Subject: More Villa Photo's & Paul Bennewitz Dulce Base UFO Photo
Date: Mon, 19 Mar 2012

<http://home.earthlink.net/~dexxxaa/ uimages/PaulVillasPhotoIV.jpg>

This photo shows a small silver disc, thought to be a probe, approximately 15 inches in diameter, and showing tri-pod like landing gear.

The orbs have the ability to go anywhere, even through buildings if necessary to photograph & record. I was told the orbs (more than one) visited the P-ntagon quite frequently in those days. And in another former photo we could see several small orbs around the probe. For Villa's benefit, they showed him the orbs could revolve around the probe at an astonishing speed until they vanished from sight. Then they slowed down and reappeared, and re-entered this small remote controlled probe from which they emerged. It was said that these probes could be controlled from thousands of miles out in space. Hmmm, could they be used for making crop circles? The video clip inset below looks like they do.

No More S-crets.

<http://home.earthlink.net/~dexxxaa/ uimages/MVC-016S.JPG>

From what I can remember, this UFO was photographed flying over an unknown Canadian facility in the early 50's. It looks to me like a foo fighter pilots used to talk about seeing during their missions in World W-r II.

.....
.....

I met Chuck H-nd in the early 80's, outside of Sonora, California. He had quite a few UFO stories to tell, base constructions, bigfoot residing in near by mountains where he lived and small red light probes, as he called them. He thought that if anyone were to approach these construction sites the ET's would be alerted by these small probes. This assumption was based on his observations of them. Bigfoot was seen and encountered by people in several of these area's and so on and etc..

One of these stories was about his photo (photo inset above) and how he thought it might have been arranged by these ET's for the taking. He told me he was driving late one night heading towards Confidence near Sonora, Ca. where he was living at the time. He said he was in a clearing and approaching tall pines up ahead near a turn in the road and suddenly he heard in his mind something like broken English speaking to him.

Next a bluish, disc, UFO swings into view from around the tall pines and flew right up to the front of his car while he was still driving. He immediately thought to grab his Polaroid camera that was situated next to him on the front seat of his 1968 Mercury. He said as he attempted to lift the camera up with his right hand, the strap got caught on the floor shift, so he tried pulling harder to untangle it and he said the camera twirled up upside down and snap, it took a picture.

The picture shows the flash of the camera on the front wind shield and the yellow he said was the dashboard. He said as you can see it looks like they posed for the shot. And what he didn't see at the time when the picture was taken was that there was a second UFO in the photo. He said that the second ship must have been right behind the first one. As you can see in the photo, it's rim is different from the first one. For an unknown reason, He said it felt it was intentionally taken this way and

that it was a personal gift to him..because after the snap shot was taken he said he then quickly pulled over and got out of the car to see if he could get more pictures. Well, he then saw that there were more of them, three more of them UFO's to be exact and so snap, snap, snap, more clicking away with the camera. The camera was aimed directly at the ships as they, in his words, flew playfully and slowly and silently away, just skimming the tree tops. Bobbing up and down until they were out of sight. Well, not one of those other pictures he took showed anything on them. A night he said he'll never forget. Oh yes, he did have problems with strange characters when thought of showing his photo proofs. They? warned him off from doing that. Maybe the attitudes have changed since those days. We do have a treaty not entirely understood with aliens and our G-vernments. Chuck said I could show his photo to anyone I wanted too... So, Enjoy. Maybe, if he sees it on the Internet he'll get in touch with me again and with any luck could share more of those enjoyable adventures he might have had over the years with the UFOonauts from other worlds.

The picture above is a video showing an example how "Alien Technology" have been witnessed making "crop circles."

Paul Bennewitz Dulce Base UFO Photo

This is Paul's photo of the Dulce base UFO. Upon his arrival near the base he said that he mentally communicated a count to the aliens as to when he would snap shoot his camera, a 500 speed Haselblad.

It worked. He said the ship jumped into the picture on the count.

However, he didn't actually see this ship himself. He says their ships are very fast. He explained the hat shaped ship shows power thrusting and bow-wave emanation? He said his experience while flying in his small aircraft near these ships was a little scary because of the great turbulence these bow-waves emanate and are strong enough to down a rather sizable aircraft if one approaches them too closely. The cliff sides have forty foot wide openings for craft access to the base inside. Sometimes these entrances are opened and sometimes their closed. I've seen the close up photo's showing the entrances opened and closed. It appeared they used boulders for closing them up. Paul believed the aliens were using some kind of hydraulic system from inside the base.

I've also seen Paul's other photo's showing very clearly a ship sitting still on top of Archeletta Mesa with humanoid figures wearing what looked like astronaut suits standing outside and on top of their craft. Also from the same spot where he took the picture of the ship he took another picture closer to ground level, and it showed very clearly in between two trees, a huge, bigfoot like creature, a dark large humanoid being with one arm raised in the air like if it were waving to Paul. He said that he didn't see him either.

The invisible's? But there it was it the camera shot. The s-curity sentry is very detailed in that area and cannot be approached without being detected. I wouldn't ever try. It is far too dangerous to venture into. Paul was invited. There's more I learned and experienced with Paul that I'm sure the public and researchers are unaware of to this day even though it is twenty years later. It would explain his mental and physical exhaustion breakdown. Something much to the alien's desire.

Se-rets. Paul is a guy who cares very much for people, easy to like and very intelligent(200 IQ). I wish him well where ever he may be?

KLAATU'S FAREWELL MESSAGE TO THE PEOPLE OF EARTH

[NOTE: From the inspired 1951 science fiction classic "The Day the Earth Stood Still."

Directed by Robert Wise. Starring Michael Rennie (as Klaatu), Patricia Neal, Hugh Marlowe, Sam Jaffe, Billy Gray and Gort, the robot.] *** "I am leaving soon, and you will forgive me if I speak bluntly. There must be se-urity for all, or no one is secure. *** Now this does not mean giving up any freedom, except the freedom to act irresponsibly. Your ancestors knew this when they made laws to govern themselves, and hired p-licemen to enforce them. We of the other planets have long accepted this principle. We have an organization for the mutual protection of all planets, and for the complete

elimination of aggression. The test of any such higher authority, is of course the po-ice force that supports it. ***

For our polic-men, we created a r-ce of robots. Their function is to patrol the planets in spaceships like this one, and preserve the peace. In matters of aggression, we have given them absolute power over us. This power cannot be revoked. At the first sign of violence they act automatically against the aggressor. The penalty for provoking their action is too terrible to risk. The ONLY result is, we live in peace, without arms or a-mies, secure in the knowledge that we are FREE from aggression and wa-, free to pursue more profitable enterprises. *** Now we do not pretend to have achieved perfection, but we DO have a system, and it works. I came here to give you these facts. It is no concern of ours how you run your own planet. But if you threaten to extend your violence, this Earth of yours will be reduced to a burned out cinder. Your choice is simple: Join us and live in peace, or pursue your present course and face obliteration. We shall be waiting for your answer. The decision rests with you."
