

100 million dollar plan! I didnt jump out of
the window in '29 + '30 I went back to the oil
fields and when I personally with my
own money opened the Ness city field in
Kansas. (Even today the most active field
in Kansas) A few ^{guardman} named Proins from
Denver came down to Ness city and told
me he wanted to build a Refinery in Denver
to process 10,000 barrels a day. I said "I will
have a 2000 barrel well" "Lend me \$57,500
dollars and Ill get Missouri Pacific to give me
a rate and Ill ship the oil by rail." "On
each barrel I deliver to your refinery credit
me 1.00 a barrel in the loan. pay me 2.00 a lb
balance and Ill supply you with oil." You
must remember that the ~~National~~ Chinese
Government had put up 25 million for me
to take a staff of 200 American Psychologists
