

The beings seemed puzzled at my reaction when I jerked away and I remembered saying something to the affect that, "This is not right. I can't do this!" or, "That's not supposed to happen!" They again instructed me to place my hand into the image. When I did the second time, I became aware of a mild tingling in my temples and a rush of "giddiness." Later on when I tried to relate what I saw in regard to the "drawing" my mind could not function. Meaning, I felt as if I were controlled with regard to what I would be allowed to repeat to others. A very severe pain not unlike an electrical shock went through my neck at the base of the head. From what I have heard the effect resembled the product of a "cattle prod" that is used to keep stray cattle from drifting too far from the area. This is something else that I cannot understand. If I can put all this together and conclude that I am supposed to learn something or do something as a result of this experience, WHY SHOULD TOTAL RECALL OR AT LEAST PARTIAL RECALL BE DENIED ME?

In conclusion, there are a few other "side effects" that I have carried with me since the sighting. While uncertain that this was a direct result of the sighting, there is, in the lower left hand quarter of my left eye, a discoloration of the iris. I had not had

this previously to that time. I used that eye to sight through the viewfinder when taking the photo. A split second before I tripped the shutter I noticed a "flash" or "pulse" of light coming from the direction of the craft if not from the craft itself. I reflexed at this by blinking my eye lid several times, then I snapped the photo. The only other trace is that (what appears to be) the numeral "17" on my lower right fore arm. Recently I became so agitated at the marks that I employed an X-acto knife to remove the "7" from my arm. In just two (2) days time, there was no scar and the tissue was completely healed over. The dark shadow of the "7" returned five (5) later.

Today, the marks have taken on the shape of a diamond with a "clear" area in the center. This came after experiencing a DREAM several nights prior. (DREAM: I was held, though not physically, in such a way as to expose my right arm and a shaft of what looked like half chrome and half glass was placed against the marks. After what seemed like many minutes, the rod was removed and the diamond-shape remained. It was bright pink at first then it started to fade, the "clear" center became visible.

At this time I am feeling "PUSHED" to accomplish something but as yet I do not know what. I am still waiting... Up to this date, this is all the information that I have been "PERMITTED" to recall.

IKE MET SPACE ALIENS!

President Dwight D. Eisenhower met with beings from outer space almost 30 years ago, a British high government official reveals. A top-secret meeting, similar to the spectacular finale of Steven Spielberg's "Close Encounters of the Third Kind" shown above, took place at Edwards Air Force Base in California in 1954.

According to the Earl of Clancarty, a member of Parliament

and the author of seven UFO books, the awestruck Ike watched as the aliens demonstrated how their spacecraft worked—and he convinced them not to make widespread contact with the people of Earth, to avoid panic. "The aliens spoke English," reported a former U.S. test pilot who was present. "They looked something like humans, but not exactly." (National Enquirer)

What did Ike look like?—Editor

This is what the people of the world are looking for and do understand, judging from the lectures I have given. And they are looking to us for that leadership. But unless we do take steps in that direction, with all of our efforts we might lose the endurance of their friendship, especially if the Russians continue succeeding while most of our efforts meet with failure. It is very serious, as I see it.

Now, dear Mr. President, let me convey to you the wishes of Queen Juliana, of Holland. As you perhaps know, I had a two hour interview with her on May 18th. She wished our nation and you, Mr. President, the best of health and prosperity, with success in all of our efforts.

May I add my best wishes to you for the best of health and happiness in all your ways.

Sincerely,

George Adamski

Washington, D. C.

Dear Mr. President:

It has been reported that the U. S. Air Force tagged as "hoax" an unidentified flying object (UFO) photograph which was released by the President of Brazil and certified as genuine by that government's Navy Ministry.

I understand that the official Brazilian report was made public in February, 1958, and, I further understand, in 1960 the U.S. Air Force allegedly labeled the photograph a hoax.

