"VERY BRIGHT OBJECT" REPORT

The following report was passed to Canadian NORAD Region North Bay by Edmonton Centre, and forwarded to the National Defence Operations Centre:

At 0340Z on 7 December, fliers and persons on the ground from Fort McMurray to Red Deer to Empress reported a "very bright object" over Alberta. Some reported that the object was going down, and some reported that the object was rising. The pilot of a Boeing 767 travelling from Vancouver to London (heading 010, position and altitude not provided) reported that the object flew parallel to the aircraft at one point and was so bright that it lit up the cockpit; the object then disappeared.

No further information was provided.
