

survey the well. The drill is exactly-
all news stopped over into the flush pits
while waiting for completion orders.

The Standard who still had 25% int
ing production there, had made a seismic
survey of this structure at a cost of over
\$200,000. John Sobels their land man
called me and said how we want
to get a farm out and drill the Missippian
at about 8000 feet. Well cancel the \$200,000
you ^{are} still owing us which we have been
carrying for 16 years and give you a
reasonable bonus and carry you for a
25% C.W.I. I said Johnny I ought to
take your deal, but this old bastard has
finally gotten to the Sundance and we
have a 2000 barrel well in the making
