Subject: The Man Who Cried Wolf. Part 4 of 4.

June 23, 2012.

This talks about Area 51.

.....
.....

: Earth is one of the few planets which doesn't control its weather. One reason why ET ships crash during extremes of climate - especially those using gravity propulsion. Dr Wolf says, "Their craft are no different to boats in a violent storm - bobbing up and down on large rolling gravity waves. To counteract these difficulties some ETs surround their ships with plasma energy or fly inter-dimensionally through a storm."

: A planet is a living entity with its own consciousness. ETs commune with their planet to create a harmonious relationship. Dr Wolf says, "Some planets grow buildings of pure silicon for the inhabitants out of unconditional love. I have seen and held this silicon. I have also witnessed Zetas communicate with Earth."

: ETs are astounded by how badly we treat Earth. They can't understand why we wish to destroy it. How multi-nationals can continually r-pe this planet through greed and avarice. One of the A-phacom Team missions is to determine whether, "We can use the ETs technology to restore Earth to its former pristine state of natural balance."

: Technology gained from the ETs include LEDs, superconductivity, computer chips, fibre optics, lasers, gene-splicing therapy, cloning, night-vision equipment, Stealth technology, particle beam devices, aerospace ceramics and gravity control flight.

: ETs like many things about humans. Dr Wolf explained, "They especially love our great imagination and creativity along with the ability to have profound dreams. But they would like to speed up our s-iritual e-olution."

: Many ETs who visit Earth are actual tourists. While we take holidays in other countries more advanced beings visit other worlds. "Compared to most planets Earth is almost unique with its vast diversity of nature, culture and inhabitants. As primitive planets go we are a popular attraction."

: Some ETS prefer living underground as they can control the environment to suit their needs. They also use electro-magnetic shielding where the molecules are so dense that nothing can get through. Dr Wolf hinted, "We still haven't explored the deep oceans or the inner crusts of Earth."

: Al-hacom Team discovered that many human looking ETs are presently amongst us. He said, "They can breathe our air and on the street would look exactly like us." Around 1,000 Nordic types are living in Spain alone.

: A Nordic has a perfect and very sensitive looking face with few lines; blue eyes; usually blond hair; around 6 ft tall; very clean; no body odour; and mainly communicates te-epathically. But while on Earth uses a small implanted voice- box to converse with humans.

: Their internal organs are fairly similar to ours although the digestive system is different. They don't need to eat every day.

Their cells don't d-e because the genetics are dissimilar.

: They have a base on a French Polynesian island and walk freely amongst the inhabitants. (Raiatea)

: Nordics have powerful minds. Dr Wolf said, "They can open a dimensional portal just through a single thought and physically disappear. I have seen this done. They live on a much higher plane than us. Thoughts are an energy and Nordics use a device, either worn or placed in a pocket, that amplifies this energy. They also harness crystals for the same purpose."

: During one afternoon in 1990 an ET craft, escorted by F-16 fighters, landed on Puerto Rico, in a busy tourist area. The ETs stepped out and walked amongst the populace. Dr Wolf said, "It was an exercise to test the public reaction." The Mayor of this island wrote a letter to B-sh stating, 'At first we were amused by all of the sightings but then people became distressed. What do I tell them?'

The Pre-ident passed this communication onto Dr Wolf. "It was stamped all over with the words T52-EXEMPT (E) which means this letter can never be d-classified."

: While studying at M-T for his PhD in physics he discovered a new theory of wave particle duality which later developed into a neutral particle beam. Dr Wolf commented, "I had hoped and envisioned that this technology would be used for treating c-ncer. Instead it was used as a wea-on as part of the SDI Pro-ramme (Star W-rs)."

: The ETs told him, "All worlds in the Galaxy are connected. One Hiroshima a-omic b-mb can affect every different culture." They also explained, "Thought is energy. It can be received on other worlds. There is no galactic barrier."

: Mo-sad, I-rael's intelligence organization, "has very good relations with the ETs - especially the Semitics." There is a strong historical association with the country.

: Chris C-rter, creator of the 'X Files', had regular meetings with members of the US Satellite Gov-rnment. Some of the story-lines are based on actual fact eg. 'Project Sentinel'.

: The top sec-et space plane, The Au-ora, runs on liquid methane and has anti-gravity on board. It carries an electromagnetic pulse we-pons' system which can knock out tracking radar. This plane can also travel to the moon.

: Some mil-tary pilots are experimenting with mind control to guide advanced planes. Dr Wolf said, "Some ET craft are living conveyances which are able to divide and reform. These craft are also responsive to thought commands."

: The underground base at Area 51 is a sprawling city, the size of Rhode Island, which continues to grow and has a sister base called S4, some 12 miles away, and another named Indian Springs. It employs hundreds of civilian and milita-y and has at least 8 different on-going b-ack programmes along with an annual \$2 billion budget.

There's intense secur-ty outside with ma-tial law inside and is patrolled by e-ite guards. Some scientists live at the base for 6 months at a time. While their bedrooms are basic the ETs live in their own magnificently designed apartments. There are also shopping malls, military style shops and leisure areas including swimming pools, gymnasiums and

basket ball courts. The food is excellent.

: Satellite gov-ernment scientists have successfully created z-ro point energy and cold f-sion. "There needs to be a smooth transition into these new sciences. Otherwise the world economy could be wrecked."

Dr Michael Wolf's book has presently sold around 10,000 copies.
[Catchers of Heaven has sold out and is no longer available. - RB]
