

Worked at our job, 55 lbs). Flader drove  
out several miles, and on a high ridge  
stopped the car and Dr. P. turned on  
his different switches. He said "its  
2000 feet to that water well Wood mill  
and etc, etc, I said lets go back to  
town Flader said, I own 100000 acres  
of this land, I then had them drive  
to my<sup>old</sup> refinery where we had 5 water  
wells. stopped in yard. Mr Stringer, my  
own man, and all my company they  
were there, I said "Dr. found out our water  
wells". He turned on all the switches  
and said 1 well is 150 from here, its 206 feet  
deep and the water is standing 60' of the  
top of the hole - but Mr Stringer you have  
a loose joint of pipe at bottom of well
