Subject: The Integratron.

June 4, 2012

If you should go to Venus you would find a town, maybe underground, that has an Integratron in it. When you are about 48 years old you are allowed to go into the Integratron and it will change you so you look, feel and act like you are 24 years old. When you get to 96 years old you are put back to 24 again. Finally if you are 154 you can be put back to 24 again. That about all they will let you go unless you have a special job to do otherwise you have to be born again.

A man inside of Mt. Shasta is over 600 years old and he looks and acts like he is 17 years old.

His name is Adama and he is not the same as the Adama who was in the movie called Battlestar Galactica.

Van Tassel and contributors such as Howard Hughes made the the Integratron on Earth but it never worked properly.

Now on to the subject of the Integratron.

.....
.....

<http://www.integratron.com/images/Dome.longshot.jpg>

The Integratron is the creation of George Van Tassel, and is based on the design of Moses Tabernacle, the writings of Nikola Tesla and t-lepathic directions from extraterrestrials. This one-of-a-kind building is a 38-foot high, 55-foot diameter, non-metallic structure originally designed by Van Tassel as a rejuvenation and time machine. Today, it is the only all-wood, acoustically perfect sound chamber in the U.S.

The Integratron is sited on a magnetic vortex

<http://www.integratron.com/images/GiantRock&W.jpg>

The location of the Integratron is an essential part of its functioning. Its placement was chosen based on a complex set of theories involving the earth's magnetic field and the Integratron's relationship to the Great Pyramid in Egypt and Giant Rock, the world's largest freestanding boulder.

In 1947, Van Tassel began operating the Giant Rock Airport three miles away from the Integratron, and in 1953

initiated communications with extra-terrestrials after a physical encounter at Giant Rock. He subsequently hosted 17 Spacecraft Conventions there for UFO enthusiasts.

According to Van Tassel, the Integratron is located on an intersection of powerful geomagnetic forces that, when focused by the unique geometry of the building, will concentrate and amplify the energy required for rejuvenation and hea-ing.

In 2005, a geophysicist measured the earth's magnetic field for up to 15 miles in every direction from the Integratron and then inside the dome.

She proclaimed that there is a significant, unexplainable spike in the earth's magnetic field in the center of the Integratron.

Today, visitors from a wide variety of disciplines are drawn to experience the Integratron's enhanced energy fields. They agree that an overnight at the Integratron is equivalent to a relaxing vacation and that a Sound Bath results in waves of peace, heightened awareness, and relaxation of the mind and body.

The Integratron has been featured in many magazines, newspapers and on television, including:

- ON selected
- Anthony Bourdain's No Reservations
- New York Times
- Rolling Stone Magazine - "Hot List"
- Los Angeles Times

send us an email

<http://www.integratron.com/6ComeOnIn/ComeOnIn.html#SoundBath>

Sound baths

The Sound Bath is a 30-minute sonic healing session with a series of quartz crystal bowls played live in the Integratron's highly resonant, multi-wave sound chamber.

This is the ultimate Integratron experience!

Click the link to check dates for public Sound Baths and learn how to book your very own private group Sound Bath.

Guided Tours

Schedule an exclusive docent-led tour of the Integratron for groups from 4-100 people. Great for sightseeing groups, scientific clubs, musicians, spiritual groups, UFO enthusiasts, sky watchers, field trips and architectural/historical societies. Special rates for seniors and school groups. Tours take about an hour and include a history of the Integratron, access to Van Tassel's archives, nostalgic photo library, and a personal experience of the energy and sound chamber.
