Aug. 17, 1987

Dear Grant:

Allow me to officially introduce myself. My name, as you know, is William "Bill" Steinman. I am a Freelance investigator into the subject pertaining to Ufology Physical evidence, Crashed/Recovered Saucers and bodies in particular, and the alliance that was eventually set up between various above-Top-Secret Intelligence groups around the world with the "Alien" beings who pilot the saucers. I recently authored a book entitled UFO Crash At Aztec, A Well Kept Secret.

During the process of researching for the above mentioned book, I spent quite a bit of my time looking into the life and research of

Wilbert B. Smith, who I consider the most informative ufologist and investigator into Saucer Technology that ever lived!!

Yes, I do have the September 15, 1950, notes that record the interview that W.B. Smith had with Dr. Robert I. Sarbacher, through Lt. Col. Bremner, at the Canadian embassy in Washington D.C.

I first heard about Dr. Sarbacher and especially that interview and the notes recording it, while reading a book by Leonard H. Stringfield entitled, Retrievals of The Third Kind, Status Report III, in October of 1982. Stringfield mentioned a letter he received from Canadian researcher Arthur Bray stating that he had proof to confirm that the Scully Story was true. This proof were those above mentioned interview notes in W.B. Smith's own hand writing. In those notes Dr. Robert I. Sarbacher stated that "the facts recorded in Scully's book were substantially correct."

This was all that I needed, I wasted no time in contacting Arthur Bray, who in turn forwarded a copy of the Smith-Sarbacher interview notes to me, which I received in April of 1983. I spent 3 weeks searching out the whereabouts of Dr. Robert I. Sarbacher. My first letter was generated to Sarbacher on May 18, 1983, I waited patiently with no response, then I called him via telephone on July 31, 1983 (during which he promised to answer my letter), I waited one more month then called him once again via telephone on August 28, 1983 (once again he told me to be patient, he would answer), Then on September 12, 1983 I mailed another letter to him, along with a xerox copy of the previous letter (May 18) plus a copy of the Smith-Sarbacher Interview notes. On October 14, 1983, I wrote one more follow-up letter to Dr. Sarbacher on October 14, 1983, asking him if there were any particular reasons

he couldn't answer my letters? Then, finally, on December 5, 1983 it finally came, A letter from Dr. Robert I Sarbacher, dated November 29, 1983.

As far as I know, this is the first and only time that Dr. Sarbacher expressed the subject matter concerning flying saucers (especially crashed/recovered flying saucers), in writing or otherwise to anybody in or out of ufological research, since his interview with W.B. Smith. (and then it wasn't in writing).

- * Attached, you will find copies of
- ① My May 18, 1983 Letter to Sarbacher
 - ② My Sept. 12, 1983 Letter to Sarbacher
 - ③ My Octob. 14, 1983 " " "
- (Of course you have a copy of my Nov. 29, 1983 letter from Sarbacher)
- ④ Aug. 28, 1983 Telecon with Sarbacher

The only person from the list of individuals that you mention that I corresponded with is Dr. Ormond M. Solant, one time Chairman of the Canadian Defense Research Board. All o the "MJ-12" Group members

(5)

are now dead, along with John von Neumann, J. Robert Oppenheimer, Dr. Compton, and even Dr. Robert I. Sarbacher himself, who passed away on July 29, 1986.

Those typed interview notes that you have that was allegedly between myself and Dr. Robert I. Sarbacher on Aug. 5, 1985, aren't really mine. The interview was actually between Robert Bletchman and Dr. Robert I. Sarbacher, via Telephone on August 5, 1985. Robert Bletchman is an Attorney at law who is a member of C.A.U.S. (Citizens Against UFO Secrecy).

* Can you do me a favor and forward a copy of those 8-5-85 interview notes to me, I don't have a copy of them.

I honestly believe that Dr. Robert I. Sarbacher didn't know any more concerning Flying Saucer recoveries than he mentioned in that 11-29-83 letter. He wasn't privy to the hard core facts, even tho he was invited to the meetings at.

Wright Patterson Air Force Base, which he did not attend.

One person who did attend all of the meetings, concerning the Recovered Saucers and Bodies, whom you mentioned, and is still alive, is Dr. Eric A. Walker. I wrote to Dr. Walker; but he would not admit anything. Stanton T. Friedman called Dr. Walker, he still does not say a thing concerning the Recovered Flying Saucers.

