

Q: And which direction does your apartment or the veranda face?

A: That would be, my apartment would face uhm, east, yeah.

4 Q: Faces the east?

A: Yeah.

Q: So and you believe this object appeared from the west then?

8 A: No, it appeared from behind me, north, cause I was looking south.

Q: Okay.

12 A: It appeared just right above me here.

Q: Okay, now when it appeared, was it moving?

A: Uhm hmm.

16

Q: Okay, but moving very slowly.

A: Well for a an object like that, it was pretty hard to tell because it was moving faster than an airplane was. The airplane looked like a piece of junk compared to this thing and it's speed was like junkie, choppy, the airplane but this thing was so smooth and travelling at a speed, like only seen it for about 3 seconds.

24

Q: Yeah.

A: It was travelling at unusual speed.

28 Q: So very quickly.

A: Yeah.

Q: Okay, now when,

32 A: But not just,

Q: Now when you say disappeared, did it just basically vanish or did it actually move away like you said you thought it might have gone behind an apartment but you could tell the next day that it didn't.

36

A: Yeah, well I thought about that many times and I can't really answer that question. I cannot really answer that question whether it just, it seemed to be too big to just suddenly disappear like a little star, you know or a meteorite, it just disappeared. It was there and then it was gone.

40

Q: Then it was gone. It didn't actually go in any direction.

44

A: Well it was, it was going like this, like it appeared above
