for eons of time it has been kept from you, and that much you view as your history has been fabricated to suit the aims of those involved. Perhaps the most important omission is evidence of our visitations to Earth, and the contacts we have made.

However, through archaeology for those who eyes to see, there is evidence going back thousands of years. Some of it is undeniable, even to the point of showing that craft were in your skies long before you took to the air. If it had already been accepted that we were constant visitors to your Earth, and had meaningful contacts when we imparted knowledge to you, it would have been so much easier to make Disclosure. In fact, in some ways it might not have even been necessary to do it at all, as our link to you would have been understood, and our visits would have already been openly taking place.

So it is now left to our Allies to create such pressure on your G-vernment, that they will ultimately have to give in to your request for the truth to be acknowledged where we are concerned. Both your Go-ernment and Mi-itary are well aware that in one way or another, our presence will soon be made known if only because we are in conflict with those who refuse to make peace, and instead create w-r. It can commence as soon as the media decide to allow the truth to be put into print, and that outright lies and false information are rejected. There are some moves towards such changes but it is not fast enough for us, so strong pressure will be applied until the breakthrough occurs. We along with you have waited patiently for a long time to see the dark Ones move aside and allow the New A-e to begin. The Galactic Federation will consider direct action if the impasse remains much longer. They know that we have already done where their underground bases are concerned, and that we mean business when we decide to act. Furthermore, they do not have the means to thwart our plans any longer, as the Light is formidable when used for the good of all.

Like you, we want to see quick progress and not continual delays, and we intend to make sure things begin to happen that everyone will be aware of. There is much in progress and it is creating openings for our allies, and we are encouraging them to step in and take them. Be assured that results are going to come to your notice, and it will be the time when you will absolutely know the countdown to Ascension has started. That you have a date for the completion of this cycle is wonderful, as it means you have something to set your sights upon as you count the days that remain. The people that front the freedom movements that press for release from the old ways of d-ctatorship, are really the pioneers that have set the scene for even greater achievements. All changes have to commence somewhere and sometime, and from small beginnings the Light shall take over from the dark and deliver the promises made to you.

Sit tight yet not in tension as all is well and you will find

that all of a sudden a whole series of events will take place, clearly showing you that your expectations are being fulfilled. We protect you and Mother Earth and have done so for millennia of time, and shall continue to do so. It will be more obvious when we can finally meet with you openly, and when we can it should be a most enjoyable change of direction for you. To know that you are finally safe from the attentions of the last c-bal will bring a rush of joy and excitement, and a great time acting out the final plan for your Ascension. For some time now whether or not you have personally realized it, your consciousness levels have grown and that process is speeding up until you acquire full consciousness. It is another area of development that we shall help you with as s-on as it is possible.

When you think of what is planned for you, we hope it lifts up your hearts and you spread the feeling of happiness it should bring you. Naturally those s-uls that have remained with closed eyes and ears where Ascension is concerned, will be the ones confused and even frightened of the changes for which they have not made preparations. They deserve the same attention and help as anyone else, so that they may also leave duality on Earth in the knowledge of where their future lies. This experience will achieve much in time, as it will remain in their subconscious memory until it can serve them again. They certainly will not have to start at the bottom of the ladder again. Like any other so-1 they will progress because it is impossible to stand still, as even if it is not perceptible, everything is in state of change and is the one constant in the Universe.

In the future you will have much more knowledge and understanding of the Universal Laws, and with full consciousness you will have no problem in adhering to them. It can all be summed up by living from a point of Unconditional Love, and although a great challenge in your present circumstances it will become easier as you ascend. Dear Ones try to live to your highest understanding of what it is to be an ascended being, and you will soon find out how far you have progressed. Bear in mind that All Is One and that should help you overcome most difficulties you are likely to encounter. We say that because many of you have been brought up to think of people, in little boxes that have labels on them rather than see one complete Human Family. You are not expected to reach perfection now, indeed that would be extremely difficult until you reach a much higher level of consciousness.

For those of you who like to keep abreast of what the different sources are reporting, you might have noticed that there is slowly a convergence of information taking place. That is a sure sign that the time lines are beginning to come together, but you will still find some that are more extreme than others. Those who uphold r-ligious beliefs tend to be on their own, as they feel bound by the apocalyptic prophesies of their ancient teachings. Many are no longer applicable as they were given at a time when they seemed possible, but events since have changed the outcome. This year will sorely test their beliefs, but obviously like anyone else they have a future of their own creation.

I am SaLuSa from Sirius, and give you my Love to help you on your way.

Thank you SaLuSa.

Mike Qu-nsey.

.....

(JW Here are some things that have been happening around me lately.)

Two days ago I was sitting in a chair next to another

person who said, "Did you see that?". I then replied, "Did I see what?". The person said, a cat had just run up the stairs and ran back down so fast that it was just a blurr, and it ran under that chair and hasn't come out. I thought it might be sort of the the Back Panther situation and the person said, "No, it wasn't a panther it was a kitty cat and our two cats are here asleep." I would guess we are going into another constillation.

The next thing was that yesterday morning I heard a voice say, "38 or 7:38" to wake me up. I got up and found that was indeed 7:38 AM.

Strange things are a happening.
