

Other Centers are planned, they include:

**Center for Thanatology and Survival Research (CTSR)**

The CTST will make continuing contributions to the potential for spiritual development of society and to nurture its fundamental need for understanding the dying process, death and survival.

**Center for Inter-Species Communications (CISC)**

The CISC will conduct inter-species communication research with dolphins and whales with anticipated applications to the research under way in Communications with Extra-Terrestrial Intelligence (CETI).

**Center for Energy Abundance (CEA)**

The CEA will assist in bringing in new energy technologies that will be environmentally safer than current energy sources, cost competitive and ultimately will replace fossil fuel and nuclear energy technologies.

**Center for Independent Creativity and Invention (CICI)**

The CICI will provide a support base for the individual thinker and inventor who because of lack of academic credentials or institution affiliation cannot compete for public and other private research funds.

**Center for Innovative Problem Solving (CIPS)**

**Center for Thanatology and Survival Research (CTSR)**

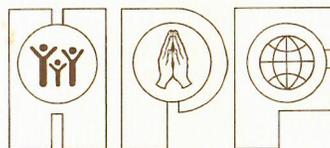

**Center for Inter-Species Communication (CISC)**

**Center for Energy Abundance (CEA)**

**Center for Independent Creativity and Invention (CICI)**

Fax 703/761-4249

**Human Potential Foundation**

### What is the HPF?

The Human Potential Foundation, HPF, is a tax exempt foundation located in the Washington, D.C. metropolitan area. It was founded in 1989, and shares an important mission with many American institutions – to cultivate the physical, mental and spiritual well-being of people.

### Why Was it Formed?

The Foundation was formed because the mission we share is an important one. We believe that we have an equally important, if not unique perspective to bring to that mission; not just in the United States but globally by means of cooperation and leadership with the rest of the world.

### Why Was "Human Potential" Selected as the Name of the Foundation?

William James was but one of many scientists who have observed that we make use of only a small part of our full potential. This strikes a responsive chord deep within each of us. Intuitively we know there is a lot more in us than we realize or even suspect. Now contemporary research findings are telling us the same thing. In other words, we have a lot of unused or undeveloped "human potential."

### What Does the HPF Do?

The HPF makes things happen – through research, education and information programs.

When younger we were taught certain ways of behaving in a world we didn't really understand. Particularly when we

were doing something that required some risk, like crossing a street. We were sometime told, for example, to "Stop, Look, and Listen," before we "Act." That is something of what the HPF does in the adult world of people, things and ideas.

We stop long enough to observe increasingly severe problems that seem to threaten the existence of humankind and the biosphere we share with all life. We look at solutions that have been tried in the past, and we listen to new ideas about the best approaches to solve the problems. Then we act. The Foundation believes that individuals acting cooperatively in moments of peak mental, physical and spiritual performance will identify workable solutions to many of the problems we face. The HPF provides the framework where this can happen.

### What Programs Does HPF Support?

#### **Research:**

Who am I? Why am I the way I am? What can I become – as a person, and a member of society? How can I solve this problem – in my personal life, job, or society? What is to become of me – tomorrow, next year, even ultimately? Important questions, some asked almost exclusively in the solitude of personal reflection, are now more openly considered. The Foundation supports psychological, physiological and spiritual explorations in the quest for answers to questions such as these. And it encourages science to stretch its current boundaries in basic and applied research when considering issues of such personal and societal significance.

The diverse nature of problems require flexibility and innovation in approach to their resolution. Ancient, contemporary and futuristic strategies will be investigated and when validated, employed in specific applications.

#### **Education:**

The fruits of this research will be shared universally through outreach educational programs.

### How Are HPF Programs Carried Out?

Human Potential Foundation programs are carried out through a series of Centers. Some of the Centers are self-supporting. Others will depend upon the Foundation to accomplish their objectives.

#### **Center for Innovative Problem Solving (CIPS)**

The first Center established, **CIPS**, offers a variety of problem solving techniques to both the public and private sectors. The host organization identifies the problem areas, provides responsible personnel and then feedback on results of the problem solving technique used. In certain circumstances Center fees may be adjusted or waived.

Training programs will be offered on well validated problem solving methodologies.

The dolphin is symbolic of the spirit of joy in researching into areas of the unknown that lead to fuller understanding of the totality of human potential.

**Center for Applied  
Anomalous Phenomena  
12409 Hanger Road  
Fairfax, VA 22033**

**CENTER  
FOR APPLIED  
ANOMALOUS PHENOMENA**

A non-profit educational and scientific organization with IRS tax exempt status granted.

The joy of reaching for  
and obtaining what is  
known, is small

Compared to the exhilaration  
of seeking the unknown.

There are no words to  
describe the thrill of a  
glimpse of the once invisible.

The feeling is so exquisite  
that you are sure it is  
unique, even as you pray  
it will be shared.

Dear Mr. Jones:

I was recently informed that you have published a Proceedings for the Symposium on Applications of Anomalous Phenomena which was held last year. I think the readers of our journal Zetetic Scholar would be most interested in having us review this publication, and I would like to call it to their attention. Could you please send us a review copy? If not, could you send us information about how we might otherwise obtain a copy?

I would also be most interested in knowing more about your organization and the symposium itself. We are both, apparently, involved with scientific anomalies, yet I am really not familiar with your activities. Since you, in turn, may know nothing of CSAR, I enclose some materials about us. We are most interested in communication with other anomaly-oriented groups and publications.

I hope to hear from you.

Sincerely,

Marcello Truzzi

encl.

Associate Director  
Ron Westrum, Ph.D.

Dear Scott Jones:

Thanks for your letters of Dec. 10. I look forward to receipt of your Proceedings which I will at least briefly review in Zetetic Scholar. I look forward to reading it, including your explanatory preface, and trust I should get it in the next few weeks.

You asked for a copy of my bibliiography dealing with psychic sleuths (I do rather vaguely recall meeting and talking with you at the PA meeting in New Jersey). I enclose a copy of the working bibliography, which starts out alphabetically but the last part of which is not. I am currently reorganizing the bib, adding some other items, and intend to annotate the whole thing (I have just about everything listed). Our CSAR psychic sleuths project received a major set-back with the recent death of Piet Hein Hoenbens, my principal associate in Holland who did so much to track down the claims of the alleged paragnosts in the Netherlands. Because of other responsibilities, I have let things slide a bit, but the project is now picking up steam again, and I should have some new and important things going again soon. I'd very much like to know more about your own interest in this particular area of psionics.

I will get in touch with Bob Morris (whom I just saw recently at the Society for Scientific Exploration meetings) as regards your Intuition Enhancement Training course. Sounds most interesting. (I presume you have seen Mishlove's recent book on the various psi development programs.)

