19-22nd April, 2012

Greetings from the Ashtar Command,

Your leaders have resolved and we already have a key date for Disclosure. Our allies have worked well during that time to achieve this success. We are pleased with this achievement, which is from all of us. The communication will be given by Pr-sident O-ama in the coming days, and this will shock many people who still think that our existence is the result of someone's imagination.

We are asking to the ones that believe in our words sent through our c-annellers from long ago, to calm them. There will be many questions to be answered. There will be a flood of people wanting to take part in major po-itical conferences, seeking explanations about the reason of a so long sec-ecy. We ask that you remain calm and trust in G-d.

The appropriate measures will be taken on those that have concealed such information from you, as it has always been scattered everywhere and yet many refused to believe in it, though there is so much evidence.

Our history is marked on your planet, with our buildings. As a small example we mention Easter Island ♦ Our fingerprints exist everywhere and this is undeniable.

Those who belong to the c-bal planned a manner to introduce some excuses

for you, concerning the clues we have left when your planet had gone into quarantine. For a time their plans have been successful.

Each of you has a mark on history, as you served the two sides. Now you have the d-vine opportunity to ascend permanently to the Light.

Beloved ones, the years of waiting came to an end and with them the joy of the task accomplished. Now there is nothing to stop the wave of information that will spread out across the globe every day.

Remember that our presence will only be possible with your "endorsement" because the planet is yours and we need your permission to land. We encompass everything you have been told throughout the week and say again, we are about to make great displays above all European cities.

We will fly over major cities, making displays and having always a mother ship nearby. We will show that we are a well organized team, we work in synchronicity and that there is nothing that can hinder our performance.

The dark ones already know of such events but there is nothing that can stop us because we have higher orders to neutralize any attempt that could harm our presentation in a peaceful way. In some cases, they will attempt to create f-ar by broadcasting through a TV station and asking for your support to their attack. Some people will support them, but it will be only a small amount compared with thousands of people expecting us with open arms.

We will not come to fight and we will never tire to state this. We will come in peace. Know that we have the required technology to prevent any attempt of attacking the thousands of ships we have without causing any loss of life.

We can neutralize missile/rocket launches, as we did recently in Korea ... We can simply prevent certain wea-ons from being fired against us. Our weapon-y is powerful, but in no way would we use it to threaten your lives. Be aware that we respect Life.

Apparently all is calm in your world, please be with your hearts at peace when the Creator gives green light to start these events

Dear Ones from planet Earth, we are literally among you. We are eagerly waiting for the announcement we have been promised to, since we received the information from our allies that it will be on "X" day. We look forward and ask all and everyone of you to vibrate in the Light because when this happens, nothing will prevent the wave of information to be spread. We send our love to all of you on Earth.

Go- bless you. We are your Family of the Stars. We are all One

Subject: Disclosure. Part 5.
April 28, 2012.

Some of the nonhuman people didn't trust the humans and didn't want us to gain these abilities. They were afraid we would take them over.

.....
.....

Urantia, the name of our planet, is classified as an experimental world where dramatic adjustments to the standard genetic code is implemented. Every tenth planet is so designated. Our experiment was designed to speed up the appearance of various human r-ces which usually ev-lve in succession over many millennia. The result was quite unexpected in that several different rac-al types appeared suddenly and had to learn to coexist, resulting in competition and aggression. The situation was further complicated when some unauthorized blending took place between non-terrestrial beings and the human population, causing a rac- of superior beings midway between human and spirit. It was because of these mishaps that the System Sovereign chose Urantia as the planet to i-carnate as a homo sapiens sapiens.

The Raison d'etre of life

One of the strong points of the Urantia revelat-ons is there very understandable explanation for the critical questions: Why is there life? and What's it all about?

From the perspective of a human being it is to exist beyond material death to serve in future assignments for the benefit of deity.

Humans have minds which constantly struggle, learn and adjust to their environment in an effort to survive and thrive. The patterns of survival become part of the mind itself and are known to the sentient human and his associates as personality. This is the ego, the self with which we identify. But because this phenomenon is organically based, it ceases to exist when the material body dies.

The Urantia Papers propose that there also exists a fragment of the Creator -- a pure s-irit -- which, because it has no environmental challenges, has no personality. They call this entity the Thought

Adjuster and it is similar to our concept of "s-ul". The goal of human existence is then to transfer our personality to the Adjuster so that we can survive physical de-th and continue eternity in the Universe as personalized spi-its. This is achieved by living according to patterns of behavior and thought which make our personality compatible with the evo-ving personality of the Creator. If we achieve fusion with our Adjuster we will be assigned to other duties in the realm -- perhaps serving as guardians for other material beings who are attempting to fuse. The whole scheme of life is devoted to serving the Creator and helping to evol-e the grand personality of the Creator sp-rit -- in essence, making the word become flesh.

Urantia, we have a problem!

<http://www.viewzone.com/event99-caligastia.gi>

We are told that not all of the higher spi-its were comfortable with this scheme. A group dared to question the benefit of expending so much effort to help mortals to evo-ve into personalized s-irits. They claimed that it seemed to be futile as no one had ever been able to visualize the final goal of this continuous ev-lution. They suggested that mortals should not even attempt fusion but should enjoy their temporal lives. There was more to their rejection of the Adjuster fusion scheme, but the result was the same -- a reb-llion against the authority of the System Sovereign which attracted many personalized spi-itual entities on many inhabited worlds, including Urantia.

Part 5.
