B O R D E R L A N D S C I E N C E S R E S E A R C H

3524 Adams Avenue -- San Diego 16, California

Meade Layne, M.A., Director.

TO HIS EXCELLENCY, THE PRESIDENT OF THE UNITED STATES

- AND TO -

THE SECRETARY OF THE AIR FORCE -

THE SECRETARY OF THE ARMY -

THE SECRETARY OF THE NAVY -

THE SECRETARY FOR DEFENSE -

- AND TO -

THE JOINT CHIEFS OF STAFF OF THE DEPARTMENT OF DEFENSE

Your attention is Respectfully drawn to a Matter
of Urgent and Critical Importance.

To All Commanding Officers in the Air Force,
and of Anti-Aircraft Weapons and Operations: Your atten-
tion is respectfully and urgently drawn to the same matter
referred to above, and further described in the accompay-
ing pages.

To Columnists, Radio Speakers, Editors, Writers,
Teachers, and Publicists in every field of activity through-
out the Nation: Your attention and immediate cooperation
are earnestly solicited.

To All Citizens in all walks of life who have the
safety and welfare of our Nation at heart: Your own future
and that of the American State and People may be dependent
on your understanding and intelligent cooperation in the
Matter Herein discussed.

(Forwarded to the Addressee by an Associate of the
Borderland Sciences Research)

A BLUNDER OF FIRST MAGNITUDE

According to the daily press of the week of July 24, 1952, orders have been issued by military authorities to pilots and other operators of armed aircraft to pursue and, under some circumstances, to attack with gunfire, as opportunity offers, the so-called Flying Discs or Flying Saucers. THIS IS, IN EFFECT, AN ORDER TO COMMIT SUICIDE AND TO INVITE RETALIATION IN A MOST EXTREME AND DISASTROUS FORM.

The Director and Associates of the organization offering this brochure have for six years been engaged in an intensive study of the phenomena of the Discs; nevertheless the first facts here presented are familiar and easily accessible to everyone.

It is abundantly evident that these craft are operated by highly intelligent beings, and that they far surpass any type of aircraft so far constructed by us.

They excel our aircraft in speed, maneuverability, and power, to such an extent as to make them immune from pursuit and attack, except by their own choice. We have at present no weapon with which to engage them effectively. An exhaustive study of their observed operations and control plainly indicates that they have our nation, and the planet itself, at their mercy.

NO ACT OF THEIRS HAS INDICATED ANY HOSTILE INTENT. NO FAINTEST EXCUSE CAN BE OFFERED FOR THE PROPOSED ATTACK ON THESE FRIENDLY VISITORS TO OUR SKIES.

Numerous incidents, however, during the last six years, strongly indicate that the operators of the Discs or Saucers have abundant and deadly means of retaliation. We cannot estimate the disposition and mentality of these beings, or put any limit to the destruction they may inflict upon us if we make unprovoked attack. All sources from which we have derived plausible information warn us with one voice:

DO NOT ATTACK THE "SAUCERS" - IN THE NAME OF GOD, DO NOT ATTACK THEM!

The repeated and desperate vehemence of this warning surpasses description. It is within the power of these visiting peoples to destroy cities and continents and even the planet itself. We have no guarantee, no reason to assume that they will not exert such powers. We have no right to suppose that they will suffer our attacks without retaliation, or that they will engage in prolonged and tentative hostilities only. It is far more likely and logical that they will subjugate our planet at a single blow.

"IN THE NAME OF GOD, DO NOT ATTACK THE SAUCERS!"

They come in friendship, with a science over-matching ours by a thousand years. They are engaged in scientific studies of geophysical changes and of our social and political conditions. Their present incursion (one out of many in the course of history) was occasioned by the release of atomic energies, which disturbed and alarmed the worlds of their habitation. This threat has now been contained by them, so that their chief concern is with certain startling changes occurring deep within our globe. But they impose no law upon us (though they could enslave us if they so desired), they exact no tribute and move harmlessly through our skies.