I don't recall if I sent you any CSAR stuff, so enclose some herewith. I hope you might wish to become involved in the dialogues CSAR seeks to promote. I also send you (a) an application form should you be interested in being listed in the CSAR Directory of Consultants (which will be a sort of "Who's Who" for anomalistics), and (b) a copy of my new Omni article which concerns one of the several monitoring projects I am engaged upon. (By the way, I am now working on another Omni piece on the interface between quantum physicists and parapsychologists. You may know of some work in this area that I have not yet been made aware of, in which case your suggestions or any leads you can give me would be most welcome.)

Please, let's keep in touch. We obviously have common interests.

Cordially,

  
Marcello Truzzi

SCOTT JONES

December 10, 1984

Marcello -

We met at the P.A. meeting in New Jersey, 1983. One discussion we had was on the subject of application of psi phenomena to law enforcement. You told me that you had an excellent section in your library on this subject.

If you have a bibliography of this material I would appreciate having a copy.

Attached is a flyer on a small company I have formed. It is set up to cover research that Kaman Tempo currently has no interest in.

KAMAN TEMPO

Marcello Truzzi  
Director, Center for Scientific  
Anomalies Research  
P.O. Box 1052  
Ann Arbor, Michigan 48106

Dear Marcello:

Attached is the review copy of the Proceedings: Symposium on Applications of Anomalous Phenomena that you requested. Additional copies are available for \$27.00. This price includes postage and handling.

I think that my preface and introduction to the Proceedings adequately explains the intent of the symposium.

Kaman Tempo's interest in this field primarily concerns applications. We do not discuss our customers or any particular application involved.

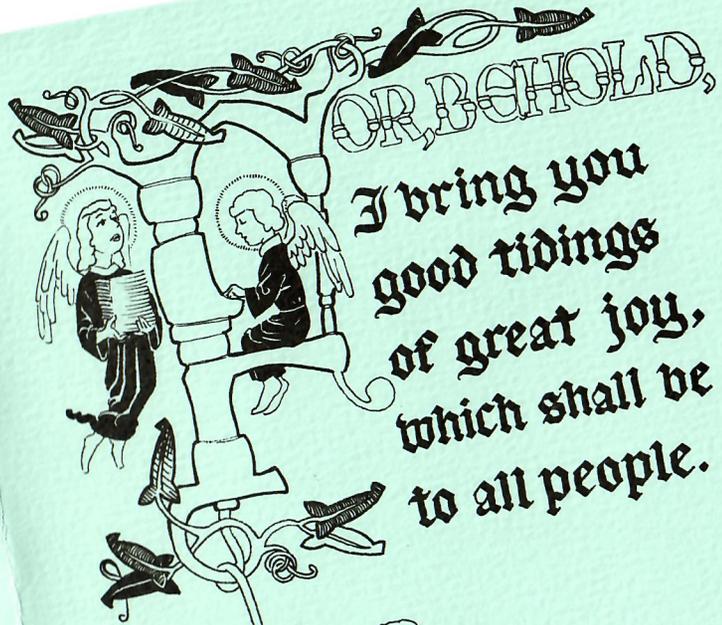

One program that we are public about is an Intuition Enhancement Training course designed for us by Bob Morris at Syracuse University.

We are most interested in following responsible and serious anomalies research.

Sincerely,

  
C.B. Jones

(703) 273-8551 (home)

October 31, 1985

Dear Marcello:

You are not forgotten and unloved. Finally, enclosed is the list of committee members on the NRC's review of Techniques for the Enhancement of Human Performance.

Much of my recent effort has been associated with the symposium that was held last weekend at Georgetown University. It came off rather well as the responsible event we intended. A program and Washington Post new item is enclosed. Attendance was large, frequently over 700 with people being turned away at the door. There is interest in survival research.

Pell will be speaking at the American Anthropological Association meeting. What is your paper about?

I don't know whether I'll make the Stanford SSE meeting or not, likewise for the First Archaeus Congress meeting in Puerto Rico in January. I have the time, but no official travel budget.

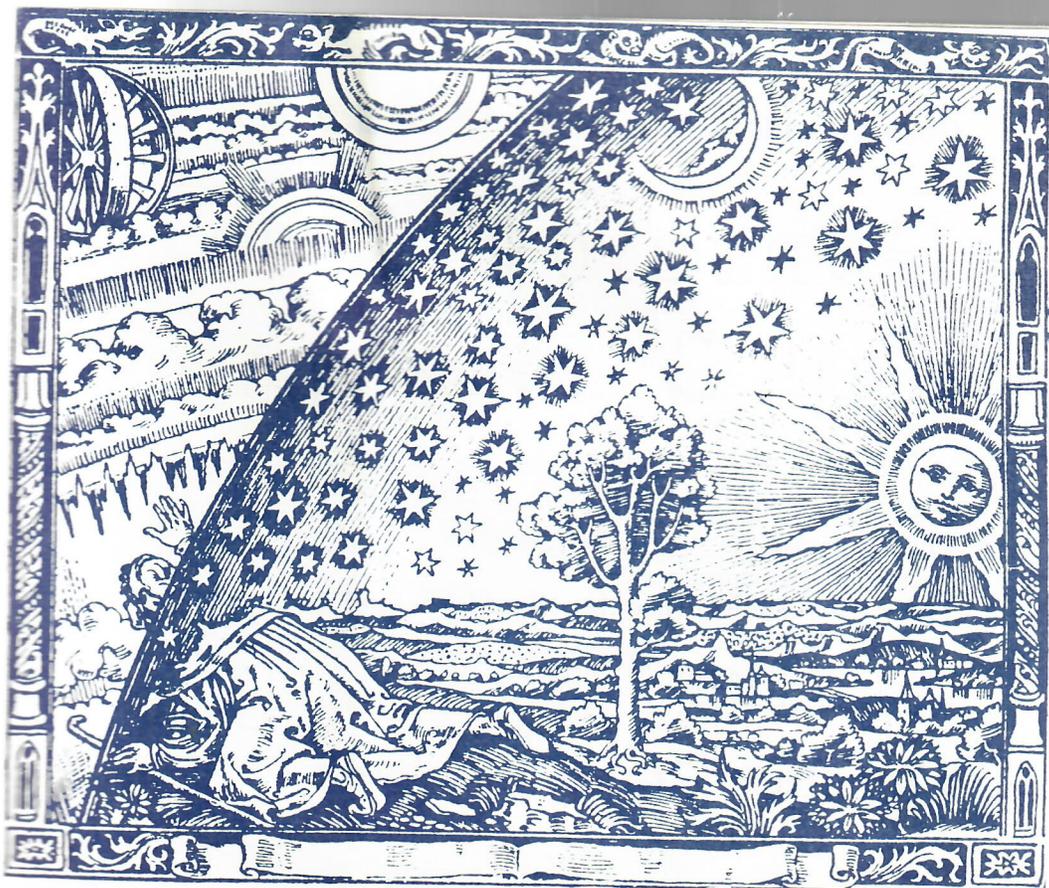

Yes, I have been following the saga of Joe Newman. I suspect that once again someone at the patent office has determined that everything worthwhile already has been invented.

