Subject: The Agreement. Part 3 of 3.  
May 2, 2012.

This talks about the use of f-ee power.

.....  
.....

CONCLUSION

Take a minute to read this page from the MA-ESTIC-12 Group Report. This report was prepared on 18th November, 1952, for pre-ident-elect Dwight D. Eisenhower, to bring him up to date on the alien "situation" prior to his taking the office. It describes the crash at Roswell (which appears to have been brought down by a military X-plane) (JW That alien craft may have crashed due to being caught in rain storm with some lightning hittting the craft.) and the analysis of the alien technology that was used in the vehicle's propulsion system.

<http://www.viewzone.com/event66.p8.gif>

Subsequent contact and "deals" made with alien visitors to our world resulted in deliberate transfers of science and technology such that we had our own UFOs flying by the late 50s or early 60s. Along with the propulsion systems, alien technology contributed to semiconductors that replaced vacuum tubes, miniaturization of electronic circuitry and the understanding of zero-point (so-called "fr-e" energy). Yet, because the mil-tary industrial complex controls these discoveries, and because of their error that resulted in abductions and potential displacement of humanity by hybrids, this remains the most secr-t information on the planet. You see, it's NOT about a propulsion system for a flying saucer. It's about energy production. Something that everyone in the world needs right now.

Everything that causes suffering on our world could be remedied with a fre- supply of energy. Pollution could be eliminated, poverty made obsolete and health brought to optimum standards -- if only we had -ree and abundant energy where we needed it. Yet we continue to depend on o-l for most of our energy needs -- resulting in poverty, w-rs and pollution.

We have a broken gov-rnment that has betrayed humanity. We have immoral corporations that profit from our suffering and allow an alien ra-e to r-pe and mutilate our families and neighbors -- and ourselves. We are kept in ignorance and poverty, our short life-spans are maintained, disea-e is allowed to infest us -- and all the time they know well that a solution to our suffering has already been developed but is used instead to maintain their own power over us.

We certainly hope that there is a move to make these facts known. But, as you can see, the result will almost certainly lead to an uprising against those who have enslaved us. Am I exaggerating? In fact, it is much worse than we have reported here in this series. Much worse. But now the solution is OUR responsibility. Let's talk openly about these things, combine our anger and protest and hope that we can at least go down fighting.

Comments:

Thanks for this information. I had seen most of it before but never had the story told in such a convincing way as you did it. I think though you should really have emphasized the part about energy production more.

<http://www.viewzone.com/event66.starving.gif>

If you look at all the problems in the world, they really can almost all be solved with energy. If we had free energy, anywhere and everywhere, inexpensive and reliable, = then we could grow food with hydroponics and quartz lights in any place on earth. We could use the endless supply of ocean water with desalinization plants and pump it to even the most remote places on earth. With our food supply and fresh water needs met, families in third world nations would not need to have many children as the need for farm work would diminish. Also, vegetarian food would be so plentiful and varied that the idea of using animals to "convert" protein would be inefficient. Education could be everywhere with things like the internet, television and other technologies that require electrical power. Manufactured items would be made better, to last longer, and sold cheaper because of the elimination of power costs. Wars over oil or natural resources would be a stupid concept and people would have more time to think about esoteric and spiritual affairs, getting along with each other and, yes, even of how to live with an alien race that wants to share this planet.

All aspects of life would improve if only we had a free and plentiful supply of energy and that is what is offered through the technology of the UFO propulsion drive and power plants. It is like what transformed the aliens lives and allowed their advances in other technologies. It all starts with energy. So this is the big deal that people should focus on. We need to release this technology to the public.

D.A.

The insignia seen on many uniforms of the big nosed greys is a triangle. This is supposedly where the "tri-ateral commission" got its name. It is believed that Area 51 is one of their main headquarters on Earth. So check out this google-earth picture of Groom Lake (Area 51)!:

[http://www.viewzone.com/triangle\\_nevada.jpg](http://www.viewzone.com/triangle_nevada.jpg)

This is just one of the many unusual things that can be seen near Area 51, Groom Lake in Nevada. The tracks are about 16 feet wide. The circle is 2000 feet in diameter and each leg of the triangle is 4000 feet long. The view can be seen at 37 37'41.54"N 116 50'52.57"W.

Hmmm.

Dave

Gary, no story about aliens is complete unless you include this photo:

<http://www.viewzone.com/event66.capturedalien.jpg>

Or this one!...

<http://www.viewzone.com/event66.visitor.gif>

Barbara K.

Hello Viewzone,

Wish I were optimistic and believe that the solution is our responsibility, and that we could influence the "Non-Humans" in charge of our planetary petri-dish, animal preserve, temporary pri-on, or whatever one wants to call this place. The ancient texts are very explicit, we are genetic experiments, organic resources for trade or study, at worst collateral-damage, or at best some of us make it to "Pet -status" or overseers like the Kapos in the former N-zi Camps.

Yes, we can shriek and stomp our feet, demand loudly to be heard and threaten to expose...what? The facts that our "Colonials" have technologies thousands, if not millions of years in advance of the few they have shown us?

These loans were not for our own species enhancement or welfare, they were meant to instruct us to be low grade technicians and workers, never partners! Eisenhower was a simple man and he wouldn't have recognized a true Extraterrestrial (Tall White) from the pretenders, the "Extradimensionals" (archons, jinns, greys with or without hooked noses, etc) the pretenders do have crafts, though the models might have changed over the centuries, to accommodate our belief systems.

What makes me believe that these "Aliens" were not true "Extraterrestrials"? The simple fact that they knew our extreme paranoia vis a vis Russia and were ready to take advantage of that situation, and insert themselves as always. The "Tall Whites" were already in the neighborhood and they didn't meet with Eisenhower, if a meeting ever took place! You might want to visit, or re-visit Phil K-apf story of the "Verdants" many typos, some strange translations

unfortunately from the Swedish, but it gives interesting info.

<http://galactic.no/rune/cont1.html>

Anyhow, I'm NOT a bit disheartened about the above, I'll keep on fighting till I drop! We have a saying in French:", C'est si beau quand c'est inutile"! It's so beautiful when it is useless...

Virtual hugs!

Malou