Mr. Eisenhower, as the President of these United States of America, do you think the U.S. Air Force should make such a comment on something which involves the top officials of a friendly Western Hemisphere nation?

We sincerely hope that we may receive a reply from you, and not from the Air Force, on the matter referred to herein. We are deeply appreciative of whatever attention and courtesy you afford us.

Thank you.

Most sincerely,

Miriam Brookman

Dear Col. Draper:

Your reply to the below query would do much to aid my organization in our serious, fair study of the UFO problem. We are a completely non-profit group. We seek only the truth about this matter, and whatever words we obtain from distinguished gentlemen such as you greatly will assist us in our evaluation of the entire UFO situation.

Vice Admiral (Ret.) R. H. Hillenkoetter, former head of the Central Intelligence Agency, has stated publicly that UFOs (unidentified flying objects) "are operating under intelligent control." Col. Draper, do you agree with that statement?

Thank you ever so much for your courtesy and attention. I realize the burden I place upon your tight schedule. . .but I am deeply appreciative of whatever time you give me on this.

Most sincerely,

Miriam Brookman

25 May 1960

Dear Miss Brookman:

This is in reply to your letters to the President of 29 March and 22 April 1960 concerning unidentified flying objects.

I agree with the opinion, by whomever held, that prompt efforts to identify all unidentified flying objects are an important element of air defense. It is my understanding that the Air Force has pursued such a policy for many years.

If it were discovered that space travel from other planets did exist, the Department of the Air Force would report the matter immediately through the Department of Defense to the American public. No one can say with any certainty what the reaction of the public would be to such an announcement, but I have sufficient confidence to believe that it would be taken in stride.

As the executive agent concerning unidentified flying object sightings, the Department of the Air Force periodically releases information on unidentified flying objects to the public. I believe this to be a wise policy. The latest release dated 29 January 1960 is inclosed for your information.

I trust the foregoing will be of assistance to you.

Sincerely,

WILLIAM G. DRAPER

Washington, D.C.

Dear Mr. President:

My letter of March 29, 1960 to you was answered -- letter dated 19 April 1960 by Air Force Major Lawrence J. Tacker. He wrote that my letter "addressed President Eisenhower concerning the 24 September '59 Redmond, Oregon unidentified flying object sighting has been referred to this office for reply." However, three other questions were incorporated in my March 29th letter to you. A reply from the White House -- not from the Air Force -- be deeply appreciated. Please permit me to direct those three questions again to you:

1) NICAP has referred to the published statement of Rear Admiral Delmer S. Fahrney, USN, Ret., famed as the "father of guided missiles," which reveals his realization of the necessity to know the facts about objects which reportedly enter our atmosphere at high speeds. ...Do you respect this man's opinion on this subject?

2) If our Air Force found that there are some objects -- now referred to as UFOs -- which originate from planets other than earth, then do you think the American public, if given such information, would take that news sensibly and in stride?

3) Do you think the American public should be told all facts relating to all unidentified flying objects?

Thank you for your attention and courtesy.

Most sincerely,

Miriam Brookman

Dear Mr. President:

Please permit me a little of your busy time to ask on behalf of my organization several questions on matters of concern to us all. On the brink of bursting the erstwhile limits of our spatial horizons, we seek simply the truth about these matters.

1. The official publication of NICAP (National Investigations Committee on Aerial Phenomena, of which Donald E. Keyhoe, Major, USMC, Ret., is Director) refers to an Air Force statement which is contrary to Federal Aviation Agency reports.

The AF-FAA confliction concerns the alleged sighting of an unidentified flying object (UFO) on September 24, 1959 near Redmond, Oregon. NICAP states that FAA proof of the facts of the sighting, proof which is officially logged FAA evidence, includes: details of a chase by four AF F-102 jets, a description of the UFO and an AF report of tracking the object by radar for over one hour. These FAA reports were signed by L. E. Davis, Chief, Redmond Air Traffic Communication Station, and William F. Zauche, Jr., Chief, Air Route Traffic Control Center, Seattle. The reports, sent to NICAP, were accompanied by a confirming letter from Eugene S. Kropf, Assistant to the Regional Manager, FAA Region 4, Los Angeles. NICAP states that the FAA reports are at NICAP headquarters in Washington, D.C..