My very best,

C.B. Scott Jones

Planned in cooperation with  
**The Office of Smithsonian Symposia and Seminars**

Gaston Hall, Georgetown University  
Washington, DC

## October 26 & 27, 1985

**Questions** from the audience during the **Discussion Panel** periods will be taken from the microphone set up in the center of Gaston Hall.

A collection of formal papers from this symposium, edited by Bishop John S. Spong, will be available at a later date.

**Audio cassette tapes** will be available following the Symposium.

Concurrent with the Symposium is the acclaimed exhibit **Continuum — The Immortality Principle**. This exhibit, with material drawn from science, philosophy, art, religion, psychiatry, parapsychology, and technology will be set in Copley Formal Lounge and is open to the public. Exhibit hours: Saturday and Sunday, 9:00 am to 8:00 pm.

**Box lunches and drinks** are available for \$6.00. They will be located in the Hall of Nations, Walsh Building, 36th and Prospect.

A **reception** in the Galleria of the Intercultural Center for all Symposium attendees and speakers will be held immediately following the Saturday program. A dinner for patrons and speakers will follow at 7:00 Saturday evening.

**Parking** for the Symposium and the Continuum Exhibit is available in Georgetown University Lot #3. Entrances are on Canal Road and Prospect Street.

For information about post-Symposium availability of the **collected Symposium papers, and audio cassettes** of the speakers, write the Institute of Noetic Sciences, 475 Gate Five Road, Suite 300, Sausalito, CA 94965, (415) 331-5650.

# The Program

August 30, 1986

Dear Scott:

Thanks for sending me the Wallach article and for nudging your associate to respond to my letter to him.

You likely already know of the enclosed article, but I only recently came across it and send it in case you missed it somehow.

Are you following the Joe Newman affair? It is taking some interesting turns. He reportedly has turned down a billion-dollar offer and has now been given large quantities of land by the state of Mississippi to start building his factories to manufacture his "free energy" devices. Does Senator Pell have any stand on the Newman attempts to get bills through Congress for his patent? Though I still doubt that Newman's machine really works, it does look like the Bureau of Standards goofed on its negative test results. I gather a great deal has been happening this last month. I am even told (uncorroborated) that 60 Minutes has decided to do a show on Newman after all. (Presume you have seen the current Life magazine story on Newman.) If you get into this business, I have a lot of stuff on Newman (as well as other alleged cases of suppression of inventions.

I just got back from the D.C. area (I am the consultant on the new Time-Life Books series called Mysteries of the Unknown) and expect to get back there again in a few months. If so, perhaps we could get together for a chat then.

Thanks again.

Best,

Marcello Truzzi

Marcello Truzzi  
Center for Scientific Anomalies Research  
P.O. Box 1052  
Ann Arbor, MI 48106

Dear Marcello:

Thanks for the "Tesla Connection" article. I had not seen it. Maybe it will be worthwhile to subscribe to Defense and Foreign Affairs, the editor appears to have an interest in anomalies.

Why all the conflicting data about Newman? Who is involved in disinformation and why? If his device doesn't work, and the Bureau of Standards assures us that it doesn't, why would someone offer big bucks for it, and why would the state of Mississippi give him land to building non-quacking wooden ducks? Marcello, please sort all of this out for us!

As far as I know, Pell has not taken a position on Congressional action to get Newman a patent.

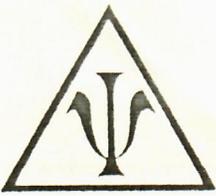

As I mentioned at the P.A. conference, I want to identify people like Newman who assert that they are getting psychic inputs about energy systems to be developed. I don't have any interest in trying to work with Newman. His voice and actions are too much above the noise level. I want to very quietly assemble a like-minded group and let them talk to each other about what they are getting, and then decide what to do about it, if anything. Any ideas? Yes, I am interested in cases of alleged suppression of inventions.

Please let me know when you will be in Washington again, and set aside some time so we can talk.

My very best,

C.B. Scott Jones

Dear Scott,

Don't know if you are familiar with Jack Sarfatti. I have just urged him to get in touch with you. Jack is a mathematical physicist with some very original quantum ideas, and he has apparently just received a large grant for his work (which involves action-at-a-distance and faster-than-light travel which, if true, would make all sorts of things possible including psi, time travel, etc.) from a United Kingdom source. (He may even take his work to Cambridge University to work with Brian Josephson.) Anyway, I think you and Jack should know one another. Among other things, he has some very influential friends among the Reagan camp, like Caspar Weinberger's son. Jack has some exotic ideas about disinformation activities in the psi area (colored by his earlier association with Werner Erhardt), but he is basically reasonable and probably a genius (whether or not his physics ideas are right). Anyway, I hope you two will communicate at some point. I have just sent him your address. Jack, by the way, is not an advocate of psi, and in fact is rather critical of psi work having been a bit burned early by Geller, but his theories are most hospitable to psi and especially precognition. Jack seems to have been in touch with many in the defense department since he thinks his ideas have much potential for SDI, among other things.

Do you by chance know anything of a Harold Chipman, apparently an interesting CIA link to SRI?

Jack's address: Jack Sarfatti, Ph.D.' P.O. Box 26548; San Francisco, CA 94126.

At this point, my next visit to the DC area for Time-Life is not determined, but I definitely will try to arrange a get-together with you next trip.

Can you tell me anything about the Japanese Ministry of Posts and Telecommunications new committee looking into applications of psi? I am doing all I can to learn more about Japanese psi efforts; I had not realized until recently how much legitimacy parapsychology has in Japanese academia. Japanese interest in psi may turn out to be an important new lever to encourage U.S. support in the area.

MEMORANDUM

August 21, 1986

Dear Marcello -

Attached is the article you  
asked about at the PA conference  
Wallach's telephone number is  
(818) 882-7128.

I pulled Claybey's chain, you  
should hear from him soon

Regards

Scott

United States Senate

MEMORANDUM

May 21, 1987

Dear Marcella.

Here are copies of news  
clip on the current Geller  
play.

Today was a good day.  
No reporters called!

Do you have items different  
for these?

Regards  
Scott

# United States Senate

## MEMORANDUM

November 19, 1987

Dear Marcello,

Enclosed are the two Bearden papers. I liked the New & one. With all the links he makes in it, surely someone in the theoretical physics field can check it out.

PENGUIN stands for  
Psychic Exploration, New Government  
Undertaking In Noetics.

I actually headed the operation with the cover name of Rexford Daniels. At the time I was a natural red head and 6'3." Considerable surgery was necessary to trim me down to my current size. Few people now

recognize me as Rexford. Even I  
forget it most of the time.

