Fleets of UFOs in the Philippines.

I don't care whether people here believe me or not. You can debunk this to high h-avens all day and all night and that's okay with me. I am just posting this here because I believe it may be relevant for others to know.

Since yesterday, there has been an enormous amount of UFO activity here. Yesterday morning, in broad daylight, my mother saw what she described as a translucent oblong with four legs. Each leg had black "balls" at the tips that shone in the sun. This thing was ROLLING across the sky.

Now today I will have to say really freaked me out. I have never seen as many UFOs in broad daylight in my entire life. First this morning was a w-ite saucer-shaped thing that suddenly appeared, moved left, then right, then disappeared. Next was a very shiny metallic disk that also appeared and disappeared IN THE SAME SPOT OF SKY as the wh-te disk.

ALL DAY TODAY my mother and I have also been seeing single disks moving in the sky, mostly from east to west. This afternoon, we saw TWO FLEETS of whit- disks that suddenly appeared in the sky and also moved from east to west, AGAINST THE WIND. Each fleet consisted of about 10 to 14 disks. The first fleet was moving in formation, first in groups of threes in straight lines, then moving into triangles.

Again, I expect the debunkers and disbelievers and skeptics to debunk this so go ahead and have a field day. Knock yourselves out. I don't have pictures since I don't own a digital camera, and I am sure whatever videos I post will be debunked. If blurry, it will be a "bird" or "bat." If clear, it will be CGI, so what's the point?

Anyway, I am still shaking. I would break down in tears each time a fleet passed by. I don't know what is happening. What is going on? (JW I believe you will find that the space people are stepping up the number of sightings of their ships. They are attempting to make the people see so many alien space crafts that our go-ernments will have to admit they exist and force them to have foreclosure.) Something has to be up. Does this have to do with the North Korea launch? (JW I don't think it has much to do with that launch but they will probably be monitoring that very closely.) Something is definitely going on.
