Subject: World Disclosure Day.
July 8, 2012.

Here are some people who like for us to have disclosure.

.....

July 8, 2012
Press Release
World Disclosure Day - July 8
www.worlddisclosureday.org

Washington, DC - Today is World Disclosure Day.

Disclosure, the formal acknowledgement by world governments of an extraterrestrial presence engaging the human race, is the primary goal of a growing international truth movement. The purpose of World Disclosure Day is to provide a focal point for people and organizations to come together to assert their right to know extraordinary information being withheld from them by their governments - the truth embargo. World Disclosure Day will also help broaden public awareness of the Disclosure process and those organizations involved in this advocacy work.

On July 8, 1947 General Roger Ramey held a press event at the 8th Army Air Force Headquarters in Fort Worth, Texas in which he changed the just released story of a recovered crashed disk near Roswell, New Mexico to that of a retrieved Rawin weather balloon. This was the informal beginning of the now 65-year truth embargo of formal acknowledgement the human race is not alone in the cosmos. For this reason the date July 8 was chosen to emphasize the need to reverse that now inappropriate policy.

People and organizations from every nation can register their endorsement of World Disclosure Day at the WDD website. There are now over 5000 endorsements.

The broad based study of the history and implications of the extraterrestrial presence engaging the human race is called "exopolitics." World Disclosure Day is part of an exopolitical advocacy process.

There is considerable material on the Internet regarding the Disclosure truth movement. Search on "disclosure" and "exopolitics" together. Also, considerable resources can be found at PRG's website:
www.paradigmresearchgroup.org

Note: on the day the first nation comes forward to finally and formally acknowledge the extraterrestrial presence, that day will then become World Disclosure Day (or Disclosure Day) historically recognizing the most profound event in human history.

World Disclosure Day is a project of Paradigm Research Group.