Rex

Marcello Truzzi  
Tpsicanti, Michigan

Marcello -

Sorry these flyers didn't get mailed Friday, as I thought they would be, but it gives me a chance to comment on the ~~Snowman~~<sup>bird</sup> code word. I was told that there wasn't anything new out with this code word in it, but that there had been a document circulated a number of years ago that carried that name, or had it in the text. I will try to get a copy of it (old or new) and will send it to you.

The current DOD phone book does not have a Major or Major General (or any rank) Michael E. Kirby in it. Do you have a phone number for Lee Graham at AeroSet?

Regards

Scott

United States Senate

MEMORANDUM

9 Mar 88

Marcello -

Thanks for the "Stealth - and Beyond" article from Gung-Ho.

It had to have been written by an insider, probably more than one. I would speculate someone from Lockheed and the Air Force.

The author "Al Frickey" is an insider code word used by a pilot aboard a Stealth type aircraft when he is having an emergency. It is used instead of "May day."

The Alien Technology Center and its reputed role is intriguing, but

almost too blatant, to be accepted  
at face, i.e. "alien" value.  
Of course, people do have a sense  
of humor, and it does feed  
another ~~human~~ rumor - that  
there is a group inside the  
Air Force that wants the "truth"  
to be told.

Regards

Scott

Falls Church, VA 22042

Dear Scott,

As I am sure you know, Dr. Robert McConnell has been circulating memoranda concerning his views and interpretations of recent management issues at the ASPR. I must admit that the manifest facts he presents make a compelling argument to me. However, I of **course** recognize that I have only been presented with one side of the controversy. Since there are probably position papers by you that have been put forward in response, I am hoping you might share these with me so that I can better evaluate these matters for myself. Since it seems likely that I will eventually be writing something about all this in either ZS or the also upcoming CSAR newsletter, I would like to better know the facts about all this. I don't know to what degree McConnell might be incorrectly representing matters, but just on the face of it, his concerns seem quite serious to me.

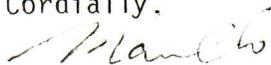

I also thought I should drop you a line to inquire if you have seen Robert J. Durant's unusual paper about you and your activities. If not, I could send you a copy. If you have seen it, I wonder if you've commented on it anywhere.

I hope you saw the Wall Street Journal piece on the new funding for cold fusion research. I am amazed at the fact that the main research in this area is being done by the Japanese while we stupidly continue to act dismissively. I hope you or someone is bringing the new research in this area to Senator Pell's attention. It really looks like cold fusion is real based on the recent replications.

I trust you also have seen Jessica Utt's marvelous piece in Statistical Science on the meta-analysis issues in parapsychology. I hope it gets widely read.

Did you see Uri while he was in DC desposing Randi and Kurtz? I understand their depositions were a smashing success for Uri. Uri is now in Tokyo getting more ammunition re his case against Randi there.

Cordially,

Marcello Truzzi

C. B. Scott Jones' celebrated claim that he "honestly did not know of any activity of the U.S. Government [in the field of UFOs]" has now been surpassed.

He has just indicated that the government is prepared to act violently against citizens who aggressively pursue information on UFO cover-ups.

We invite your attention to the first paragraph of page 68 of his paper. (C. B. Scott Jones, "Controlling Government Response: Self Interest in a Nation State System," Proceedings of the International Symposium on UFO Research, Denver, Colorado, USA, May 22-25, 1992, pp. 59-83.)

Given his previous "know nothing" stance one wonders how he could write that paragraph. The remainder of his paper gives no clue. His statement is of particular interest because Jones was on the staff of Senator Claiborne Pell for six years. Pell is chairman of the Senate Foreign Relations Committee, and he now serves on the board of Jones' Human Potential Foundation and also funds it.

Citizens should be concerned, and the media should be encouraged to contact Dr. Jones and Senator Pell and demand an explanation for this ominous proclamation.

Cecil B. Scott Jones, Ph.D.

Jones' paper also presented data from remote viewing by Psi Tech. Those desiring background information might wish to consult the widely circulated paper "Will the Real Scott Jones Please Stand Up?" by Robert J. Durant.

### Controlling government response

The first half of this double-entendre was covered above when the issue of secondary and vital national interests was discussed. I attempted to describe a basis for government action. The second half is very straight forward. What can the UFO community do to influence and control government policy and action vis-a-vis the ET/UFO enigma?

There are several separate steps to be considered.

At least some in the UFO community must do responsible, science based research.

At least some in the UFO community must assume a broader Western scientific paradigm and a different controlling metaphysics for their research.

These two groups and their work should be well know to each other, and may not be different organizations or individuals.

Evaluate whether or not a nation's knowledge, however thorough or skimpy, about ETs/UFOs is perceived by them as related to a vital or secondary national interest.

Independent of government seek special knowledge about ET/UFO activity.

Establish a system whereby such independent knowledge can be aggregated and shared within a group that agrees to standards of use and security.

Take security steps to assure that the information gleaned is safeguarded against all potential hazards of its destruction or disappearance.

Open and maintain a dialog on research activities with various parts of governments of different countries.

In the United States, establish a dialog with the President's Science Advisor, President of the National Academy of Science, Secretary of Defense, Secretary of State, Director of Central Intelligence, Director of Defense Intelligence, Director of the National Security Agency, heads of Army, Navy, Air Force and Coast Guard Intelligence, Director, Federal Bureau of Investigation, Chairman of the Senate Committee on Appropriations, Chairman of the Senate Committee on Armed Services, Chairman of the Senate Committee on Commerce, Science and Transportation, Chairman of the Senate Committee on Foreign Relations, Chairman of the Senate Committee on Government Affairs, Chairman of the Senate Select Committee on Intelligence, Chairman of the House Committee on Appropriations, Chairman of the House Committee on Armed Services, Chairman of the House Committee on Foreign Affairs, Chairman of the House Committee on Government Operations, Chairman of the House Committee on Science, Space and Technology, Chairman of the House Permanent Select Committee on Intelligence.

It is considered critical to be clear about motives when launching this effort. I suggest that if there is an intent to embarrass governments for acts of commission and omission on this subject, we can expect a domestic response equivalent to the international one when a massive loss of face potentially is involved, i.e., war - a readiness to destroy property and take lives.

If we are serious about making a positive contribution it is essential that we be smart, diligent, absolutely honest about motives, non-judgemental, and imbued with an ethic of service to life throughout the Universe.