NICAP states that on January 19, 1960, it received the following statement, which was signed by Major Lawrence J. Tacker, Pentagon Public Information Officer handling UFO information: "The ATIC account of the sighting fails to reveal any evidence of radar tracking or any success of the attempted intercept. It is the ATIC opinion that this object was probably a balloon..."

Mr. President, do you think that the Air Force should be requested to make, immediately, a complete and public explanation of this case?

Respectfully referred for
appropriate handling. Not
acknowledged by this office

William K. Blades

The Assistant to the President

Sent to the Dept. of the Air Force *x (K) 14* NICAP NYC

MEMORANDUM FOR THE RECORD

SUBJECT: White House Inquiry

The purpose of this memo is to close out SAFLL 84780 which is an inquiry from Mr. Lee R. Munsick of the North Jersey UFO Group to Mr. James Hagerty concerning UFO's.

Mr. Munsick has on numerous occasions inquired through Congressmen and general officers of the Air Force, Director of Legislative Liaison and Information Services about UFO's. His main pitch is an allegation that the USAF is withholding information concerning this subject from the American people.

Mr. Munsick has received all of the DOD press releases covering the 11-year study of UFO's made by the Air Force. He has received numerous letters through Members of Congress refuting the allegations of censorship. During the past several months, all inquiries from Mr. Munsick have been closed by memo for the record except those inquiries through Members of Congress to which Mr. Munsick receives a stock reply, and it is estimated that he has received at least 5.

The action officer called Colonel Draper's office and explained this situation to Mrs. Willyce Crucioli, Colonel Draper's secretary, and suggested that this inquiry be closed by MR. Mrs. Crucioli agreed and asked that a copy of the memo closing the case be furnished her. No further action required. CASE IS CLOSED.

OTC-4 1957
GENERAL FILLS

PERFORMANCE CHARACTERISTICS
AND DELIVERY TERMS FOR THE
OTC-XI CIRCULAR-FOIL SPACECRAFT

PHYSICAL COMPONENT: The OTC-XI craft is to be of circular-foil design, approximately 45-feet in diameter and 15-feet high at the center, with crew compartment to accommodate at least three persons in atmospheric comfort and safety under the normal conditions to be anticipated in flight to within 1,000 miles away from earth.

PERFORMANCE FACTOR: OTC Enterprises Inc. to demonstrate that the OTC-XI craft will depart from any specified location in the continental United States, orbit one or more times outside the earth's atmosphere, and land its crew safely within the inner retunda courtyard of the Pentagon Building in Washington, or at any other location best suited to public observation.

ENERGY COMPONENT AND MORTALITY FACTOR: Energy to power the OTC-XI to be derived from natural environmental sources acting in motion-concert with self-contained chemical components of the Utron power-package and needing no additive, servicing, or replacement prior to at least one year of operation in or out of the atmosphere.

DELIVERED PRICE: Payable in full on delivery, with no prior commitment required, and including all tooling and other overhead ..
..... \$20,000,000.00.
Additional identical units on same schedule..... 4,000,000.00.

DELIVERY: Approximately 24-months at quoted prices, or in less time (subject to upward revision of price) to minimum of approximately six-months.

Please Come Away with Me Lucille . . .

. . . In My Free-Energy Spacemobile

Baltimore (AP)—A group of Baltimoreans claimed yesterday they have been able to utilize gravity in circular motion machines capable of powering everything from hearing aids to space cruisers.

Otis T. Carr first announced his claim in a news conference called by OTC Enterprises, Inc., of which he is president. He further detailed his claims yesterday in an interview and demonstration of a crude model of a circular motion machine which he said is the principle of a "free energy circular foil" space craft he can build, if someone puts up the money.

