

[REDACTED] approximate age 20, from [REDACTED]
[REDACTED] also reported that her and [REDACTED] approximate
age 14, of [REDACTED]
in Saskatchewan had seen the same object west of the Village
at about 2000 to 2100 hours. They only saw it for a few
seconds. It was in the sky heading west and the description
was identical to that of [REDACTED]
There were a few clouds in the sky at the time.

The second sighting occurred on 94-10-05 between 2300 and 2400
hours. This sighting occurred a few miles north of the
previous sighting. [REDACTED] approximate age 31, and
his wife, [REDACTED] approximate age 25, of [REDACTED]
[REDACTED] were driving back to the village when they
observed the same object, description the same as the one
given by [REDACTED] The object was
just above the tree line ahead of them. They stopped the car
and noted it seemed to hover. A vehicle approached from behind
them and at that point, they advised that the blue object
disappeared. When the vehicle passed them, the object
reappeared. [REDACTED] said that, at one point, the yellow
tail disappeared when the object stopped and when the object
moved, the tail reappeared. The object only stopped once
and then left in a northeasterly direction. Again there
was no sound. There was a few clouds and the northern lights
were visible:

As a footnote to these reported sightings, there is a farmyard
just east of where [REDACTED] and his wife saw the object.
The yard light at this farm is blue.

The subjects are convinced it was not an aircraft or a falling
star. There was only one of these objects sighted at each time.

No other reports from any other residents of the area have been
received to date.

Yours truly,

(K.E.E. BERGMAN), Sgt.
i/c Detachment

KEEB/lr