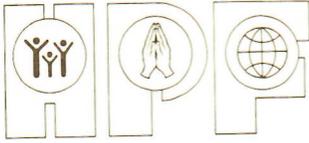

In the United States I assume that up to this point all detailed knowledge in government about contacts with ETs has been held to a small number of individuals exclusively in the Executive branch. A much larger number in all branches of government and outside of government probably have been given some information over the years, but this has been part of a program basically to limit the spread of precise information and to spread disinformation. There is at least circumstantial evidence that for a few years this policy has been under review. One of suspected options under consideration is to make broader dissemination of the information, i.e., to selected members of Congress, and perhaps even anticipating a general public statement.

This cannot be substantiated, but there is some likelihood that the government's policy in this area is now viewed by some keepers of the keys as a failed policy, and there may be an impulse to change it. However some elements of the prior policy, especially keeping Congress in the dark and the massive and successful disinformation program make changes appear to be very dangerous.

A responsible private effort to gather and share information at this time may be helpful to the government. If this is so, some government assistance may come forth and organized government resistance to the independent effort would not materialize.

An example of an attempt to generate new information in this field illustrates several points. The first is that there are viable human technologies available for use that are not controlled by government and are well known around the world. The second point is that by selecting an incident that took place in Russia and known to be of continuing interest within that country's scientific and political community, the project is internationalized. This is considered to be an obvious basic requirement. Essential pieces to this puzzle are expected to be found around the globe. Different governments will have different attitudes toward this information depending how vital they consider it to their interest. They all will expect something in return for sharing what they know. The common currency will be information that they don't have, and an assessment to be assembled and shared based upon the best information from all countries.

Dear Marcello:

Sorry to have failed to provide the attached Foundation pamphlet when you first requested it, but here it is.

I should have mentioned last evening when we were talking about your book going into paperback that I have been a vigorous promoter of it. Whenever the issue of applying psychic phenomena comes up I urge all discussants to buy a copy of your book and learn about the facts and fallacies in an important application area. I will purchase a number of the paperback editions and give them to people that I want to have something solid in hand.

My best personal regards.

Sincerely,

A handwritten signature in blue ink that reads "Scott".

C.B. Scott Jones

## MEMORANDUM

December 3, 1987

Marcello -

Attached are copies of today's NRC press releases and an order form for their 300 page report.

Also enclosed is a copy, pp 22-23 from their Findings and Conclusions on Parapsychology.

I find the wording of their principal finding most extraordinary and full in the realm of metaphysics. "The committee finds no scientific justification from research . . . for the existence of parapsychological phenomena."

Does that mean that they suspect or find justification for existence <sup>of psi phenomena</sup> from areas other than research?

Does it mean that the "religion"  
of science cannot/will not admit  
psi phenomena inside the tent  
(the phenomena)  
whether or not it exists??

Too bad they don't realize  
that the Maimonides Medical  
Center no longer is in the psi  
research

My best

Scott

Well, the National Institutes of Health in Washington has finally come to its senses! This morning, assistant director of NIH Operations, Dr. Avril Bouffon, issued a press release announcing that the recently-formed Office of Alternative Medicine within the NIH was being shut down as of June 1, 1994. Dr. Bouffon referred to the work done so far by the OAM as "a crock of nonsense." She declined to name specifics, but remarked that the larger part of the funds spent to date by OAM have been "squandered on projects less likely than the Tooth Fairy to produce useful information on health care in the U.S.A." We note with delight that as a result of Dr. Bouffon's action, both Walter Stewart and Dr. Ned Feder -- who have been prominent "whistle-blowers" in the Washington scene -- have not only been reinstated with NIH, but will be heading up a new Office of Alternative Belief Systems, scheduled to begin operation on this date in 1995. It is expected that any funds left in the OAM account will be allocated to Stewart and Feder for furnishing their new quarters at NIH. Sometimes the Good Guys win!

James Randi.

CloudRider Report: "UFOlosophy and UFOlopothy on the Internet!"

(Re: Richard Boylan's inquiries about me? Here I am.)

Yes. Zing this over to him, then ask him to contact me direct. Those in the know will know it's all factual. I did staff Jones' and Rockefeller's "UFO Initiative" to the White House Science Advisor. Don't make too much of this, as their two visits (3/93 and again on 2/4/94) mostly were primarily courtesies the WH extended to Mr. Rockefeller (who is now 84), who was & is all pumped up about "Roswell" by Jones, and has been funding Cdr. C. B. Jones (USN-Ret'd), as well as partially now the BSW Foundation, Inc., and Dr. Steve Greer and his Project Starlight. There was/is more behind it; can't say here, just now. Pending.

I also prepared the "Matrix of UFO Beliefs" and its appended "Possible Government Involvements in UFOs" listings, as well as an annotated bibliography which accompanied these various materials into the White House (4/93), as far as I know...and as Jones and Rockefeller both said that they did, and as Science Advisor Gibbons also acknowledged in writing. These should all be public records, as should Mr. Rockefeller's personal letter of February (13 or 14), 1993 to White House Science Advisor Dr. John Gibbons. File a "FOIA" and get them, is my suggestion to anyone interested. Dr. Gibbons has no reason to side-step it.

(Former-CIA source) said there reportedly was also a private letter from Mr. R. to President C., but a "cover" letter may have been jimmied up by Jones & Mr. R's attorney, Henry L. Diamond, in Washington. Diamond accompanied Mr. R. and Cdr. Jones on both visits into the White House. They may have used his name.

Prior to Mr. R and Jones' first WH visit, Dr. Gibbons allegedly received a "UFO Briefing" paper, dodged up by Bruce Maccabee, (U. S. Navy scientist), which was primarily a "throw-away" for "public consumption," and which was requested of Maccabee by Dr. Ron Pandolfi, alleged (by Phil Klass, in his newsletter) to be a CIA

staff rocket scientist who unfortunately has the sad duty of monitoring "UFOlogy." It was quietly reported that Dr. Gibbons (and perhaps others) also received what some say was "a real UFO briefing" from (another former CIA scientist), and that this briefing was very classified. Of course, undoubtedly it was NOT about "UFOs", as "UFOs" are not really about "UFOs," as well we now know! (We'll get to that.) Ask President Carter.

Maccabee's "briefing" for Gibbons was a big joke, (old "UFOs" from Blue Book days). Especially funny, since back in 1983 (we learned later), Dr. Jack Gibbons' then-staffer (when he headed the Congressional Research Service), Marcia Smith, prepared a very lengthy "UFO Briefing" booklet (1983) for the "CRS," which even had a 1980 "UFO" report bound into the back of it from the infamous Special Agent Richard Doty, AFOSI, (then at Kirtland AFB. This was long before Rick Doty and Linda Moulton Howe had their now notorious (1983?) "tete-a-tete" in the secret room where Linda alleges she was shown "highly secret" stuff about "The Grays"). Marcia Smith is now a senior U.S. "Russian space" analyst. Linda Moulton Howe is...well, she's still "Linda."

