Subject: The Consp----- Journal. Part 3.  
2012.

May 14,

This part talks a little about Bigfoot.

.....  
.....

We do know that there are all sorts of animal mutilations, disappearances and black helicopters associated with this facility. My mind isn't totally made up, but it is a frightening discourse no matter how you look at the situation and interrupt it.

As for Dr Turner, she emphatically believed there were under ground alien bases and that some horrendous experimentation was taking place there proclaiming: "Abductees report seeing other humans in these facilities being drained of blood, being mutilated, flayed, and dismembered, and being stacked, lifeless, like cords of wood. Some abductees have been threatened that they, too, will end up in this condition if they don't cooperate with their alien captors." Sounds like something out of a snuff movie to me.

5. What do you mean by aliens can change our perceptions of our surroundings?

Beckley -- There are so many reports now that I have collected over the years where the perceptions of those involved in a UFO encounter are altered beyond the imaginable. In both Round Trip To Hell and the Evil Empire I give various examples of this alteration of perception. Now most researchers these days will have to confess that instances of UFOs morphing, that is changing shape, are not that unusual, but the cases I describe go well beyond a little shape shifting. There is this one episode involving a couple traveling across country in a tractor trailer who at first observe a formation of lights in the sky which later turns into "individual things" that were described as shaped like "eight-inch people with V-shaped heads, and wings on their backs." The couple say these beings shot "hot fine needlelike shavings like silver metal through the glass of the windshield," and that when they later touched the peeling paint on the truck their fingers got blisters all over them.

They were quoted as saying, "The creatures were hostile and went into attack modes several times, putting up dense fogs. One time when they stopped, it was like a backwards tornado coming from the mouth of the leader of the ships. It was like a ray that he was sending down with the funnel. He did it five times, then it left." Their experience went on all night. There are so many incidents in which the witnesses perceptions have been altered. One time a young woman went into a strange house sitting in a field near Woodstock only to find that the "house" wasn't there when she returned to speak with the occupants who had befriended her. Another time, and this was reported in the prestigious APRO Bulletin, an entire family was driving through the mountains in Washington state only to have their auto run out of gas. They glided into the parking lot of a saucer shaped fast food restaurant, went inside and saw "waiters" dressed in silver space suits serving food. When they returned later - guess they enjoyed the grub - the "saucer" was gone and they asked all around only to discover that no one else had ever eaten in the place. Shades of the Twilight Zone my friend. Just another greasy spoon from outer space, I often ask myself.

6. Could you go into aliens stealing our consciousness and using our bodies for their own agendas?

Beckley - In one episode in the Evil Empire, I relate how an entire coastal town in Brazil is "possessed" by Ultra-Terrestrials. At high noon a UFO is seen - and photographed - parading across

the sky. Over a period of several hours several residents start channeling messages and doing automatic writing. The aliens want earth to give up its use of nuclear energy and "go green." People's entire lives have been changed - usually not for their benefit. Physical changes like in the Exorcist have even been noted - one individual it is said looked like his body had been attacked by bees it had swollen so badly. The late gossip columnist Ruth Montgomery referred to these aliens who take over human bodies as Walk-Ins. Sometimes they possess supernatural strength, psychic abilities and can perform feats of magic which are associated with ET encounters. Uri Geller has been a friend over the years. He doesn't like to speak about his alien "benefactors" but I have gotten him to open up to me on several occasions and have written several articles on his UFO/alien involvement. In his case, it has seemingly made him a millionaire, but the Ultra -Terrestrials can get us to co-operate with them whether we realize it or not!

7. I certainly know alot of abductees and contactees self medicate, and I found it interesting that your book had the balls to bring this up. I always wanted to do an article on it. What can you tell us about this, because I for one know I've self medicated over the years to deal with my own experiences with the unknown. Kudos for bringing this up.

