Date : 3 September, 1996.

Dear Sir,

Please allow me to first introduce myself. At present I am a civilian researcher and Director of Investigations for the British UFO Research Association and I am also the Mutual UFO Network's Representative for England. I have been involved with serious UFO research for over 17 years and I still remain open minded as to the nature and origin of the UFO phenomenon.

Over the last three years my main area of research has been the so-called 'alien autopsy film' owned and released by Ray Santilli in London. You might like to know that I was the first UFO researcher contacted by Ray Santilli when he first obtained the alleged film.

During my research I have been informed by a colleague in the USA that President Clinton asked you as his assistant for Science and Technology, to try and find out if the 'alien autopsy film' was genuine or not, and that in turn either yourself or one of your staff had passed this task on to Captain James McAndrew (USAF). Could you please either confirm or deny this statement.

If you are interested in this film I would be more than happy to assist you in any way I can and make my research available to you.

Thank you for your cooperation with the above and I look forward to your reply.

Yours Sincerely,

Philip Mantle.
Director of Investigations.