On their second White House visit, Mr. Rockefeller (et.al.) all got a "courtesy tour" of the WH private quarters & met Mrs. C's top aide, Margaret Williams, etc. Nothing "UFOlogical" or high level about it, despite Jones' since making a huff of stuff as if he's taken seriously. He absolutely is not...but I believe THAT is virtually a camouflage for his actual "mind-control" cover. He's too smart, and he's VERY heavy into psychotronics; former DIA and Defense Nuclear Agency. We do have some of his original "psi" documents and correspondences, which we have already turned over to the appropriate agencies. Pell's office seems to have been an "internationalista spies nest," routed out with Helms now in power. Jones is either "one of ours," (like James Bond, valiantly seeking security for good old America with Hot Oil Massages: surfing Hot Tubs Around the World with Needful and Deserving New Age/UFO Women) or he's an "intelligence mercenary," working primarily for Mr. Rockefeller and Prince Hans-Adam of Liechtenstein, (a "UFO/ETI buff," and a major EU figure, billionaire industrialist and head of state in his small small but bankerfully important country, and a U. N. vote, too).

Hans-Adam provided the final funding for the Fund for UFO Research's "Witnesses to Roswell" videotape, which helped the hype of this unmistakable "Big Lie" disinformation scheme, which took more than a decade to lay out...only to fail at the last minute because various patriotic folks uncovered the lame scam and blew the whistle. We'd found them...or rather they'd found us...and after validating most of it, we confronted Jones (and through him, Mr. Rockefeller). They responded by putting Jones' "HPF" into his basement, and covering it all up with mud and Jones' bogus "Cosmic Cultures" conference set for May, 1995, in Washington. Note that Jones does not now make any public reference in his HPF promo materials to Mr. Rockefeller and his funding. Kaput. Like a dinosaur. He's a "wizened wizard."

Jones is now using up the last of his final batch of money,

capping more than \$700,000 he had received from Rockefeller alone since 1991. That last "Rockefeller donation" to Jones was in stock worth \$140,000 "HPF" received in January, 1994, and of which Jones put \$20,000 straight through to Greer's "C-SETI." He laid off our small staff and closed HPF's Falls Church offices, and hoped that we wouldn't survive long enough to figure it all out, report it appropriately and now put it wide across the Internet. And soon, perhaps, before Congressional committees too. Unless Rockefeller has the clout to block us, the way Don Ware says Dan Sheehan told him Rockefeller is trying to get Harvard off John Mack's back. (Power is as power does, Forrest! "But once you use it, you lose it!".... Rob't Byrd.)

Hans-Adam's "Roswell" money (and earlier, pre-"HPF" money he gave to Jones; HPF was founded in 1989, started up in 1991), was funnelled in and through another of Jones' non-profits he runs now, out of his basement. Called the "Center for Applied Anomalous Phenomena," it actually is only a phone answering machine to field calls from folks reporting their "paranormal" experiences to Jones. It was listed under "Parapsychology" in the Northern Virginia Yellow Pages. It had been Jones' "cover" and fiscal funnel for his off-budget funding and travels from when Jones served as "Special Assistant" to Senator Claiborne Pell, 1985-1991. In that slot, Jones fed into Pell's interest in "parapsychology" by running various psychics and healers in for private sessions...but again, these were "silly science" covers for their primary interests. Uri Geller (and The 9) also visited.

Al Gore is a friend of John Alexander's and acquaintance of Jones. Alexander and Gore reportedly took a Neuro-Linguistic Programming course together in early 1980s, according to Col. John Alexander's (and Janet Morris') book, "The Warrior's Edge."

These people are NOT about "UFOs." The question does remain, whether they are about America. Alexander is at Los Alamos, running "Non-Lethal" system development under Dep. of Energy. (Gosh! What a coincidence with all of this "Rockefeller" stuff!)

I also helped to organize, suggested the speakers invited, and took part in a much-misrepresented private "UFO" symposium which the Human Potential Foundation organized for Laurance Rockefeller in September, 1993, held at Mr.R's "JY Ranch" in Jackson Hole, Wyo. Far from a "high-level" planning session as some who were there have made it out...it was primarily a "UFO circle jerk." Most of the sessions were taped; Jones has them.

We had heard as early as November, 1993, that people were saying "There was a general there..." and that Greer had some contacts with "the President." I was at this meeting; and while there were some such references, no "general." And no "plans" other than the Jones/Howe/Mack/Greer "gray cult" scenarios. Sources in Maryland MUFON and Gulf Breeze laid these fantasy tales at the tiny slippered feet of Linda Howe, who denies it.

And Greer has yet to "deliver" on Pres. C, who has his other worries. (Laurance Rockefeller was prominent among listed

contributors to Clinton's "legal defense fund", and was shown by name in the Washington Post story about it recently.)...other than Greer's whole "cult scenario" in which the heroic, central figure is (surprise, surprise) Dr. Steve Greer, Earth's chosen emissary of the "aliens," and cannonized (it is written) in Linda Howe's latest book. (Wherefore, Alien-Nation? Arise!)

And the Clinton White House had been independently briefed on the shenanigans of Jones & Company on the day before they went into the White House on February 4 for their second "UFO" visit, by me. I had my own contact, and used it. (I have a letter of acknowledgment and "thanks"). The correct people do indeed "know" about these megasillies. Now they seem to be leaving us alone to mop them all up. Unless Dr. Mack can produce some "aliens" pretty quickly, "Crash Go the Saucers." Now...for some of us cynical guys, we nonetheless do feel that many "source phenomena" of so-called "UFOs" or "ETIs" merit study as Hynek and Vallee and others have sought for years. But we have been looking into whether, and to what degree, so-called "UFOs" and particularly the "alien abductions" are and have been "covers" for cultish "sex nasties" perpetrated on (primarily) our women citizens, for purposes (unstated for now, in this venue). It is all like an "onion, layered within layers," and the "silly guys" like Jones, Mack (and even perhaps \*\*\*\*\* and others in that ol' "UFO/Massage & Gray-Hugging Network?) are the most serious in terms of being the ones to "watch." So we're all "watching," aren't we. And being watched of course. It is the way of things.

Yes, "they're" watching us too, watching them, watching you!

At Rockefeller's ranch meeting, also present for the day and a half of sessions were: John Mack; Linda Moulton Howe; Steve Greer; Dr. Leo Sprinkle; Bruce Maccabee. Oh, yes. And Mr. Robert Bigelow, himself, of Las Vegas. Besides myself and Jones, who moderated for Mr. R., the other HPF associate present was Bob Teets, then HPF's publishing consultant and author (separate from the HPF) of the recently published and excellent "West Virginia UFOs: Close Encounters in the Mountain State," (Headline Books, Inc. 1994.1-800-570-5951 to order). Bob Teets also had managed the HPF's publication of Dr. Bill Baldwin's "Spirit Release Therapy and Past Life Regression Manual," published in June, 1993. My name is listed in both of these, as well. It's my "I was there!" graffiti. And both of those books were honest efforts. HPF apparently funded Dr. Baldwin's book primarily for Jones to wrap himself in more "covers," is my current assessment.

