\*Third whistle blower confirms Ob-ma's participation in CI- jump room program of early 1980's\*

By Alfred Lambremont We-re

VANCOUVER, B.C. =96 A third whistle blower has confirmed that U.S. P-esident Barack H. Oba-a was a participant in the -IA's tel-ortation "jump room" program of the early 1980's.

Bernard Me-dez made this allegation during a seminar held in Vancouver, British Columbia on June 1st under the auspices of the B.C.-based ExoUniversity.org  
<  
<http://www.exouniversity.org>

During the seminar, Mr. Me-dez stated that he, Mr. Oba-a, former DARPA director Regina E. Du-an, Andrew D. Ba-iago, and William B. Stil-ings attended a jump room training class taught by Maj. Ed D-mes at College of the Sis-iyous in Summer 1980.

Bernard Mend-z also stated that he tele-orted with Mr. O-ama and Mr. Bas-ago in jumps that took place from 1981 to 1983, when Ob-ma and Ba-iago were college students.

At the time, Mr. Me-dez, who once served as a special assistant to Pre-ident Richard M. N-xon, was investigating the jump room program for the US int-elligence community.

On November 8, 2011, this reporter  
<http://bit.ly/vxij3C>  
was the first to report revelations made by Bas-ago and Sti-lings that Oba-a served with them in the jump room program of the early 1980's.

The two chrononauts then appeared on late night talk radio's Coast-to-Coast AM  
<http://www.coasttocoastam.com/show/2011/11/10>  
with Laura Magdalene E-senhower, the great-granddaughter of US Pre-ident Dwight D. Ei-enhower, to discuss their involvement in the US se-ret space program.

Maj. Da-es called the show to deny his involvement in the jump room program.

Then, in January 2012, through National Secu-ity Council

spokesperson Tommy V-eter  
<http://www.wired.com/dangerroom/2012/01/obama-mars/>  
, Mr. -bama also denied that he was part of the 1980-83  
C-A jump room program.

Mr. Men-ez statements confirming the existence of the  
CI-'s jump room program and the roles played by Maj.  
Dam-s and Mr. Oba-a in it directly refute these denials.

Other jump room program participants identified by Mr.  
Me-dez and Mr. Bas-ago, including Du-an [who is  
now an executive with Go-gle], as well as a female  
program participant who is a member of a Pre-idential  
family, have neither confirmed nor denied their  
involvement in the -IA's jump room program as of this  
writing.

Asked for comment on Ob-ma's silence in the face of  
confirmation of his participation by three jump room  
participants, Mr. Bas-ago stated, Pr-sident Oba-a  
campaigned for presi-ent pledging that his administration  
would be one of transparency. He must now fulfill that  
promise and acknowledge that he served with us in  
the jump room program.

\*1980-83 C-A jump room program\*

During the  
ExoUniversity.org  
seminar, Mr. Me-dez explained that his mission to  
evaluate the -IA's jump room program originated  
from discrepancies being reported by the jump rooms  
on the U.S. east and west coasts, respectively.  
The east coast jump room was located in New York  
C-ty, the west coast jump room in El S-gundo, CA.

According to -endez, the jump room technology had  
been transferred from a species of Grey  
extraterrestrials to the U.S. gov-rnment. The west  
coast and east coast jump rooms were reporting up  
to 40 incidents of participant injuries per month  
occurring during jump room teleporta-ion to unknown  
environments in space. Yet, several days after each  
teleportation jump, the reported injuries to  
participants had disappeared.

Both the east coast and west coast C-A jump rooms  
experienced losing power at times when their  
control room in Ohio was reporting normal operation  
of both jump rooms. The speculation was that the  
source of the jump room technology Grey  
extraterrestrials may have been covertly interfering  
with the functioning of the jump room telep-rtation  
technology, unbeknownst to control room operators  
in Ohio.

The U.S. gov-rnment deployed Mr. Me-dez, along  
with an evaluation team that included several  
prominent U.S. as-ronauts, to determine the causes  
of these discrepancies and determine the true  
destinations of the jump rooms.

