Subject: Bio. Of Billie Kaye Woodward. Part 3.  
2012.

Mar. 18,

This shows how Billie was kept from taking an airplane into the Inner Earth.

.....  
.....

Billie agrees completely with the Olaf Jansen story, who were Norwegian fishermen that sailed through the North Polar Opening north east of Franz Josef Land, in 1829 -- that the hollow earth is exactly as Olaf described in his book,

<http://www.ourhollowearth.com/SmokyGod.htm>

The Smoky G-d because Billie has been there and seen what it is like.

At Eden, Billie was taken before the King of the World, who is also the Great High Priest Over All the Land, to a beautiful pyramid type palace where the King sat on his great marble throne. Billie accompanied by Air Force Colonel M-Cloud, (and on another subsequent visit with a Colonel S-evenson) were interviewed by the King of the Inner World and asked many questions regarding our outer world, our g-vernment and the U-ited States m-litary and what they were up to. Upon returning to Area 51, Billie was completed debriefed and minutely documented all that was learned in Our Hollow Earth.

Billie recounted a time during the mi-itary years when he was ordered to fly a US mil-tary saucer at Area 51, known as the Sports Craft, the same craft Bob L-zar saw at Area 51.

An alien co-pilot instructed Billie on how to fly the craft and accompanied Billie on test flights taken out at night. Billie had been told when assigned to Area 51, that he would not see the light of day while serving there. They flew up over Las Vegas, and other cities and played tag with milit-ry jets that were scrabbled to chase their flying saucer and they were able to fly circles around the jets. Billie said the craft was flown by placing the hands on indentations on the control panel that were shaped like hands. Immediately upon placing the hands, Billie had complete control of the craft with just thought commands. If Billie wanted to go in any direction, he just had to think to go in that direction and the craft responded immediately. The craft could make right angle turns at very high speeds, and fly any pattern -- all with no g-force effects. This craft was of our making under the direction of the extraterrestrial, which our milit-ry has been building for some time. Billie said they had about 67 saucers built by our militar- b-ack projects housed at that time at Area 51.

Billie also recounted how the many missing children that have been displaced (as seen on milk cartons) every year throughout the Un-ted States are taken to Area 51 where the m-litary bl-ck projects are transforming them into programmed biological entities so that they look like hybrid aliens. Their plan is to use the flying saucers they are building and the hybrid entities they are genetically engineering from our children to stage an alien i-vasion from space to get the whole world to submit to a one world gov-rnment in defense of the aliens that they have created. When shown this, Billie became so disgusted with the milit-ry bla-k projects that he decided not to have anything more to do with this project, and decided to get out of the mi-itary.

After Billie's military career was over, Billie was discharged from the Air F-rce at the S-wart Air Fo-ce base, now Smyrna Airport, Tennessee, debriefed at their deprogramming underground facility, and upon orders of superiors, Billie's m-litary files were sealed with NO access by ANYONE. Billie has tried many times to get a record of his mil-tary service, but is told those records are sealed, that no-one can see them. Billie was told by mi-itary superiors not to speak or talk to anyone of any assignments in the mil-tary.

However, Billie told them, "I no longer work for you so I will do as I please." For that, Billie's mili-ary pension was withdrawn and today lives in Pahump, Nevada on Social Security disability.

Over the years Billie married and fathered three children who are now grown. The first two children were boys born to the first wife, an Army mi-itary pol-cewoman, stationed at Area 51. They were 5 years together. Later that wife went to work for the F-I and so was able to verify Billie's mi-itary records. Billie has been married three times, but is now divorced. The second wife Billie married after being discharged from the mili-ary. She was a Cherokee Indian, daughter of the Chief and they were married on the Cherokee Reservation. Billie had a daughter by this wife. The last marriage was in Seattle to a UFO M-FON investigator and lasted from 1990-1996.

In August 1986, Billie went to live in Alaska looking for a way to go to the hollow earth to go back home. There, Billie enticed several people in an attempt to reach the hollow earth by hiring a bush pilot to fly as an expedition team through the north polar opening. Billie arranged through a flight service out of F-irbanks, Alaska to take them in their decommissioned N-vy Albatross seaplane, which is a twin engine seaplane with a boat bottom. It was the same type of seaplane that the Coast Guard uses frequently today -- as seen on the Fantasy Island TV program. Billie requested the pilot to take them to certain coordinates in the Arctic to 87.7 N Lat., 142.2 E Lon that Billie had learned from Ad-iral By-d's file at Area 51.

The pilot was concerned about how they would land out there on the ice, but Billie assured him that there would be open Arctic Ocean when they got to those coordinates. The pilot agreed to fly them to those coordinates, land them on the water and drop them off, and that he would be back for them at a certain time in the future three weeks hence. They took some inflatable power boats that they would use to continue their journey from that point on through the polar opening.

Unfortunately, before they took off from Point Barrow, Alaska, one of the expedition members who was a New Y-rk Times correspondent, made a phone call to his home office who Billy believes then alerted the mili-ary of their flight north.

When they arrived near enough to the polar opening and could see the light beams of the inner sun shining up from the ocean ahead, the pilot was surprised and very afraid and wondered what was going on since they could see the outer sun shining behind them also. Billie assured him that there was nothing to f-ar, that they were looking at the core of the earth shining out through a polar opening in the earth. But before they could drop down to land in the water and depart in their inflatable boats, they were intercepted by two jet fighters from the A-ert Air Fo-ce Base, on the northern shore of E-lesmere Island, Canada.

The airplane radio crackled and a voice came through, which stated, "This is Lt. Colonel T-avis of the US Air For-e Alert Base intercepting team ordering you to turn your aircraft around IMMEDIATELY and be escorted back to Ei-lson Air For-e Base, Alaska, OR YOU WILL BE TERMINATED! You have 5 minutes to comply."

Reluctantly, they started to make their turn around. At the same time, looking through the front view of the aircraft, they suddenly saw three glowing disks appear -- flying saucers -- ahead of them.

The radio crackled again, and another voice came over the radio saying, "Billie, we are here to welcome you to our domain, as you have attempted to enter. We are sorry. You will not make it this time. However, your next journey WILL succeed! Auf W-edersehen!"

And then the three flying saucers suddenly just blinked out.

Rather than disobey orders and get terminated, they decided to turn the aircraft around and do as the US Air fo-ce pilot suggested. They retraced their path back to Alaska, where they were instructed to land at Eiel-on Air F-rce Base, just southeast of F-irbanks, Alaska. There they were put under bright lights and interrogated and drilled by several agents

of the FB- and the National S-curity Agency. They wanted to make sure they were not t-rrorists or affiliated with any foreign gov-rnment. But after they realized they were harmless, they were released and given a stern warning not to tell anyone of what they saw on this trip, and if they were to try that trip again there would be no warning the next time and they would be terminated.

Billie says that many, if not most people in Alaska, have gone there with the hopes of going to Our Hollow Earth.
