Subject: Disclosure. Part 7 of 7.
April 29, 2012.

It appears that I was wrong in posting the information about the Russian Stock Market closing. It turned out to be a hoax and the Russian Stock Marker is still up and running.

This states that we people on Earth are a two brained entity.

studies of humans has validated this.

The Urantia Papers also speak of the different brain types found in our local universe:

<http://www.viewzone.com/event99-lh.gif>

...The one physical uniformity of mortals is the brain and nervous system; nevertheless, there are three basic organizations of the brain mechanism: the one-, the two-, and the three-brained types. Urantians are of the two-brained type, somewhat more imaginative, adventurous, and philosophical than the one-brained mortals but somewhat less spiritual, ethical, and worshipful than the three-brained orders. These brain differences characterize even the prehuman animal existences...

From the two-hemisphere type of the Urantian cerebral cortex you can, by analogy, grasp something of the one-brained type. The third brain of the three-brained orders is best conceived as an evolution of your lower or rudimentary form of brain, which is developed to the point where it functions chiefly in control of physical activities, leaving the two superior brains free for higher engagements...

While the terrestrial attainments of the one-brained races are slightly limited in comparison with the two-brained orders, the older planets of the three-brained group exhibit civilizations that would astound Urantians, and which would somewhat shame yours by comparison. In mechanical development and material civilization, even in intellectual progress, the two-brained mortal worlds are able to equal the three-brained spheres.

But in the higher control of mind and development of intellectual and spiritual reciprocation, you are somewhat inferior...

These three types of mortals are distributed throughout the worlds of the local systems.

Paper 49, Urantia Papers

Aliens on the Moon?

One of the most chilling revelations in the Urantia Papers is at the end of their discourse on a class of mortals called non-breathers. According to the papers, there are orders of mortals who are able to live on worlds with little or no air. In our local universe there are only nine such worlds.

There are few nonbreather types of inhabited worlds in our system because this more recently organized section of the local universe is full of debris and meteors. Worlds without a protective atmosphere are constantly bombarded by these objects and the nonbreathing worlds must protect themselves by making electrical installations which shunt the meteors -- much like our electronic bug traps.

The non breathing mortals must hide in protective insulated environments because their worlds are subjected to electrical storms and charged surface phenomenon, unknown to atmospheric beings. The nonbreathers do not eat food or drink water. Their nervous systems, heat-regulating mechanisms, and metabolism are dramatically different from such Earth humans. Almost every act of living, aside from reproduction, is different. But here is the big deal with non-breathers:

You would be more than interested in the planetary conduct of this type of mortal because such a race of beings inhabits a sphere in close proximity to Urantia. --paper 49

It seems almost certain that they are referring to aliens who inhabit our Moon! Which brings us back to Viewzone's recent articles on the Anomalies of the Moon,