Beckley - This isn't something that I can relate to all that well. There have been some incidents where those taking a variety of "stimulants" have reportedly seen into other realms. This is part of the shamanic experience. The late Dr John C. Lilly claims to have even spoken with dolphins and Ultra Terrestrials while on Ketamine. Our mutual friend Adam Gorightly has written a bit about the "self medicating" aspects of UFOlogy. In fact, in one article Gorightly describes how Dr. Lilly was convinced that his life was being watched over by higher powers of an extraterrestrial origin. Lilly referred to this network of sublime entities as ECCO, an acronym for "Earth Coincidence Control Office." Lilly was positive that all of these fortuitous coincidences in his life had been arranged by higher forces; and that whatever unfortunate folly fell into his path along the road to knowledge, ECCO would be there to guide him safely through the tunnel to the light. Hey I got to go along with this concept. I have had so many off the wall synchronicities that someone or something has to be "arranging" them.

8. Wow. Aliens shapeshifting into Jesus or the Pope or celebrities to get people to have sex with them for breeding purposes? Could you tell us about this crazy intersteller shagging?

Beckley - Well it may not be as kinky as it sounds. . . or maybe it is.

I always said half jokingly that the aliens were coming down to earth as they saw it as one big red light district. Hell, even B movie producers have gotten into the act. There was a movie a few years back, Earth Girls Are Easy. And lets not forget the multitude of pulp magazine covers from the 40s and 50s, where earth women were being dragged off half naked by some over zealous alien male looking no doubt to save his planet from extinction.

Brad Steiger, years ago, wrote about the "Lovers Lane Intruders " where couples parked on some desolate lovers lane were separated by ETs coming in the darkness to take what they felt "was theirs." There was also the "Bedroom Invaders" who left wet spots and claw marks and ripped sheets.

Dr Turner insisted: "Aliens have forced their human abductees to have sexual intercourse with aliens and even with other abductees while groups of aliens observe these performances. In such encounters, the aliens have sometimes disguised themselves in order to gain the cooperation of the abductee, appearing in such forms as Jesus, the Pope, certain celebrities, and even the dead spouses of the abductees."

9. Sometimes its hard for me to hold unto such a grim picture of the aliens even though I know evidence says otherwise but I often have said maybe its fear intruding. But I know that's not the case every time. Surely are some good ETs out there with our best interests at heart as well. Not just ones with a dark agenda?

Beckley - I used to think so and maybe there are. I hate to be all that negative. There have been some cases where people have found buried treasure after following a UFO. There are some healings, including the well known case of patrolman Goody many years ago who was bit by a poisonous snake. His hand had swollen and he had it hanging outside the window of his patrol car on the way to the hospital to get a a necessary shot of a venom antidote. A UFO came over the car and shot down a beam of light and the swelling went down almost immediately and the poison was gone. Hunter Carl Higdon had a scar on his lung which mysteriously disappeared after having gone on a round about with aliens who picked him up in the wilds of Wyoming and than dropped him off later in the day. It's a classic case I investigated that had all sorts of paranormal aspects. Associate Sean Casteel contributed to a book, Angels of the Lord, in which he espouses a more benevolent breed of aliens and angels.

10. Lately I'm deep into Squatch and the UFO connection and just Bigfoot in general, any thoughts or stories you'd like to share just for the flippity fun of it?

Beckley - There may be some hairy ape-like creatures living in the woods, but I think most of these cryptoids are paranormal in nature. One witness even told of seeing Squatch walking across a golf course in Staten Island. I mean the woods are not so dense that they could live there, so where did they go? I also was the first researcher to write about the Skunk Apes of the Everglades. I wrote an article for Saga magazine back in the Seventies that is now posted on the net. In one episode a security guard cornered a smelly old creature in the back of a trailer truck and slammed and locked the door on em. He called for back up, but when they opened the truck door only the odor remained. Where had the big, brute of a hairy creature disappeared to? He didn't just walk away.
