Subject: Disclosure.
April 25, 2012.

Here is a person who attempts to explain what disclosure is.

.....
"Viewzone Magazine offers a look at life and humanity from different angles. N-SA, aliens, extraterrestrials, UFO, Lunar orbiter, astronauts, aliens on the moon, the event, disclosure, greys, tall blond aliens, zetas."

An interesting article I want to share. I thought you would be interested in this article on

viewzone.com

about aliens and UFOs - for REAL! The link for the page is

<http://www.viewzone.com/event11.html>

By Juan von T-illion

"There things that are so serious, you can only joke about them."

Werner Heisenberg

What, When, Who & Why

Disclosure. An official statement that ... WHAT?

Well, that the Earth is being visited, er, has been visited since

... WHEN?

We don't know for sure, but actually the point is, we have been working with some of them ... WHO?

Tall whites, tall greys, small greys, reptilians ... some hyperdimensional ones ... but we have this problem ...

WHY?

Good question. We can't fake it anymore, so we are going to disclose ... WHAT?

Hey, not more than we absolutely have to.

If you are among those who think that this AlienUFO thing is a good joke and provides passing entertainment value at best, you are lucky, and not likely to read this. Because it means that you have so much catching up to do with reality that you will likely not catch it. You will cling to complete denial of AlienUFO for as long as you can, and then spontaneously go bananas. Enjoy your blissful ignorance for as long as it is possibly enjoyable.

Disclosure has been happening, and is happening, ever since before most of you were born. Not official disclosure, though. By the time that this will be officially disclosed, you will be shrugging it off. But that will be quite some time into the future.

I don't watch teevee, but if you have not heard of THE EVENT, a new NBC series, you will soon. Here is a brief comment, and the reply, to a post by Larry Lowe concerning the Disclosure leitmotiv of this new piece of tube you entertainment.

THE EVENT on NBC

<http://www.viewzone.com/event1-2.gif>

<http://www.examiner.com/ufo-in-phoenix/nbc-s-the-event-the-secreteven-the-president-does-not-know>

I tell you what would really blow everyone's mind is if you could get Barak Obama, Secretary Gates, Gen Petraeus to come on afterwards and say. "what you have seen on this series is very much real, but details have been withheld for purposes that cannot be disclosed in the best interest of not just the United States but the human race as a whole.

We chose a fictional format because it was the best way we could disclose without disclosing a reality the human race just isn't quite ready to handle emotionally, mentally and spiritually. This is the reply by Larry Levine:

It can't be that fast, Anon. We are talking about reeducating an entire society that has been well-educated and miss-informed as a matter of public policy.

"The Event" is just the first shot, although I suspect it will be a significant one.

Call it another 5-6 years at the least before you see the kind of formal disclosure with a big "D" that the advocates are so adamant about advocating. It will take that long for the reality of the issue to sink in.

So that when the actual real version of the event depicted in "The Event" happens everyone will go: "yeah, we know, so what?".

Which is the goal.

There is an overwhelming amount of credible evidence that non-human intelligences are on Earth, and have been on Earth. Some of them since before we humans showed up, or were seeded, or were created, or shipped. Some of how many species of aliens? Pick a number, any number below, say, 57. Even if you pick only 3 or 4, the resulting complexity is simply staggering.

Which ones of the aliens are trading their technology for something valuable that we have (other than Jazz)? Which ones of them think it is ethical to mess with our extremely messy human affairs? Which ones can you trust to be left alone with your chicken? And, most importantly, which aliens work together, or don't work together, with what other aliens? For humans, this is a messy scenario, and some alien species would certainly chime in here. Others might just look at us like a sheep trying to figure out wool futures.

As Charles Fort, a pioneer of alternative real knowledge research said a long time ago:

We are property.

You see that this gets impossibly complex once you pick more than one alien species being interacted with on Earth right now.

It is not chess anymore, it is 3-D super chess on steroids, and humans need not apply.

Even if you have spent a lot of time studying the most serious, credible, dedicated and informed researchers of the AlienUFO theme, you often feel that you have a long way to go. One of the first breakthroughs is when you realize that the AlienUFO is unquestionably real. You start exploring the details, the alien varieties, the sightings and the stories, the coverups, the versions, the c-annelled stuff, the woo-woo stuff, the speculations ... and, finally, the implications of it all.

They said (the Brookings study) that we could not handle the truth. But the truth is that we know that they can't handle us once the truth gets out. Us, that is, you and me, the general pop, the useless eaters, the masses, the sheeple, the taxpayers, the patriots, the good people, the children, in a word: us 99.99%. They pretend that we will have a hard time coming to terms with the reality of the alien presence, when in reality, they are toast if they actually tell the entire story as it is, unabridged, no spin, no lies, no omissions, nothing but the truth.

That would be the end of the line for them. Them, that is the 0.01% of the teeny-weeny minority of well-meaning population reductionists, or however they prefer to call themselves, those who are privvy to the big picture.

So. If I were you, I would not expect:

- 1) official disclosure of the alien presence, and
- 2) the full story.

Why has disclosure been going on since the first black and white televisions came out? For one, because ever since the famous Roswell Crash in 1947, preceded by a wave of sightings in the time leading up to it, there have been major inconsistencies in official fumbling. The air force admitted, for one day, that it had retrieved a crashed flying saucer, only to retract itself and call it a weather balloon. That is like saying you found a smoking gun but then it turns out to be just an old match.

Of course you are right when you say that it is next to impossible to keep a total lid on this. This is what targeted disinformation is for. Agencies and hired guns do their best to create a cognitive dissonance that ridicules any crucial events or evidence, even the mere concept of the AlienUFO reality. It is allowed in the movies, though, with hundreds of films and more coming. It is not hard to see why, after 70 years or so, we are still in the dark. Kept in the dark.

But are we? One thing is public knowledge. Another one is widespread public knowledge. Currently, we are between the two, all the while we are worrying about our world as we know it coming apart at the seams. Could it be that this is happening because of the AlienUFO? Trillions in taxpayer's money can not be accounted for. Is this money going into black operations dealing with the AlienUFO?

McDonnell Douglas studied UFOs in the 1960s

http://www.youtube.com/v/EgoyoHPUlpY?fs=3Dl&hl=3Den_US"application/x-shockwave-flash"

Is there, or was there, one man or woman who has told us that not all is what it seems? Yes. Actually, several of them.

Spilling The Beans

The prolific AlienUFO graphic artist Jim Nichols found this mind-blowing statement by two people who laid the foundation for the US atomic, space program and the CIA.

<http://www.ufodigest.com/news/0208/aldebaran-mystery.html>

Dr. Hermann Oberth, who pioneered rocket design for the German Reich during World War II and later advanced rocket technology for the American manned space launches, cryptically stated, "We cannot take the credit for our record advancement in certain scientific fields alone; we have been helped."

When asked by whom, he replied; "The people of other worlds."

<http://www.viewzone.com/event1-1.gif>

Oberth's fellow associate space pioneer, who also served the Third Reich, Werner Von Braun, echoed similar knowledge of the extra-terrestrial reality when he stated in 1959, "We find ourselves faced by powers which are far stronger than hitherto assumed, and whose base is at present unknown to us. More I cannot say at present. We are now engaged in entering into closer contact with those powers, and within six or nine months time it may be possible to speak with more precision on the matter."
