Statement of [REDACTED]

Tonight at shortly before 6:30 P.M. I was driving west on P.R. 415 between the Shoal Lakes. I was on the straight stretch west of the curves west of [REDACTED]. I was driving my car at about 80 KPH. All of a sudden there are these things flickering all over the road like stars. The car stopped. It was like lots of sparkles dancing all over the car and the road. All of a sudden they were gone and the car was going. I didn't see it go away. All of a sudden it was just gone. I wasn't scared until I got about 2 miles from home. Then I was shaking.

Q: How long were the lights there for?

A: Eight seconds but seemed forever.

Q: What color were the lights?

A: White like a normal sparkles. It was dark in the center with bright sparkles all around. They seemed to be bouncing.
