Subject: Bigfoot On Coasttocoast.
2012.

June 10,

Last night on Friday June 7, 2012, at 10:00 PM there was a lady who called into George Norrey who said that she had spent 3 weeks with Bigfoot.

She was asked to explain her experience, and said the following things.

I had been given permission from my father to go camping out for three weeks. (JW I didn't catch what state she was in.) She said that she had climbed over a log and some of the bark broke off.

She collected some grubs to be eaten later. She were a little like naggets. After this she climbed down a very steep hill that she could have fallen to her death.

She sat down and notice a dark shadow shielding the sun and smelled something that was rotten. She then fainted and next woke up in a dark cave. Some dark being came near her and it sent a thought into her head that she would not be harmed and they were not going to eat her.

Later she saw the Bigfoot and it was 10 feet tall. Another young one was four feet tall. He then told her that her name was Kate and she hadn't said that before that time. He said that we were waiting and expecting her. She said they were telepathic and she was not telpathic but they taught how to use telepathy.

She then told them that she had leave and go home because she had family and they let her go.

George asked if she had ever gone back again and she said that she has gone back many time.

Gorgee ask if he could go in with her. She that he could if go if he didn't take a camera. She said the Bigfoot don't want their picture taken because you may steal their spirit.

This place was in area Devil' Creek and near Devils' Falls.

She said she ate rattlesnake and it tasted like fish.

That all i have for now.
