

9:40 pm
Slow Lake Alta

STATEMENT of: [REDACTED] R.

On the 6th of Dec 1994 myself & friend [REDACTED] were driving from High Prairie to Slow Lake, Alberta. on Hwy 2 I was the driver and we past by Duffpik & about 1/2 way or 10 minutes before Frost Alberta. (west of Frost) all of a sudden off to the left (north) I seen a big long what looked light an authentic torch tip. It had a ball the like a green ultra violet light the had a like white long fluorescent light at the end of it.

white area.

ultra violet
green.

Redish Ball.

When I first saw it, I'd estimate it was only as high as a single engine plane. It was very clear & extremely bright. It lit up the sky. The sky was clear and stars were out. Then I saw it hit the ground like a big explosion. It became a ~~big~~ huge redish greenish flash for a second then became white. It was big, very big and lit up the entire area, the bush area. It seemed to light up an area of 1/2 mile or so. This seemed to hit the earth about 1/2 mile to a mile north of the highway.