IF WE CAN AND WILL MAKE FRIENDLY CONTACT WITH THEM, THE GAIN TO OUR SCIENCE, PHILOSOPHY, AND COMMON WELFARE WILL BE LIMITED ONLY BY OUR OWN CAPACITY TO LEARN.

THE SINGLE PROJECT WHICH SHOULD NOW ENGAGE US, IS THAT OF ENTERING INTO FRIENDLY COMMUNICATION WITH THESE VISITORS.

(The first practical and simple step would be to repeat, by batteries of colored lights, the light changes observed on the various globes, Discs, and other craft).

Make friends with these people. Do not attack them. Try to learn from them - for we are children in their hands.

We do not make this appeal from the standpoint of any cult or religion and make no financial gain. And we cannot expound here the scientific and metaphysical concepts underlying our statements. A volume would not suffice for that purpose, since such ideas are unfamiliar (and hence unwelcome) to the Western mind. But the Visitation (as we may call it) is no metaphysical abstraction, but one of the most pregnant events in human history.

No one can predict the conduct of these Visitants - but it is certain that they are very wise, and very powerful, and so far well disposed. Yet a single piece of incredible human folly, such as the Order to Attack referred to in our first paragraph, may crumble our cities, wreck our civilization and devastate our globe.

If we are indeed to be destroyed by fools in high places - then that perhaps is written into our destiny. But as a people, this quietism is not within our nature; we struggle and protest against the fools whom our own folly has raised up. And as to this present issue, this insane Order to Attack, we make appeal (hoping that it is not already too late) to ALL PERSONS IN AUTHORITY EVERYWHERE, AND ESPECIALLY IN THE ARMED SERVICES, to immediately forbid and overrule such orders.

IN THE NAME OF HUMANITY AND COMMON SENSE.

The danger is real, imminent, and of a magnitude which our present pages cannot describe.

DO NOT ATTACK THE "SAUCERS", IN THE NAME OF GOD, DO NOT ATTACK THEM!

* * * * *

A FEW FACTS CONCERNING THE DISCS OR "FLYING SAUCERS",
THE "FIREBALLS" AND OTHER RELATED AERIAL PHENOMENA.

Denials of the factual existence of the Discs or Saucers, though they still persist with certain "authorities" and "experts", are no longer worth serious attention. Such denials are rooted either in (a) an incredible ignorance, especially of the historical background (b) an equally incredible stupidity, or (c) considerations of supposed public policy, orders from superiors and the like. The end of this servile and moronic evasion is now at hand, and extraordinary events are in the making.

Nearly all of the disc-shaped flying objects come from the etheric double of Venus (not from the visible planet). They are operated either by people who are natives of the etheric worlds, or by incarnate humans who are now living on etheric (not astral) planes. They have visited our planet hundreds of times in the past. They appear, as a rule, at times of racial and planetary crisis, for purposes of scientific observation and study. Their chief present interest is in deep-lying changes in the geologic structure of the earth's crust. They come in good will and could be of immense service to us, if we were friendly and cooperative.

The concept of the ether(s) as a universal medium of enormous density should be acceptable to any physicist. Matter as we know it is a rarefaction of the ethers and the denser media pass through our matter like wind or water through a mesh with mile-wide interstices. There is an 'infinite' series of ethers of increasing density - atoms within atoms within atoms without end. These form worlds of living existence outside the spectra of sense perception (sight, hearing and touch).

There is an infinite variety of visiting 'sky craft' besides the "saucers", and some come from enormous distances measured in light years. Their method of 'crossing space' belongs to a super-physics which cannot be discussed here - but the basic fact seems to be, that these craft are made of a 'special kind of matter', in which the alignment of the atoms prevents the merging of their magnetic fields. This renders them weightless, and the energy-thrust is due to their rapport or resonance with the atoms of the ethers.

