

From an ~~last~~, turned his truck over
and we had to rent our own truck
to load up and deliver pipe. To Wellsite
Halliburton came out, looked at pipe.
Took a small ball peen hammer, and with
one hard tap knocked little bit casing and
said "we won't run this casing - It will
collapse when we cement and drill the plug"
"It's my pipe & my hole" said Flader and
I'm paying you - Hard headed son of a bitch
Bernard - Big here said Halliburton your
sole responsibility. We signed. They ran
pipe - drilled plug. Pipe collapsed. and for
30 days Flader fished - started 1 1/2 well on
new deal. Greded a 2500 lbl capacity
run down, 500 lbl tubular - Drilled to 2000
feet and ran and cemented 10 inch string
of good pipe. We made him buy -