I also am listed in the "Acknowledgments" of Dr. John Mack's first edition of "Abduction," published in 1994 by Scribners. I'm listed as "C. Richard Farley." You will see C. B. Scott Jones and Laurance Rockefeller also listed, among a host of others. I was not asked by John prior to this inclusion, nor did I give my permission. Now I'm sure John wishes he'd left me out, as well. Probably will in the paperback book, said to be emerging soon. Jacques Vallee is there too. He went to one meeting I know of.

But, I was listed as "contract liason" between Jones' Human Potential Foundation ("HPF", where I was Director of Project

Development, 1992-1994) and Mack's "PEER." The "HPF" was the funding conduit for \$194,000 Rockefeller dollars funnelled to Mack's "Center for Psychology and Social Change," a 1980s hold-over Harvard-affiliated non-profit "peace" foundation.

I also helped Karen Wesolowski, executive director of Mack's "PEER" organization (and whom I do believe has been deceived by Mack) in her earliest days of setting up, and with some of her media strategizing, before (in my own perception) any of us suspected that Mack and that whole "company" of Jones and Rockefeller, et al, were up to "something else." It is still our supposition that many of the "abduction" phenomenologies and hypno-regressions are also "something else." Mostly confirmed.

All of my own primary files about this have long been in the hands of appropriate intelligence agencies, military and law enforcement agencies, as well as two congressional committees.

We are having no problems proceeding with these journalistic and legal inquiries into "what has been going on." I am not, nor have I ever been, an agent or knowing asset for any of these. I am simply a working journalist and public policy analyst, with a nearly 20 year history of published articles and news stories in various venues, some with internationally known non-profit organizations, principally in environmental & political affairs.

For a series reporting alleged misappropriation of non-profit funds by a now-former university president, I was awarded the "Mark Twain Award" for Investigative Reporting, given by the Associated Press (1990) in Maryland, Delaware & Washington, DC region. I am writing a book about my experiences with the so-called 'Human Potential Foundation,' and its many & varied shenanigans, and about the "White House/UFO Initiative." All of these intentions and my primary documentation about all of this have previously been shared by me with Mr. Rockefeller and his minions, some of whom do seem to be fine fellows. I am also researching linkages between alleged "occultists" and various American magazine connections, and between the U. S. military and the tabloids, where disinformation is obvious, but often sinister. Leo Sprinkle's career was thus smashed by his front-page appearance with an "alien head" in Weekly World News, in October of 1988. Interesting, don't you think, that so far, neither Jones nor Rockefeller have fallen victim to these kinds of "ambushes" and jocular stories like "12 Senators are Aliens," along with "Hillary Adopts Alien Baby." Think about it.

Actually, that's all just about finished. We've got 'em now.

My summary thesis is that a lot of this "UFOlogy" has been simply "cover ops" for various counterintelligence, military or disinformation (and perhaps foreign penetrations) of U. S. air technologies and our mind-influencing capabilities, as well as related "countermeasures design and testing." All legitimate missions? Only if conducted inside applicable U. S. intelligence charters and laws. "UFOs" are primarily "outside the charter" stuff, and apparently have led to sexual abuses by principally Intelligence "consultants" (not much in an oversight purview of appropriate

Congressional committees), and where the alleged abuses of U. S. citizens (and others) have been taking place.

Also, it appears that there is a fairly wide-spread network of "therapists" using "New Age" and "alien abduction" scenarios as sex-victim-sources for "hot oil massage" and the seemingly inappropriate abuses of the client-therapist relationships. We are not ready to publish how far this reaches or details, but a class of "victims" is now being assembled for possible future litigation, and anticipated Congressional hearings into it all.

Recently, Glenda, from another source I received a 21-page download from your Searchnet HQ, of entries from an Internet newsgroup (alt.alien.visitors // 25 Jan 1995). It included the "Lobster" materials put out in 1992 about Scott Jones and John Alexander by "Arman Victorian," and most of that information is indeed on target, from my first-hand "Jones'" confirmations. (Only major screw-up...Victorian lists "Janet Morris" as having a husband "Robert," who Victorian says is a judge. Janet Morris is currently married to Chris Morris...to my knowledge this is not a new marriage. ..and together they both work for the U. S. Global Strategy Council as consultants (Janet is the Research Director there), and on their various "sci-fi" books. Cool dudes.

Their latest in that genre is called "The Stalk," and it is all about "alien diplomacy" across dimensional frontiers. It may or may not actually be fiction. Anybody not reading this book is missing the same kind of information it is likely "The Gov't" is getting, perhaps from some of the same folks. Janet and Chris are brilliant and concerned about the future. They publicly have expressed concerns that John Alexander (and others) may be developing "other things" under "black project" wrappers, and you can read more specifically about the Morris's concerns in Alvin and Heidi Toffler's 1994 book, "War and Anti-War." The Tofflers devote six pages to Janet and Chris Morris's thinking.

Let's end on this note, since we're in "Toffler" land. Who else in the news today is a "Tofflerian?" Right. The "Newt" Gingrich. Space-alien Speaker of the House, himself, according to last week's Weekly World News cover story. Who DOES he work for?

According to Janet Morris (to me personally, in conversation March, 1993, in Scott Jones' home basement, Falls Church, VA), when "The Newt" was having trouble wrapping up his first real book, in 1984 or so, (entitled "Window of Opportunity"), the publishers called upon...none other than Janet Morris...to help "The Newt" finish that tome. It's hard to find copies. Look hard.

As noted, Janet told me this herself as we were sitting in Scott Jones' basement decompressing after the 'HPF' had just hosted two visiting Russian "mind-influencing" scientists, Dr. Igor Smirnov and his software compadre, (Sergei). That little venture was called "A Symposium on 'Psycho-Correction'," and it was non-classified and attended by reps from every intell agency we have...and probably some we don't have "officially."

Now get this, conspiracists. Some of the folks in this mess are serious scientists, planetary patriots who spend every day working for the Constitution of the U. S. of A. But others are "contaminated" with crimes or abuses in their pasts, and are most concerned about protecting themselves or their funders from disclosures and accountability for their excesses. Still others publicly proclaim that they have or are in ongoing contacts with "non-human intelligences," offering a variety of scenarios and global futures, if only we'll "sign on with them."

That game is not at all about "UFOs." Those issues have been floating around, (pardon the pun) since before Moses and God set "lightning to stone tablets" and began making up the rules.

All of Earth's planetary religious traditions do have similar "source phenomena," including Steve Greer's "Transcendental Meditation" and his more recent Baha'i Faith, with its serious one-world commitment and martyrdom of thousands in Iran.