Our information states that many discs or saucers are being seen over Russian territory, and that the Russians are intensely interested in them from a scientific standpoint, and the possibility of constructing similar craft. Such an achievement would make Russia (or any other country) the master of our planet in a few weeks or days. We invite the attention of governmental authorities to the content of this paragraph.

The Etherian peoples are not all alike, but are of many races and cultures. The word Etherian is very inadequate, but the best one available in our language. The existence of these worlds and peoples has always been recognized in Oriental metaphysics; and our own world is rooted in the etheric plane and originated from it. The ether has the same type of reality as has the magnetic field around the poles of a magnet.

The so-called Fireballs in some instances are "wipers" designed to offset the radiations and fission products of atomic explosions; in other cases they are photographic devices which transmit an image while in flight, of both the inside and outside of any object.

The present terrestrial situation is briefly this: The island universes are entering on a phase of cosmic expansion, the earth is entering new space-conditions, the etheric stresses are changing, and hence the internal stresses of the globe are affected. Deep-lying strata are disintegrating and a period of violent seismic disturbances is at hand. These are of profound interest to our Etheric visitors. No mistake could be more serious than to attack the Discs or any other type of etheric craft now present in our skies.

The BSRA Hdqrs. will make an effort to reply to any serious and specific inquiries.

(M. L., Director)

THE BORDERLAND SCIENCES RESEARCH ASSOCIATES is an association of persons interested in 'borderland' facts and happenings, i.e., in occurrences which 'orthodox' or official science, for various reasons, cannot or will not investigate. Examples of such subjects would be: The Vortexes of the West (where the laws of gravity seem distorted); psycho-kinetic effects; telekinesis and apportionation; the Morley-Martin experiments in abiogenesis; effects upon the weather of atomic fission products; the problem of the underground races; a great variety of current etheric phenomena; and specifically at present the origin and nature of the Ether - Ships and other unknown aircraft now visiting our planet.

BSRA studies are characterized by the fact that the Associates are willing

to employ any methods which will yield useful information, whether they be acceptable to 'orthodox' science or not. Their findings are accessible to the public and are never influenced by considerations of academic position and prestige, or by the teachings of any Cult or Order. Investigations in the field of psychism and parapsychology are conducted in an impartial and scientific spirit. The work of the Association is supported by donations, either to the BSR Headquarters or to the Borderland Sciences Research Foundation, incorporated under the laws of the State of California.

The Association issues numerous booklets, releases and reports, and one bi-monthly periodical, the Round Robin. All activities are conducted in a spirit of public service, on a non-profit and non-sectarian basis. Inquiries addressed to the national headquarters, at 3524 Adams Avenue, San Diego 16, California, will receive prompt attention.

This brochure is prepared by the undersigned National Director, with the cooperation of the Regional Directors and various Associates, and respectfully submitted by them in the public interest to the Authorities named above, to all citizens, and especially to publicists in all fields of contemporary American life.

San Diego, August, 1952.

Meade Layne, M.A., for the Borderland
Sciences Research Associates.

Notice Regarding Copyright Restrictions On the Use of Unpublished Materials

Under the provisions of the Copyright Revision Act of 1976 (Public Law 94-553) unpublished works that were in existence on January 1, 1978, but that are not protected by statutory copyright and have not yet gone into the public domain, are under Federal copyright protection for a term lasting for the author's life plus an additional 50 years after the author's death. For works made for hire and for anonymous and pseudonymous works, the term is 75 years from publication or 100 years from creation, whichever is shorter. Moreover, all unpublished works created before January 1, 1978 are guaranteed at least 25 years of statutory protection and in no case will a copyright in a work of this sort expire before December 31, 2002. If the work should be published before that date, the term is extended by another 25 years, through the end of 2027. This means, in effect, that much of the unpublished material in the Truman Library's manuscript collections is under copyright protection at least until January 1, 2003. However documents prepared by United States Government officials and employees as part of their official duties are not subject to copyright. Such documents are in the public domain.

