Subject: Request for confirmation of UFO investigations by you.

----- Message Contents -----

Dear Dr. Gibbons,

I'm trying to confirm the validity of an article "UFO Reality Shift" that claims

that the US government is preparing to announce to the public that UFOs actually exist. I seriously doubt this, but your cooperation in clearing this up, one way or the other, would be very much appreciated.

The article in the April-May 1996 issue of NEXUS was written by Richard J. Boyla

n
(rich.boylan@24stex.com) and claims you are actively doing research on UFOs. On page 60 Boylan claims that in March 1993 you met with Laurence Rockefeller

an
d
Dr. Scott Jones, former career intelligence officer, who presented you with a "Ma

trix
of UFO Belief" analysis monograph. You then supposedly met with Rockefeller again

on
4th February 1994. After this it says that you were "tasked to find out everythin

g
about UFOs".

Later on the same page, it states that

"... President Clinton is not satisfied with the briefings he has gotten from the

CIA
on UFOs because the CIA information conflicts with the information which the President's Science Adviser Jack Gibbons has independently acquired."

On page 61 it then states that

"Dr. Steven Greer, head of CSETI (Committee for the Study of Extra-Terrestrial Intelligence), has likewise provided two White House briefings to Science Adviser

Gibbons on his UFO findings."

Is any of the above correct?

Respectfully yours,

David Reynolds,
