Message from the Galactic Federation of Light 5/22/12

Posted: 22 May 2012

With our help and our assistance so much can be possible for your world and for your people. There is no longer any need for anyone on your planet to suffer at the hands of lack and scarcity. We have the means and the technology to allow each s-ul in-arnate in your world today to thrive beyond anything that has been imagined by many of you throughout all of your -ncarnations into the physical. There is nothing that cannot be accomplished once we set out to reach a new goal and assist a world reach a new height for their civilization.

Today here in your world there is a plan unfolding. This plan has been carefully laid out by many minds of the higher realms for many eons of time.

This plan is not a loose fitting of different pieces and proposals from different peoples and different sectors of the overall operation. Instead, this plan is a tightly knit fusion of ideas and concepts of many great minds from many highly established civilizations that exist and that thrive throughout this universe. There has been no stone left unturned, and there has not been one area of this operation that has not been meticulously studied and carefully planned to bring about extraordinary change for your people and your planet.

We come with many valuable gifts for you that will alter the means to which you currently survive and how you currently entertain yourselves in the forms of recreation, including your avenues of musical and artistic expression. As part of these many changes, you will experience upgrades in your transportation systems, your waste disposal systems, your library systems, and your oceanic systems which will entail the rerouting of certain water arteries that can cause future problems for your world.

These changes are great and they are many, but they are not anything that we cannot handle and have not performed many times before. Our command is comprised of many highly trained and skilled members of personnel, and there is no area of each and every endeavor we undertake that is not fully and competently staffed by teams that specialize in specific fields of science, of agriculture, of geology, of psychology, of health, of wealth and resources. We look so forward to sharing with you our wide ranging expertise in these fields of operation and many more as well. We have been studying your world for a long period of time and we understand as greatly as even some of your academics in specific fields what needs to be done, what changes need to be made and how precisely to approach these changes and carry them out to the successful metamorphosis of the many and varied systems that today comprise the inner mechanics of your society.

Allow us to help you with these many changes that we have planned and have also scheduled to be implemented at certain intervals of time throughout this period in your

Thrive.

history. Help us assist you to make these changes by allowing us to feel welcome as visiting family is welcomed to the home of a relative for a special occasion, for indeed we are your family who have come here to visit you for a brief period of reunion before we must move on to visit in reunion other members of our extended family as well. This is what we, the Galactic Federation of Light, do. We use our great technology to allow us to propel throughout the vastness of the galaxies that illuminate so beautifully our universe. We make stops at worlds that we feel are ready to welcome us, their brothers and sisters, and allow us to help them help themselves make many changes that will advance their societies onto a greater plateau of efficiency, safety, health, wealth and enjoyment for every being that calls this=20 planet their home.

We have been doing this for millions of your Earth years.=20 We are not new to this neighborhood. Some of our dedicated=20 crewmembers and officers of high rank have been taking part=20 in these missions to bring to worlds peace and love and higher=20 ways of life since the formation of our organization millions of=20 years ago. Some of you in-arnate on Earth today in the human=20 physical vessel are members of our organization, and have=20 been members of our organization for hundreds of thousands,=20 even over one million years. Considering this, would you=20 agree that you and your planet are in very suitable company=20 to assist you make the changes necessary here in your world=20 to help it e-olve to a higher state?

We have nothing but your best interest in mind. We have=20 nothing but the best interest of each and every being throughout=20 this entire universe in mind. We have the choice to choose=20 the areas of endeavor that bring to us joy and happiness and=20 allow us to experience new and exciting adventures. We=20 have made our choice, and we have chosen to utilize our=20 gifts from our Creator, who is your Creator, and use them to=20 travel throughout the vastness of this universe and bring to=20 worlds where ever they are located the gifts that we have=20 been so blessed with.

If you had this choice to make today, to be able to travel=20 throughout this entire universe at will in a relatively short=20 period of time, what would you choose to do? Would you choose=20 to plunder and infiltrate societal structures for your own=20 greedy purposes, to line your pockets with the gold of another? Would you wish to seek out and destroy all the beautiful wonders they have designed and have built with their own hands, through the sweat of their own backbreaking labor? Would you burn all the beautiful works of literature that line the shelves of their wonderful libraries? Would you destroy all the pieces of music they have composed to share with others? Would you seek to harm families that have experienced so much hardship, struggle and pain already? Would you add to their misery and bring harm to them and their loved ones, all in the name of conquest? Or would you make the same choice that we have made, which is to travel throughout every corner of this universe bringing to worlds all the gifts that we have received, to share them with each and every being that we have the honor and the joy to meet?

Please take some time and think about this question, and then ask yourself why the Galactic Federation of Light is here today in your world and wishes to meet you. This is all we have to share with you today, but we have so much more to share with you in the days ahead. We love you, our brothers and sisters of the human family.

We are the Galactic Federation of Light.

As chan-eled through Greg Gi-es

This tells something about the movie called "Thrive". Some people like this movie some think it's biggest bunch of trash that was ever

made.

Foster Gamble on 'Thrive' the Movie, Its Critics and What Can Be Done to Stop the C-nspiracy

Sunday, March 04, 2012

Anthony Wile

<http://thedailybell.com/images/library/gamble150.jpg>

The Daily Bell is pleased to present this interview with Foster Gamble.

Introduction:

Foster Gamble is P-esident & Co-Founder of Clear Compass Media; Creator, Host, Co-Writer, and Director of Visual design for THRIVE ...

At age 14, Foster Gamble had a vision where he glimpsed what he perceived to be the fundamental energy pattern. He spent the next 35 years trying to figure out the details and implications of what he had seen. That quest took two paths: a scientific journey and an exploration of the human potential to navigate successfully through the challenges threatening our survival.

THRIVE represents the convergence of these two paths. Furthering his exploration of what was keeping humanity from thriving, Foster spent nearly a decade following the money in every sector of human endeavor. The process revealed an understanding of our predicament that led him to create the strategic solutions offered in THRIVE.

Foster's exploration of living geometry - how nature builds the material world, came to fruition in 1997 when he co-convened the Sequoia Symposium, a multi-disciplinary scientific think tank exploring perspectives on Unification Theory.

There, the primary patterning that the universe uses to sustain healthy systems was clarified and cohered, as was its use as a blueprint for us to design sustainable, all-inclusive technologies and social systems.

This discovery represents the convergence of science and the e-olution of consciousness that Foster set out to explore after his initial vision, and is the code that is featured in the documentary film, THRIVE, and on this website.

Foster lives in Santa Cruz, California with his wife Kimberly Carter Gamble.

Kimberly Carter Gamble is Former CEO, Co-Founder and Advisor for Clear Compass Media; Producer, Director, and Co-Writer of THRIVE.
