Dear Sir/Madam:

On 1994-10-06, I received a call from [REDACTED]  
 approximate age 28, of [REDACTED]  
 reporting UFO sightings on two separate occasions.

The first sighting occurred on 94-10-04 between 1900 and 2000  
 hours. [REDACTED] approximate age  
 30, were walking on a road to [REDACTED] about  
 10 km northeast of [REDACTED]. They observed a round blue  
 object in the sky, west of their position. The object was  
 moving horizontally in a northeast direction along [REDACTED].  
 [REDACTED] The sighting lasted approximately 2 minutes before  
 the object disappeared. The object was described as blue,  
 but continually changed colors, including blue, yellow and  
 purple. The object also had a visible yellow tail which  
 was described as 1 1/2 times the length of the object. There  
 was no sound. The distance could not be approximated, however,  
 they felt it was a few miles away. [REDACTED] also indicated  
 that there was a red glow on the front of the object, but  
 thought, since the sunset was still visible, it might be a  
 reflection from the sun.

When [REDACTED] arrived at their destination,  
 [REDACTED], approximately 6 km from the  
 sighting, they advised others.