He said the machine can be adapted to devices of any size to produce continuous power absolutely free of dissipation.

Its immediate application, Carr said, would be in a space craft—either manned or remote controlled—which would be able to hedgehop among the planets in controlled flight. It could land or take off as desired on the earth, the moon or any planets in the earth's solar system, he said.

Neither Carr nor any of his associates has any formal education in science or engineering. They said their claims are based on the most simple practical applications of natural laws and discoveries of the "giants" of science and mathematics.

A 52-year-old native of Elkins, W. Va., Carr says he has financed his research with his own modest funds and through private funds supplied by friends. He claims to have built "thousands" of working models. His professional experience, he said, has included a dozen different jobs ranging from operating a locomotive, to working as a night desk clerk in a hotel, a job he resigned two years ago when OTC Enterprises was formed. Carr said the jobs were merely sources of income to keep him going on his research.

Carr and his associates said they are withholding full disclosure of their claimed developments, including proof in the form of refined working models. They added this is not from a desire for "secrecy or monopolistic control" but only to avoid any suppression of what they consider concepts which could revolutionize the technology and economy of the world.

Carr said copies of a 16-page copyrighted brochure outlining his claims in general terms were sent last Thursday by registered mail to President Eisenhower, members of the Cabinet and the Atomic Energy Commission.

He promised full disclosure of designs, principles and application of the discoveries he claims as soon as the government, industry or anyone else comes forth with the funds to produce them and guarantees the information be made available to the world.

Carr said his project represents 16 years of research and application, inspired principally by Albert Einstein and based on the discoveries of Einstein, Newton, Bacon, Archimedes and others.

He said the same "free energy" which causes the earth to rotate on its axis and orbit around the sun, will turn a machine he described as two cones joined at their circular bases. When the rotation of such a machine reaches a certain velocity relative to the earth's orbital velocity, Carr said it will take off.

The space ship Carr claimed he can build for the cost of a passenger airliner, could be flown to the moon or anywhere else in the solar system within six months of the time construction is started, he said.

Carr said the core of such a space ship would be a huge battery which would spin at the velocity of the external craft and which would be recharged, he said, by its motion.

Such a battery, he calls a "neutron electric accumulator." Carr declared such a device, built to any size, could be designed to power the largest electric generator virtually any conceivable machine or device.

The principle on which Carr said such circular motion machines would operate is that "any vehicle accelerated to an axis rotation relative to its attractive inertial mass (the earth) immediately becomes activated by free space energy and acts as an independent force."

He described gravity, magnetism and electromagnetism as example of what he calls free energy. All exist without any energizing force set up by man, he said. All, he said, are regenerative, undissipated energies.

Since all three are joined together is space, he said he considers space itself the prime energy.

Carr said his space vehicle would not have to blast through the earth's atmosphere as present day rockets do. It would not have to neutralize gravity to escape from the earth, he added, because it would utilize the force of gravity as energy.

THIS IS THE ASSOCIATED PRESS RELEASE DISPATCHED OVER THEIR INTERNATIONAL WIRES

K. JACK MARTIN
CARDEL

December 9, 1957

Dear Barry:

Concourship
+ GF 156-E-1

Your telegram reminds me that in public affairs most of the time you're damned if you do and damned if you don't.

The satellite effort, it happens, is completely non-military. There are no security aspects to it whatsoever. To deny the press access to it, therefore, would be to invite violent criticism for withholding nonsecurity information. My opinion is that the criticism would be right.

The fact is, arrangements were made about two years ago to assure full press coverage of America's part in this scientific experiment. Naturally enough, an experiment in science is just that -- a test that might succeed on first try, or it might at first fail. All the key scientists in the world were privy to our participation in this effort when it began in 1955 -- and every nation agreed that its efforts would be made fully known to the world's scientific community.