The Copyright Revision Act gives statutory recognition to the judicial doctrine of fair use. This permits the reproduction of portions of copyrighted materials, whether published or unpublished, for such purposes as criticism, comment, news reporting, teaching, scholarship or research without such action constituting an infringement of the copyright. Responsibility for observing legal restrictions on the reproduction of Library materials rests with the researcher and his publisher, not with the library or any of the members of its staff.

It should be noted that some persons who have given their papers to the Library have legally donated to the Government the copyright in any of their writings which may be in the Library. Researchers may obtain additional information concerning the copyright status of donated materials by consulting the Library's archivists.

Additional information concerning restrictions in the use of unpublished materials in the Truman Library may be obtained by writing to the Director, Harry S. Truman Library, 500 W. U.S. Hwy 24, Independence, Missouri 64050.

rwc

HOLDEN, Guy
85-050 Avenue 45,
Indio, Calif.

Letter to the President, dated 7/30/52.

Referring to the report that our armed planes have been ordered to shoot down a flying saucer for investigation, the writer suggests that we had better cultivate the friendship of the space visitors and perhaps save ourselves from annihilation. Says that a friendly gesture would be supplied if the President were to issue a proclamation ordering our military and all private citizens to welcome space visitors and treat them with the utmost consideration should they choose to land among us.

Respectfully referred to the Department of Defense (Air Force) for consideration and acknowledgment, 8/4/52.

First copy filed - HOLDEN, Guy

FCB

BATES, Sarah Louise
1929 North Argyle
Hollywood, 28, California

Letter to the President, postmarked 7/20/52.

Writer comments on reports of the so-called Flying Saucers and suggests they may contain highly intelligent humans and that an effort should be made to contact them in a friendly manner.

Respectfully referred to the Department of Defense (Air Force) for consideration, 8/4/52.

rwc

KUHN, Paul J.
604 Highland Road
Albany, Georgia.

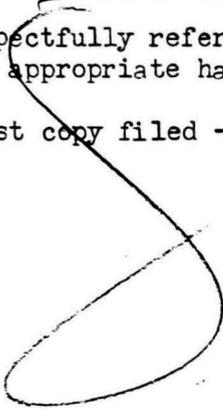

Letter to the President dated 7/28/52.

Urges the Air Force to refrain from attacking the so-called
'flying saucers'.

Respectfully referred to the Department of the Air Force for consideration
for appropriate handling, 8/5/52.

First copy filed - KUHN, Paul J.

wls

WOMACK, Printise
201 Park Way
Dinuba, California

Letter to the President, dated 7/30/52.

Writer comments re "flying saucers"; he urges that the Air Force inform the public as to the results of the investigation.

Respectfully referred to the Department of Defense (Air Force) for consideration and acknowledgement, 8/5/52.

First copy filed - WOMACK, Printise

mc

NORTHERN, Mrs. Ann
1636 W. Alabama
Houston, Texas.

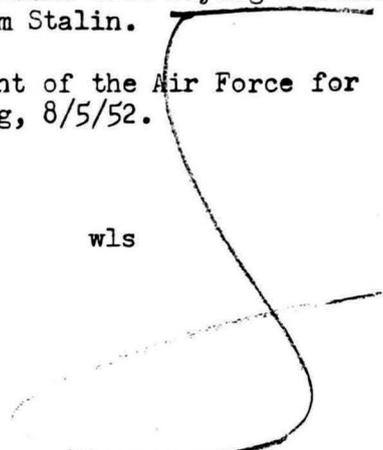

Letter to the President dated PM 7/30/52.

Writer offers suggestion to President that flying saucers
may be ballons full of germs from Stalin.

Respectfully referred to the Department of the Air Force for
consideration and appropriate handling, 8/5/52.

First copy filed - NORTHERN, Mrs. Ann
