by Jon Kelly
Vancouver UFO Examiner*

Did a CI- jump room program from the early 1980 - 92s teleport participants to the planet Mars or to "Synthetic quantum environments (SQEs)? This is just one of the scientific questions to be addressed in a special Vancouver, B.C.-based ExoUniversity.org <
<http://www.exouniversity.org>
Seminar

scheduled for Friday June 1, 2012 at 7:00 pm
During the live-streamed event, entitled *"The Jump Room: Two participants discuss the -IA's Mars visitation program of the 1980s, Bernard Mendez (who is reportedly a former Assistant to the U.S. P-idency tasked to investigate the C-A's jump room program of the early 1980's) is expected to confirm the existence of the CI- program as the third whistleblower to go public on this issue.

More Than Photons

Public discussions of teleportation in mainstream science focus on reports of experiments where photons are quantum teleported distances of up to 143 kilometers. Research into this form of teleportation has reported application in the development of highly secure communications (such as those required to operate remote-controlled drone aircraft<

mostly across optics labs. Teleporting over larger distances, however, has proven difficult since the principle that makes this all work, known as quantum entanglement, breaks down in optical fibers.

Confirming DARPA Project childhood participant and Washington State attorney Andrew D. Basiago, U.S. P-resident Barack H. Obama, former U.S. chrononaut William B. Stillings, and former DARPA director Regina E. Dugan as participants in the reported secret CIA teleportation program is anticipated during the event as well.

SQEs

The ExoUniversity Seminar will discuss an open scientific question -

whether the destination of the CIA jump room programs was the planet Mars, or whether the CIA jump room actually teleported participants to "Synthetic quantum environments (SQEs) (or to both Mars and an SQE).

In its written statement to the press, ExoUniversity describes Synthetic quantum environment (SQE) as a term invented by Andrew D. Basiago to describe a fold in the time-space continuum in which the Grey extraterrestrials have established an artificial holographic planetary domain.

Program participants Andrew D. Basiago and William B. Stillings originally made public news of the se-ret CI- 1980-83 jumproom teleportation program in a November 2011 article on Exopolitics.com (by Seminar moderator and Exopolitics founder Alfred Lambremont Webre).

Here is the text of the ExoUniversity Press Release:

Bernard Mendez, 3rd whistleblower to go public about 1980-83 sec-et -IA Jumproom teleportation/Mars program

Third whistleblower to go public about 1980-83 CIA Jump Room teleportation program for Mars and "Synthetic quantum environment (SQE)" visitation

VANCOUVER, B.C. - Bernard Mendez, an Assistant to the U.S. Pre-idency tasked to investigate the CIA's jump room program of the early 1980's, will confirm the existence of the CI- program in a special Vancouver, B.C.-based ExoUniversity.org <
<http://www.exouniversity.org>

Seminar scheduled for Friday June 1, 2012 at 7:00 pm =96 10:00

pm PDT that will be broadcast in a live online streaming by ExoUniversityTV<
<http://www.ustream.tv/channel/exouniversitytv#events>

Whistleblower Bernard Mendez will also confirm the participation of DARPA Project childhood participant and Washington State attorney Andrew D. Basiago, U.S. Pre-ident Barack H. Obama, former U.S. chrononaut William B. Stillings, and former DARPA director Regina E. Dugan in the sec-et program C-A teleportation program.

Participants Andrew D. Basiago and William B. Stillings originally made public the news of the s-cret CI- 1980-83 jumproom teleportation program in a November 2011 article<

*"Synthetic quantum environment (SQE)"

The ExoUniversity Seminar will discuss an open scientific question - Whether the destination of the CIA jump room programs was the planet Mars, or whether the -IA jump room actually teleported participants to "Synthetic quantum environments (SQE) or to both Mars and an SQE.

"Synthetic quantum environments (SQE) is a term invented by Andrew D. Basiago to describe a fold in the time-space continuum in which the Grey extraterrestrials have established an artificial holographic planetary domain.

LIVE STREAMING SEMINAR

WHEN: Friday June 1, 2012 @ 7:00 pm - 10:00 pm PDT

WHAT: SPECIAL ExoUniversity.org
<http://jumproomtoms.eventbrite.ca/>>Live Seminar

*"The Jump Room: Two participants discuss the -IA's Mars

visitation program of the 1980s"

Participants: Andrew D. Basiago (Live); Bernard Mendez (Live);

Moderator:

Alfred Lambremont Webre

*WHERE: *ExoUniversity Seminars

1111 Marinaside Crescent (Gameroom)

Vancouver, BC V6Z 2Y3

(*Directions*: Use Concierge entrance next to underground

parking entrance, left of Hurricane Grill Restaurant)

Capacity limited to 30 persons. Tickets: \$-0 in advance; \$-0

at the door;

with Andrew D. Basiago & Alfred Lambremont Webre. This

ExoUniversity.org

Forum will contain three (3) downloadable video classes,

and can be viewed at

www.exouniversity.org <<http://www.exouniversity.org>.

Viewers who download and watch all 2012 ExoUniversity.org

Forum video classes (more than 24 classes in 8 Forums) and

complete final course requirements are eligible for an

ExoUniversity Certificate that may have future education,

employment, and/or entrepreneurial value to the viewer.

Classes can be downloaded at

Technology Review in its report of how

href=3D"http://www.msnbc.msn.com/id/3077272/ns/technology_and_science-science/t/einstein-said-it-couldnt-be-done/

Scientists have been teleporting photons since 1997, mostly across optics

labs. Teleporting over larger distances, however, has proven difficult

since the principle that makes this all work, known as quantum

entanglement, breaks down in optical fibers.

This changed in 2010 when a team of Chinese scientists teleported

information

10 miles through the air. Earlier this month,

<http://www.technologyreview.com/blog/arxiv/27843/>

Technology Review reported the Chinese team successfully shattered their

own record by teleporting photons 60 miles across a lake with the aid of

a laser.