Scientific Program
x GF 150-f

The United States has been living up to its commitment to the world's scientists and to its obligation to the nation's press. The Soviet Union has not. It's that simple. The fact that the press has blown the thing completely out of perspective is something that should have been expected by people experienced in "Washingtonitis" -- but I don't know what could have been done about it without making things worse!

I certainly enjoyed chatting with you on the phone today and am glad to know that you are "beating the bushes." Keep up the good work and let me know if I can help.

With warm personal regards,

Sincerely yours,

BULLETIN

The copy and art for this Brochure was released for production last June. Recently the Russian Government launched its Sputnik device into the sky. Our own discoveries in summation of physical law as relates to statements dealing about space in this document are: "Any vehicle accelerated to an axis rotation relative to its attractive inertial mass, immediately becomes activated by free space-energy and acts as an independent force."

We have twenty years of research and "Know-How". We have a firm conviction that the OTCXI Space Ship, as described within the pages of this Brochure, can be placed upon the Moon.

America, under GOD, has always emerged victorious. We proceed with the utmost faith, and will forthwith devote all effort toward our destined accomplishment.

Otis T. Carr

Dear Mr. Carr:

The brochure you sent the President has been received. I can assure you that he very much appreciated the interest which prompted you to see that this material reached him.

Sincerely,
SHERMAN ADAMS

FOURTH DIMENSION

Carrotto Dynamics Inc. is dedicated to development in fourth-dimensional power. Magnetism, electro-magnetism, gravity, and space are energies of the highest potential. The manner in which we apply them is an exculsive novel secret of our enterprise. Many of our experiments with pressure created by gravity and linked to motion, have succeeded. We have tapped an universal source of energy and have produced successful pilot models of demonstration. Our developments will be one of the major replacements of dwindling fossil-fuel supplies, and other irreplaceable combustion materials. Our first operating plant for the conversion of electricity by generation into heat, light, and power, will be the pioneering change of this era. It will be built when funds are available, and under our control in an appropriate legal entity.

We are ready to begin production of these power units as soon as funds are available for the building shown at the extreme left in the architect's rendering on page 14. It should be clearly understood that commerce and industry are ready and waiting for the resulting power-packages, and can use them as prime-movers in conjunction with existing equipment and machinery. These are not visionary devices or improbables that will require entirely new concepts or designs in order to be employed in profitable applications.

True, the early availability of these new energy forms will undoubtedly lead to the design and development of new concepts in both stationary and mobile forms for production, transportation, and habitation. Future factories, office buildings, and vehicles will adapt economically to altogether new functional forms in order to avail and derive the utmost utility at a fraction of present costs.

But the first, and immediate output of Carrotto® Dynamics Inc. items of manufacture will be eagerly absorbed into today's markets!

We have invented a fourth dimensional space vehicle

This Fourth Dimensional Vehicle is powered by the revolutionary Utron electric accumulator, which is completely round and completely square, and generates its own power, which is electro-magnetism and electromotive force. It can be launched from the earth, and does not have to be blasted into space. The basic design was brought to the attention of the United States Government, and a patent application was filed in 1949.

Some tests were independently made by qualified engineers at one of America's leading plants and it was estimated that a small model, only four inches in diameter, produced energy equivalent to one-thousand tons. This was in 1952, and Mr. Carr was unable to interest anyone in his efforts at that time. Things have changed, and the Government has now put its blessing on space-flight development.

At the present time the rocket enthusiasts are commanding topmost attention. But there will be changes in thinking, and new directions of endeavor very soon. Our experiments with circular-foil design, as relates to gravity, electro-magnetism, and electromotive force, have led us to the certain conclusion that it is possible to use the inverse-proportion laws of Newton as successfully as the third law of motion applies to accelerated rockets. We will produce the OTC-XI circular-foil spacecraft as the first operational prototype as symbolized in this conception drawing.

Seventeen-inch by twenty-two-inch Lithographs of this illustration, handsomely rendered for framing, are available on request. Send 25 cents to cover mailing and handling.
