

A: Yeah, I have the chart at home, ... <sup>I took a photocopy of it.</sup> ~~phone call if you have it.~~ Q

4 Q: Okay, is there anything else that you can recall. Would you be able to say how far this object was away from you?

A: You wouldn't be able to tell. I've tried.

8 Q: Wouldn't be able to tell.

A: The only thing I can say now is looking at the full moon the other night that this, the circles on this object was the same size as the full moon. That's the only way I can describe the size of this thing that I'd seen. The distance I feel was very close. It just seemed like it was just riding above my head.

12 Q: And it was a very clear night?

A: It was very clear on Tuesday night, yeah.

16 Q: Did you make any check with the local airforce base or anything of that nature?

20 A: I phoned, about half an hour after I'd seen it, I phoned the airforce base, uh I was totally in shock for a while until I talked to her and she tried to put me off and said that they had big transport plane and it could move at tremendous speed and very quiet and see I'm mickey mouse, right. I said be serious with me okay, I seen what I seen and I'm not gonna say I didn't see it. She said yeah okay, she's real quiet for a minute and then she said, okay, we've had 2 reports of the same thing. She asked me to describe again, I did. They had 28 2 reports since Saturday night of exactly the same that I seen and then since then, uhm, this was really an amazing story. A truck driver was coming to the north on Highway 2 and he reported to the Science Center that he had seen what I had seen and this was like maybe 2 weeks before I seen it. He said that it was very close to him and it was hovering above him, and then it shot up in the sky and it was gone.

36 Q: You heard that from Science?

A: Science Centre told me that.

40 Q: Center?

A: Yeah. And there was other reports too? Then we had another woman, a guy, a UFO guy phoned me cause he got my name from some place. He said there was another lady in my neighbourhood, probably the same ... similar two phone numbers, he thought it was the same neighbourhood.
