

Q: Right.

A: Then it just suddenly zipped across the sky, it was moving like this. We watched it.

4

Q: Well, what's similar from that one to this one?

A: Well, it was in a chart that I was looking at it. I never seen a manoever a formation chart of UFO's right.

8

Q: Okay.

A: So when I went to the library and I picked out this chart, all of the UFO encyclopedia, I was observing this chart to see what I'd seen the other night,

12

Q: Uhm hmm.

A: And I found it, it was there,

16

Q: Uhm hmm.

A: But then I suddenly realized I seen that before too.

20

Q: Uh, okay, so this is a different formation or maneuver?

A: My daughter and husband had seen, yeah.

24

Q: Yeah okay.

A: But this thing, we seen it years ago. It turned around and came back again and we just travelled across the sky just like this, faster than any jet that we've ever seen but you know so,

28

Q: Now this one the other night, you say there's actually in this UFO encyclopedia, there's actually a diagram or picture,

A: Yeah, yeah.

32

Q: Of something that's very similar to what you saw?

A: Yeah.

36

Q: Now you'd probably be able to, if you had the time, go back,

A: I have drew this picture. This is what I've seen.

40

Q: Okay.

A: So that's the best I can do because I've tried to draw.

Q: And this basically looks like the item in the,

A: That's what's in the book.

44

Q: Okay. And it's called UFO encyclopedia.
