

Forwards R. L. ID#1

Chas. Maine, -

July 1, 1962.

Dear Mr. Fitch, -

Very truly, I shall try to answer your question, May 9, 1962.

As I write with, the resistance of employees by the Canadian Government, but that the U.F.O. reveals work carried on

years ago. Right now the industry receiving from a very serious situation and we may

make the people on the list say. I will do my best to help the situation.

with the Oil Release. His country are all into the investigation and research

information in U.F.O. I have been reference to the CIA and also to a group

bracket working with the Government. As to the truth or falsity of these matters

I have no worthwhile information, really numbers such as you have mentioned. I will

3rd time in no more to present in from giving for the name a name, the

organization who sent of the U.F.O. situation - I simply do not know and have already give

you the names I have found of the

4th I do not know what the happened to

WICAP. I know they got some information assistance to continue for an independent

point in a recent article, but State leaders communication. I have for months. I received

I get further information, but I am not sure, some work, one which is complete and not one

and that is and when there is a category the situation with to remember they know them

and then only shall we be satisfied.

Yours truly,  
J. H. Fitch

Mr. C. W. Fitch  
6526 Carnegie Ave.  
Cleveland 3, Ohio.

Dear Mr. Fitch:

By this time you must have received my  
since I am in a very poor condition  
a very busy - well I look pretty good for such  
by retirement has some work in some  
time of my life.

Now I am very old - measures - you are  
ions. -

(1) I was hoping to mention a general note  
about U.F.O.'s they were unknown to me while  
in the service.

(2) I am certain that they are often to be seen  
space ships, certainly not from this Earth  
air. I believe the occupants of these ships  
large enough to carry a crew are pretty much  
like missiles. Much of the jiggery thinking about  
their weird appearance is undoubtedly caused  
by our concepts of what our sixth sense  
have for an atmosphere and temperature  
conditions. Even our scientists are  
South. I believe these things are not

on our planet. I believe the observation discs  
yet, in fact as we know, and all instruments  
must be suspect otherwise why all the thought, time  
and money having spent on air research and  
exploration? Only a few years ago the scientists  
all the answers. - I am sure you are  
but just as positive that they can give you the right  
answer anytime you ask.

(3) About controlled observation discs I have heard  
they were first noted in WWII over Germany by our  
bombers. They were thought to be German missiles  
at first and were called by our people "Foo fighters". Later  
we found from German prisoners that they thought the  
Allies had been detecting new and fantastic weapons  
in the air. They were seen by some of our men in the Pacific  
and also noted during the Korean War. Generally  
the Air Force does not admit this. I believe the  
Navy personnel in New Mexico have systems -  
reported them near rocket crashes there and one  
who followed a rocket in flight as it came down  
could be. I have never seen one myself and what  
I have just written is a nice story. I have never seen  
I do not remember the Foo, U.F.O. person in the  
your description is could very well have seen  
one of these observation discs.

(4) There were press accounts of the radar  
sightings by radar operators at the Washington  
Airport, but things were quickly checked up by

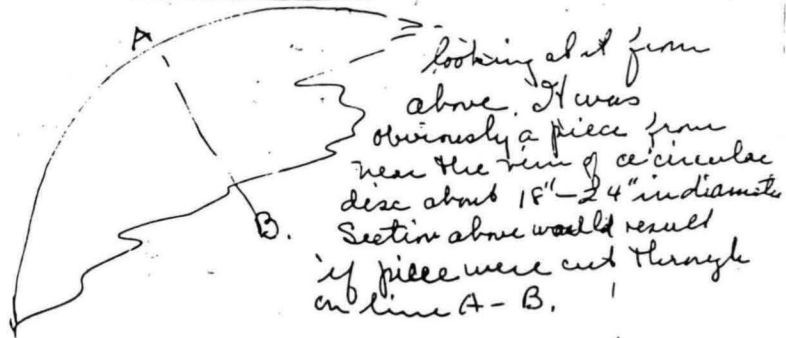

RAdm. Herbert B. Knowles, U.S.N. (Ret.)