How did you find the name Dr. Eric A. Walker, concerning this subject matter? I was the person who discovered this particular connection, and only mentioned it to Stanton T. Friedman.

Yes, please do forward any information that you have concerning Wilbert B. Smith. I already have a copy of his book The New Science, am in contact with his wife Muri Smith, and his son W. James Smith.

Very sincere
W

March 21, 1984

Dear Stan:

I received a letter from Fred Darwin of Dallas, Texas, in which he laid down the history of N.D.R.C. - O.S.R.D. as it became J.D.R.B. and eventually ended up becoming R.D.B. He gave me names of persons whom he considered to be the most likely candidates for team members on a Flying Saucer recovery operation - "if there were ever such a happening". They are as follows:

- ① Dr. Vannevar Bush
- ② Dr. Karl T. Compton
- ③ Dr. Lloyd V. Berkner
- ④ Dr. Robert F. Rinehart
- ⑤ Dr. Eric A. Walker.
- ⑥ Dr. John von Neumann

I did some library research on each name, xeroxing a biography of each individual, and looking up their descendants in local area telephone directories.

Stan, I believe that the name of that individual, whom Sarbacher mentioned as attending all of the meetings pertaining to recovered Flying Saucers, is Dr. Eric A. Walker.

Remember Sarbacher stating (more let me hear that tape recording) that this man came from Pennsylvania and wrote a book on Electrical Engineering; well Walker, at that time, was President of Penn State university, was formerly head of Penn States electrical Engineering Dept., wrote a book on Electrical Engineering, and was a consultant (dollar a year man) to J. R. D.B. 1949-1951. He also was in charge of a naval laboratory that was developing electronically sonar guided Torpedos - which were consequently showing very positive results against the Japanese during WWII.

The last residence that I have for him is as follows:

Dr. Eric A. Walker
Rock Springs Farm Pennsylvania
Furnace, Pennsylvania
16865

I suppose that Moseley contacted you as pertaining to Dr. Robert I. Sarbacher. This only proves one thing to me; Moseley is just as interested in the Crash-Recovery cases as he was in 1954.

Stan, I am not doing research for Todd Zechel, altho I did have an earlier run-in with him, which I later regreted. My main goal is to solve the Flying Saucer Enigma, through the recovery and attempted duplication cases.

Please let me know what you find out through Dr. Walker, and do keep in touch.

Very Sincerely
Wm Steiman

May 18, 1984

Dear Stan:

This is a follow-up to my letter to you, dated 3-21-84, Ref. Members of The Research and Development Board in 1949 and 1950 - Dr. Eric A. Walker in particular.

I understand, through Bill Moore, that you have contacted Dr. Eric A. Walker, and that you feel quite sure that he is the man that Sarbacher mentioned who attended all of the crashed-recovered Saucer meetings. Has he given you any indication that he was briefed officially on that critical subject matter? If so, just exactly what did he tell you? Could you forward his latest mailing address to me?

I have been working on the roll that Army Counterintelligence played in the

recovery of the flying saucers and have come up with some quite substantial leads. Also, as Bill Moore has probably already shared with you, I have contacted and interviewed Mrs. Eric Henry Wang, who verified that her husband was involved with the recovery, analysis, and attempted duplication of flying saucers. Through her, I also obtained the name of the man who was, and may still be, in charge of the whole flying saucer program. He, at least, was the man who Dr. Wang reported to and who visited at the Wang residence quite frequently. He may be the man who originated and maintains the security lid which so tightly covers the whole program. She gave me this man's name, when I explained to her, in such an emphatic way, that my main goal is (which it really is) to persuade the government to turn these flying saucers over to the total scientific community for the proper attention that they deserve. Moore probably discussed this man's name to you (H.A.K.).

Stan, I understand that we are stirring up that "can of worms", officials

are becoming very concerned. I believe that is necessary to preclude the lifting of the 37+ years old security lid. The hinges to the lid are rusty, the key may be hard to turn in the lock; but with a little oil applied, I believe we will succeed. But I hope the lid isn't really the lid to "Pandora's Box".

Please get back with me as soon as you possibly can, and please continue to "work on" Dr. Eric A. Walker.

Very Sincerely

Wm Sturman

P.S. - Read Dr. H.A.K.'s impressive early biography. He was in Army Counterintelligence (1942-1958). He was a consultant to the Psychological (1952) Strategy Board, He was a consultant to several govt. projects involving security, weaponry, etc, etc.
