

31 March 1992

Pine River, Manitoba

NL Case 920331.1  
March 31, 1992  
2230 local

The witnesses were driving west on PR 271 about 8 miles east of Pine River when they saw dust "kicked up" on the road "as if something had flown over...moving south." Immediately, they saw a brilliant flash in the southwest, as if something had crashed. The light was white, like a fluorescent light, and had been "harsh" to the eyes.

On 4 April 1992, the principal witness was flown over the "crash site" by the RCMP, but nothing was observed.
