

4 A: Obviously I was but it disappeared and I thought until the  
next day, I thought well it disappeared behind the next  
apartment building but that building would be too low for it  
to just suddenly disappear like that. It was just gone, and  
it was very quiet, more than quiet, that's I noticed, it would  
8 give me a very creepy feeling cause it was more than quiet and  
I was watching and an airplane coming from the, to the west  
towards [REDACTED] or the Municipal Airport and this was  
gigantic compared to - it seemed like the airplane was coming,  
12 why the guy didn't see this object is right there but then it,  
it appeared to me like it seen the airplane, it disappeared.  
This is what it appeared to me cause I was watching the  
airplane coming in.

16 Q: Okay.

A: But this thing I noticed, okay there was no, there was no moon  
that night.

20 Q: Uhm hmm.

A: Because the moon would be gone at that time, right but then  
when the full moon just a few days ago came out, I noticed  
that the circles were as big as what the full moon appeared to  
me. That's how big the circles were that I seen.

24 Q: The object itself, you say, was kind of like in a "V" shape or  
triangular shape?

28 A: It was a perfect "V".

Q: The lights themselves?

A: Yes.

32 Q: Was there any definition to the body of the object or were you  
just make, were you just able to see the outline of the lights  
themselves?

36 A: I just seen the outline of the lights but I did notice that  
the middle of the inside you know where the lights were in  
unison, the middle was very black.

40 Q: But even besides it being black, there was no definition as  
far as any shapes or anything like that?

A: No.

44 Q: And your ... and this is from the veranda or your deck off  
your apartment?

A: The veranda.
