Subject: The Inner City Under Machu Picchu. Jan. 29, 2011.
May 5, 2012.

Most people are familiar with the city of Machu Picchu. It is an abandoned city up high the the mountains of Peru. This information is about a city underneath that area.

.....

Inner Earth City of Machu Picchu

Cuzco with Adama through Aurelia Louise

Jones (JW I knew Aurelia Louise Jones before she passed away. I visited her and her cat in her home in the town of Shastina just north of Mt. Shasta.)

From the heart of the inner city of Light of Machu Picchu, from our abode of royal splendor, we send our great love and warmest acknowledgment to all of you who will be hearing or reading this transmission of Light. So many of you are indeed our former friends and family members from a distant past!

On behalf of our ascended civilization here, we send our blessings to all of you, who are so diligently seeking the light of your divinity, and we bid you welcome in the midst of our energy.

My name is Cuzco, and I am here at this time with our beloved brother Adama of Telos, to speak to you of our city of Light. The Peruvian city that also carries the same name was named a long time ago in remembrance of my essence, for the assistance I have brought to surface dwellers in our area in past history. I am one of the ancients here, presiding on the Council of the Elders of our city.

It feels so good to my heart to be in the presence of Adama at this time. We already anticipate the joy we will experience, and as you read our published transmission, we will be whispering in your ears our song of love and friendship.

Three miles beneath the outer community of Machu Picchu in Peru, a Quechua word literally meaning "Old Mountain," also thrives another ev-olved civilization inhabiting a beautiful city of Light, also called Machu Picchu. Our city is similar to Telos in many ways, in the sense that our people also embody a fifth dimensional consciousness.

We have been here for quite some time, almost as long as Telos has existed beneath Mount Shasta, just a couple thousand years later. Nevertheless, the history of our city is different. At one time and for eons of time parallel to the time of Lemuria, we lived above the ground, forming small communities of Light and true brotherhood, where the surface community of Machu Picchu now exists. We did not always live underground. But eventually, after the great flood and the destruction of both continents, it came obvious to us that the peace and the beauty we so enjoyed could eventually become compromised.

As the negativity began rising on the surface again, and darker and more violent than before, it became imperative for us to also recreate our city within the Earth, like the Telosians did before us. We also desired to create a city of Light to prepare an abode of Light for those of the members of our Inca civilization who would eventually ascend to the higher dimension.

We set up our intentions to preserve our culture and all its treasures underground, knowing that eventually, it could be at risk from the negativity of mankind. Like the Lemurians did a few thousand years before us in building their city of Telos underground to preserve their culture and the most important treasures of Lemuria, we proceeded to do the same. Many of you still wonder where the Incas went when, at some point, whole communities disappeared from the surface of the planet

almost "overnight". And I now tell you that they came to the inner city of Light of Machu Picchu.

For many, they did not have far to go. They came inside our mountain through a se-ret passage in the sacred valley, not so far from where they had been living. Although the Earth's civilizations have come from a wide variety of galaxies, star and planetary systems, most of you in your long history of incarnations on this planet have chosen to experience a wide range of possibilities, and have taken embodiments more than once in all of the main civilizations that have graced the Earth through its long period of evolution.

This means that no matter where you come from originally, what planet or star system or universe, in your incarnation cycle, you have all at some point experienced life here as Lemurians, Atlanteans, Mayans, Incans, Egyptians, etc. What does it make you now? Know that in our realm, we no longer need those labels to identify ourselves. We thrive to live in the Oneness of the Creator. Everyone conceived ultimately comes from the heart of the Creator, and everyone has also left their imprints and aspects of themselves everywhere in all the universes, galaxies and planetary systems.

Aurelia - Who now inhabits your city?

Cusco - Our inner city was inhabited at the beginning primarily with our people, the ascended Incan civilization.

Eventually, some Lemurians and Atlantean scientists joined us, and little by little, more Lemurians and Atlanteans increased our number. Our city is now inhabited mainly, but not exclusively, by beings of those three civilizations. Our number has expanded much since the beginning, as more beings have joined us.

Aurelia, you have several friends and former family members living here. Your family is not just in Telos you have family in several inner cities.

We all live together in Oneness, in the spirit of total harmony and true brotherhood. You know, once you ascend, you are not limited to live only in one place. There is much freedom to move around and experience living in many places. Some people come to live here for a while and move on, and others stay for a very long time.

The way we live can very much be compared to the way of Telos. Our creation process is by thought, just as it is in Telos. Though every city has its own particulars, all ascended cultures live on the same universal principles, and the way of life is not so different from one city to the other. The size of our city has now reached a little over one million people. What makes it different than Telos is that the inner Machu Picchu community is composed of a mix of three cultures, while in Telos the Lemurian culture is the main civilization. Many of the citizens in Telos have been alive in the same body or incarnating in the Lemurian culture for so very long, that they can almost be considered the originators of the Lemurian race. Adama is such a being and so is Ahnahmar, among many others. As you well know, a few hundred years ago, the Spanish conquerors came to South America and ruthlessly destroyed most of the beautiful and elegant cultures living there at the time. In their greed to acquire all the gold they could put their hands on, they respected nothing and no one. There was then a very peaceful and thriving Inca community of our people living on the surface at Machu Picchu. When the Spanish bloodshed and destruction began, we invited them to join our city, and they have not been seen since. They vacated the surface, taking their treasures with them, and moved inside. They are still here alive and well to this day. In our city, we are beings at the level of the upper fourth and fifth dimension.

As with Telos, we can say that there are many levels and dimensions of it.

Some of it has physicality as you understand it, and other levels are purely etheric levels. We can grade Telos from holding the upper fourth dimension level consciousness, all the way up to the tenth and twelfth dimensions.

Aurelia - What do you do and what is your main purpose?

Cusco - Actually, we are quite involved in the preservation of the "Rain Forests" which is so important for the life and welfare of the planet. Because of greed, the lack of respect and of honoring of the Earth from the surface populations, without our intervention, there would be none left at this time. We are trying to stop the destruction as much as we are allowed to. Although none of us from the higher dimensions is yet allowed to perform direct intervention in your dimension, we are doing the best we can. We are promoters of peace and harmony. We also do planetary service in our work with Nature. We have become quite adept at understanding the creation of nature, and when the time is

right, we will assist the planet in restoring her original beauty and perfection. Though we will not be the only ones doing this, we will join the greater team. When we emerge among you in a few years, it will be our great pleasure to teach you what we have learned. In the meantime, we make a formal invitation to all of you to come to our classes at night if you want to develop what you term "a fifth dimensional green thumb." We can teach you as well many of the wondrous secrets of nature that have been lost to the surface knowledge. In due course of time, you will be delighted to apply, with ease and grace, all this new knowledge into your daily life to create around you the beauty and perfection of nature we have created here. In Telos, they have also acquired this knowledge, and this is why they have created so much beauty in their surroundings. Another service we perform from our city is with color. Because there is so much pollution in your world and so little oxygen left in the atmosphere, without the daily replenishing of oxygen and purifying of the air by millions of angels and ascended beings, life on your dimension would no longer be possible in most places.

Part 1.