Mr. Bas-ago and Mr. Sti-lings have confirmed that Mr.  
Me-dez was both one of their fellow chrononauts  
taking jumps with them and a fe-eral investigator  
whose primary function was investigating questions  
like where the jump rooms were going.

\*Synthetic Quantum Environments (SQEs)\*

Upon arriving at the jump room training class at  
College of the Si-kiyous in 1980, Mr. Me-dez  
debriefed Maj. Dam-s about his intelligence mission  
to evaluate the program.

He then began a series of test jumps from the west  
coast jump room. On one such test jump he recalled  
teleporting with Mr. Ob-ma and Mr. Bas-ago to a  
planetary environment in space that was initially  
thought might be the Mars they had been trained  
for. Mr. Men-ez recalls that when he had Mr. O-ama

shoot a flare at the sky, the flare bounced off a ceiling at about 62-foot in the sky, indicating that the three chrononauts had teleported to an artificial environment or domed enclosure of some kind. The precise location of that enclosure was uncertain, and may have been either a dome on a celestial body, such as Mars, or a freestanding holographic creation in space.

Mr. Men-ez determined after multiple jumps that the destination the jump rooms were reaching was not Mars. Mars was out of position when most of the jumps took place. Its atmosphere was deficient in oxygen to sustain human life. Gravity on the surface was stronger than Mars - gravity would have been. The temperature swings on Mars (from -175 F to +225 F) would have made surface visits not survivable. Mars' lack of an ionosphere would have led to the irradiation of the jumpers.

He concluded that the jump rooms were actually taking the program participants to a - synthetic quantum environment or SQE, a term invented by Mr. Ba-iago to describe a fold in the time-space continuum in which the Grey extraterrestrials have established an artificial holographic planetary domain.

During the ExoUniversity.org <  
<http://www.exouniversity.org>  
seminar, Mr. Basiago stated:

According to Bernard Me-dez, the jump rooms were not visiting Mars but "folds" in time-space created by the Grey extraterrestrials that the Apollo astronauts called slots.

These slots or niches in time-space contain synthetic quantum environments in which the Greys have stored event scenarios that have taken place at different times on different planets, including Earth and Mars.

The jump room program resulted, Men-ez explained, from an ET-human liaison project involving the Greys and the US government, in which the young Americans involved were selected by the Greys and then trained by the -IA.

This astonishing re-elation means that Pr-sident Barack Oba-a is a co-tactee selected by the Grey extraterrestrials to participate in the se-ret space program, Mr. Ba-iago commented.

#### **\*New land in time-space\***

According to Mr. Me-dez, the US government has identified 153 synthetic quantum environments - constructed by the Greys in the near Earth environment ranging 400 miles from Earth, on the surface of the Earth, and beneath the surface of the Earth.

Because they contained new land that might be territorially acquired, the US government was actively discovering and exploring these SQEs with a view to making them part of the Unit-d States.

Mr. Me-dez was tasked to negotiate with the Greys as part of his evaluation mission. During the negotiations, the Greys indicated that the system of synthetic quantum environments had been built by them for purposes of conditioning and educating humanity to be able to sustain a future role among organized intelligent civilizations in space and in the inter-dimensional multi-verse.

#### **\*A chrononaut's contrary view\***

In a panel discussion sponsored by  
ExoUniversity.org

## Jumps.

held on June 2nd that included all three whistle blowers Me-dez, Ba-iago, and Sti-lings, Mr. Stil-ings shared his view that the destination the jump rooms were reaching was, in fact, Mars.

Mr. Stil-ings argued that the Martian moons Phobos and Demos could be seen in their proper locations and trajectories in the sky and that jumper Courtney M. Hu-t once stated that the Viking 2 apparatus was about 20 mile away from the jump room infrastructure that the jumpers called the Corkscrew because of its spiral structure. These clues indicated that the jumpers were on the real Mars and not a simulation.