Goodwin Road - R.F.D. #1

Eliot, Maine

The Air Force and the thing sighted became officially "laser aberrations causing false images - temperature inversion effects, ghost images and spots before the eyes." Keyholes knows about the piece I told you about. He has used everything he has to convince members of Congress of the reality of U.F.O.'s but always the Air Force somehow manages to put the quietus on his attempts. As for convincing people in general, a picture and descriptive matter would be scoffed at by the vast majority of people as faked and therefore to be laughed at. People will not believe unless the Government comes out with the truth.

(5) The cross section was about like this

In conclusion I do not know the real reason the Air Force is concealing the truth about U.F.O.'s. Perhaps therefore a panic would result if people knew visitors from outer space were looking us over. I remember what happened some years back when the radio went on a play over the air about an invasion from Mars. Perhaps they are not prepared to admit that there are minds elsewhere in the universe capable of devising far more effective means of travel than our best minds have been able to do. I haven't been too many years since the general concept was that God put upon the earth the only thinking creatures (man) in the universe; it may come as quite a shock to many to have to admit that better minds exist elsewhere. Of one thing I am certain - they are it. If investigating U.F.O. reports would disclose any real kind of explanation except the right ones, and that will continue until God at the highest level issues a "cease and desist" to them. With this that he? I really I don't have the foggiest idea. Pardon my laxity in answering.

Sincerely yours,

H. B. Knowles

Mr. C. W. Fitch  
6526 Carnegie Ave.,  
Cleveland 3, Ohio.

Dear Mr. Fitch: -

I am constantly amazed at the widely distributed people who contact me as UFO's, and delighted, too, for it shows the wide spread interest of many people in this matter. You have had a piece of a small disc in your hands. It was shown to me by Mr. Wilbur Smith of 10 Kotta St, City View, Ontario, Canada. At that time (1952) Mr. Smith was heading the Flying Saucer research of the Canadian Gov't, and working in very close cooperation with our authorities in Washington, D.C. He is still very much interested in this matter and does independent

research. The Canadian Gov't has officially abandoned the project.

To the best of my recollection the object was shot down by a plane and seen to fall in the yard of a farmer across the river in Virginia. Upon searching the area several pieces were found, one of which was turned over to Mr. Smith for independent research. In one of his trips down to see me he brought the piece along for my inspection.

It was a slunk of unrefined metal in structure, brownish in color when broken with a curved edge indicating the whole thing to have been not over 2' in diam. The edge was rounded in cross section, perhaps a quarter inch thick and obviously welded to a considerably greater thickness at the center. The outer surface was smooth but not polished and at the broken sections there were obviously iron particles and even evidence of iron rust. I would say that the weight was somewhat lighter than if of solid iron, but it was not "extremely light".

RAdm. Herbert B. Knowles, U.S.N. (Ret.)  
Goodwin Road - R.F.D. #1  
Eliot, Maine

Mr. Smith told me that a chemical test had been made of the piece at hand. That iron had been found in it but little if anything else could be identified. To the best of my knowledge this was a piece of one of the UFO's remotely controlled observation discs. Such discs have been seen many times most often in the vicinity of defense installations.

We should not scoff at the idea of an observation disc operated by distant control from a U.F.O. for we have done the same thing, rather crudely as yet, but we are bettering our methods and techniques we have crystal structures under experimental development which may enable us to use a single small, innocuous looking structure to take the place of the whole inwards of a radio or television set. Perhaps this disc had such an affair inside which was lost when the disc broke up. I do not know.

If any operating mechanism having been found. The Air Force retained parts of the broken disc what their findings were I have no way of knowing since these findings are bound up in official Air Force secrecy. Mr. Smith can possibly give you more precise information than can I. I am sure he would welcome a letter from you and you may use my name if you wish.

It is an intriguing side light on this affair I have read somewhere from writing by so-called "contactees" that these remotely controlled discs can be exploded from a distance and the mechanism inside retrieved by the controlling vehicle. This does not seem too improbable to me when we remember what we ourselves are doing and planning to do.

I am sorry I cannot give you more details of this matter. Perhaps someday the Air Force may abandon its secrecy program and give to us the truth of what they have found.

May your interest in UFO's be rewarded with more concrete information than I can supply.

Sincerely yours,  
H. B. Knowles