Louis Farrakhan talked about his own "UFO" experience, in which he was taken up into "a craft" (actually, Minister Farrakhan recalls only a room with a speaker-like box in its center), where he met with Nation of Islam (then deceased) founding prophet The Honorable Elijah Muhammed, as well as with Ezekiel, Moses and Jesus. That is a quote, not at all meant in slander or disrespect. He told this to more than 10,000 of his gathered followers in Washington, DC in 1989, and repeated it for a team of Washington Post reporters in their interview with him published as a Page One story in the Post of March 1, 1990. The actual quote about "UFOs" is on Pg. A-3.

Steve Greer and his ilk do "believe" in what they are doing. Many of them are certainly being manipulated...our challenge is to ascertain by "whom," or maybe even "by what?" To what end.

Nobody has "the answer" that works in the framework of the U.S. government, and some of these "Big Boys" who seriously do believe it is their destinies to "run our world" want to make sure that if there are any "deals" to be made, with whomever it may be (God, The Council of Nine, John Mack's "Grays," or the "Zeta Reticulans"), our planet's "priest-kings" want it clearly understood that THEY will make any deals, for the rest of us.

I don't know about you, but who elected Henry Kissinger or Mikhail Gorbachev to "speak for Earth?" Or even Carl Sagan, who already had the ego to draft up our planet's first banal "LP" to the stars, without asking anybody else much about what we should say... or even, whether we should say it at all.

All of you already "know" most of the answers, and it is your "UFOfears"...hyped by the web of spies and manipulators, cheap shot authors and mind-benders....that keep you from accepting what you already can see.Cut through the hype. Think. It "is!"

That is all "we" did. We kept asking ALL the questions, until "they" finally began to show their hands...or their "talons," as the case may be. We are still "alive" because it's still America.

> So...what is "The Answer," I'm frequently asked by folks who have  
> reviewed our "Matrix of UFO Beliefs," (not to be confused with the  
> paranoid telephone book sized four-volume set out of Las Vegas and  
> Oregon, which hopefully are not true...whew!).

> What I tell those inquirers is what we've come to see, from the  
> evidence:

> It's "all of the above," friends. The issue is, to what degree?

July 5, 1995

Marcello Truzzi  
5010 Willis Road  
Grass Lake, MI 49240

Dear Marcello,

Enclosed is the program and questionnaire given to the 175 wonderful souls who attended the conference, *When Cosmic Cultures Meet*. About 100 completed the questionnaire. I am doing an analysis of it and will send a copy of a "completed" questionnaire (with the best responses) to all members of Congress along with a short, less than one minute to complete, questionnaire for them. The objective is to get Congress involved.

The conference was the capstone on two years of quiet conversation with the White House urging them to change the policy of silence and secrecy concerning UFO phenomena that they inherited from previous administrations.

Intellectually and politically the conference was a success. Financially we failed to cover our expenses. There are still some skills to master.

I am working on editing the proceedings of the conference. When that is complete I will turn to raising funds to get the Peace Room program under way.

Give me some good news about your important life!

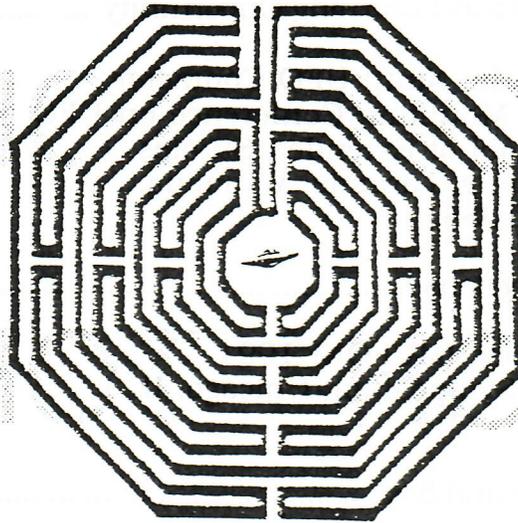

My very best,

Scott Jones

When Cosmic Cultures Meet

Conference

Washington, D.C.

May 27-29, 1995

Contents

Acknowledgments ..... ix

Introduction ..... xi

I. UFO Phenomena: A Profound Learning Opportunity ..... 1

Keynote speech at the Ninth UFO Contactee Conference, Rocky Mountain Conference on UFO Investigation, School of Extended Studies, University of Wyoming, Laramie, Wyoming. June 30 - July 2, 1988.

II. Government UFO Connections ..... 29

Mutual UFO Network (MUFON) 1991 International UFO Symposium, Chicago, IL, July 5 - 7, 1991.

III. Push My Buttons: Color and Sex ..... 52

International Forum in New Science, Fort Collins, CO, September 26 - 29, 1991

IV. An International Approach to an International Problem ..... 76

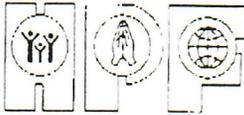

Fifth Annual Conference on The UFO Experience, New Haven CN, October 12 - 13, 1991.

V. Controlling Government Response: Self-Interest in a Nation State System ..... 101

International Symposium on UFO Research, Denver, CO, May 22 - 25, 1992.

VI. Matrix of UFO Belief ..... 146

Tampa UFO Convention, "UFO's and New Frontiers: Connecting with the Larger Reality," Tampa, FL, May 20 - 22, 1994.

**Human Potential Foundation**

September 21, 1994

**When Cosmic Cultures Meet****International Conference, May 1995, Washington, D.C.**

There is never an inappropriate time to look at the face of truth. While it may be more difficult, it is no less important to try to look at future truth. We cannot beg off this attempt because of any claim of more important problems to address. Indeed, when much of contemporary industrial culture appears to be endlessly struggling with intractable social and economic problems, and religious and tribal wars are bloody testimony to humankind's capacity for violence, there may be particular importance and relevance to anticipate a possible global transformation of extraordinary proportions. At a minimum, such an inquiry will cause some of us to recognize our own ethnocentrism and narrow materialist values. Perhaps more will recognize our powerfully limiting assumptions about time, space and causality.

Only rarely have there been attempts to step back from arguments over alleged facts and a seemingly endless round of additional rumors concerning extraterrestrial intelligence phenomena, and take a future view. The purpose of the Conference is to frame a discussion on the broad issues and implications of the time when there is no ambiguity about the understanding that cosmic cultures are meeting, and that Earth is one of the meeting grounds.

During the three day Conference international speakers will address implications, preparations, and responses for the time when either or both interdimensional and extraterrestrial cultures come into open contact with cultures of Earth.

An international group of presenters from a wide spectrum of disciplines and interests are being invited to participate. Candidate participants include: President and Mrs. Clinton; the Dalai Lama, Rev. Billy Graham; Thomas Kuhn, Michael Zimmerman, Arthur C. Clarke, John Mack, Paula Spencer, Elisabeth Sahtouris and others.
