Information received at 0609 27 Nov 94. Logged information is as follows:

Received a call from a [REDACTED] who reported that he sighted what appeared to be a UFO from his residence at [REDACTED]. He has been observing it since 0520. It was initially assessed to be close to the Airport and low, but has since climbed at a 65 degree angle and opened to the south. He observed orange/yellow/green steady lights and a white light in the centre that appeared to be streaming into cold air. When asked for his phone number he gave the numbers [REDACTED] and then the conversation ended. There is a [REDACTED] listed in the phone book who lives [REDACTED]. NDOC called [REDACTED] to determine if they were aware of any activity that could be mistaken for a UFO. [REDACTED] has seen and heard nothing.
